BBA-3211
Human Resource Management
Employee Testing and Selection

Dr. Cagla Ozgoren
cagla.ozgoren@bau.edu.tr

2026-2027,
Fall/Winter

Today..

Why is it important to test and select employees?

According to new benchmarking data from the Society for Human Resource Management (SHRM), the average cost per hire was nearly $4,700 (2024)

That means if you're hiring for a job that pays $60,000, you may spend $180,000 or more to fill that role.

Negligent hiring!

Example: Google – Project Oxygen (Data-Proven Hiring)

What Google Did?

- Google launched a massive internal research project called Project Oxygen (led by People Analytics).
- They analyzed:
- 10,000+ performance reviews
- Feedback surveys
- Promotion records
- Manager effectiveness ratings
- **Then used:**
- Statistical modeling
- Text analysis
- Regression analysis
- Machine learning classifiers
- To identify what actually predicts high performance.

Evidence: Google People Analytics, Project Oxygen Report,

- Google found **no statistical relationship** between **top university pedigree** and **employee performance**.
- But they found a **strong, positive correlation** between **interpersonal/soft skills** and **team productivity + retention**.

What Changed at Google

Before Analytics	After Analytics
Hiring emphasized **IQ, degrees, puzzles**	Hiring emphasized **teamwork, communication, leadership behaviors**
Interviews used **brain-teaser questions**	Interviews replaced with **structured behavioral questions**
Managers chosen based on **technical mastery**	Managers selected & trained based on **coaching and people skills**

TYPES OF TESTS

- **Test of Cognitive Abilities**
  - **Intelligence tests (IQ)** (range of abilities, including memory, vocabulary, verbal fluency, and numerical ability) (Stanford Binet or Wechsler tests)
  - **Specific cognitive abilities** (aptitudes, deductive reasoning, verbal comprehension, memory, and numerical ability)
  - **Example: Wonderlic Personnel Test:** A short test that measures general cognitive ability through various questions on math, vocabulary, and reasoning.
- **Test of motor & physical abilities** (finger dexterity, manual dexterity, and (if hiring pilots) reaction time, distractibility, balance)
- **Technical Skills Assessments:** Evaluate specific job-related skills.
  - **Example:** Codility or HackerRank - solving algorithmic problems or debugging existing code.
- **Measuring Personality and Interests**
  - **Example:** Myers-Briggs Type Indicator (MBTI): Assesses personality type
  - **Interest inventories**
- **Situational Judgment Tests (SJTs)**
- **Job Knowledge Tests:** Example: Knowledge of sales techniques, product knowledge, and market trends.
- **Work Samples**:
- **Coding Bootcamp Challenges**
- **Emotional Intelligence Tests**
- **Group Exercises**
- **Integrity Tests**: Assess honesty and reliability.

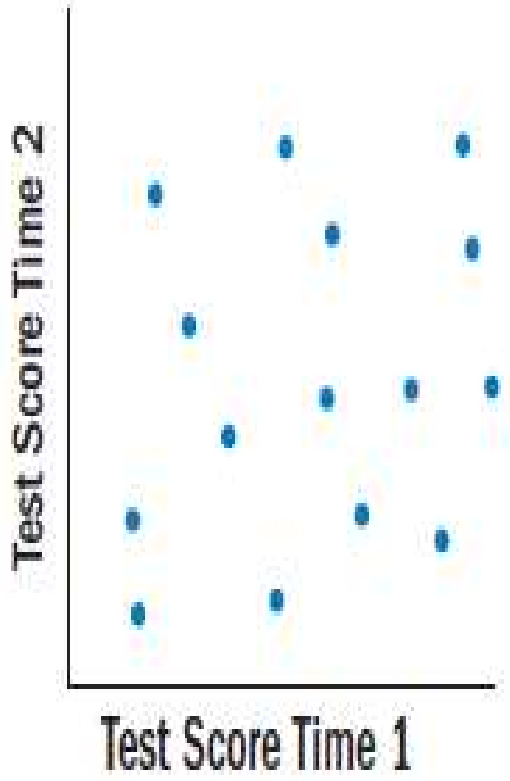

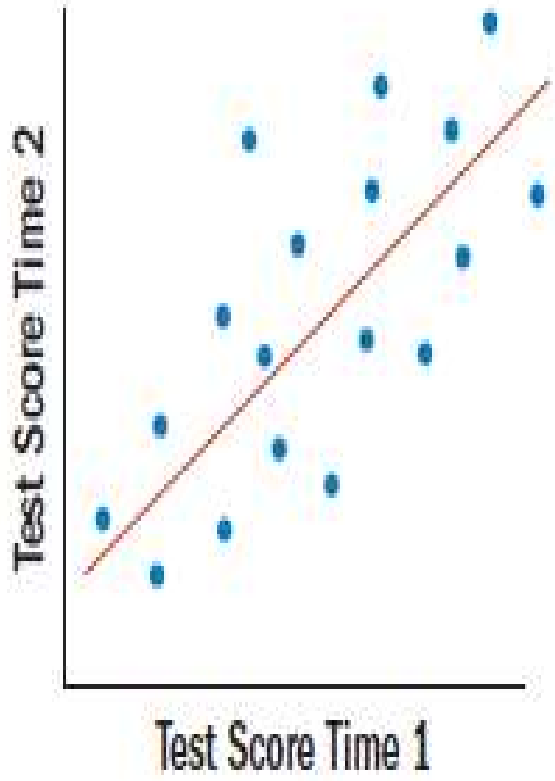

THE BASIC OF TESTING AND SELECTING EMPLOYEES

- Reliability
- Validity

Reliability Coefficient

FIGURE 6-1 Correlation Examples

"How do you know I have a learning disability?
— Maybe you have a *teaching* disability!"

Example: Personality Test for Technical Positions (software engineering position**)**

- **Test Description:** A company uses a personality assessment designed to evaluate traits like extroversion, agreeableness, and emotional stability to select candidates for a software engineering position.
- Do you think that this test is valid? Does it measure technical skillset?
- Does it measure candidate's coding skills or technical problem-solving abilities.

Valid Test for Software Engineering Positions

Technical Skills Assessment:

- **Coding Challenge:** Provide candidates with a problem that requires writing code to solve a specific technical issue. This assesses their programming skills and ability to think algorithmically.
  - **Example Question:** "Write a function in Python that takes a list of integers and returns the list sorted in ascending order."

System Design Problem:

- Assess the candidate's ability to design systems or architecture, which is crucial for many engineering roles.
  - **Example Scenario:** "Design a URL shortening service. Discuss your approach to database design, scalability, and how you would handle high traffic."

Logical and Analytical Reasoning:

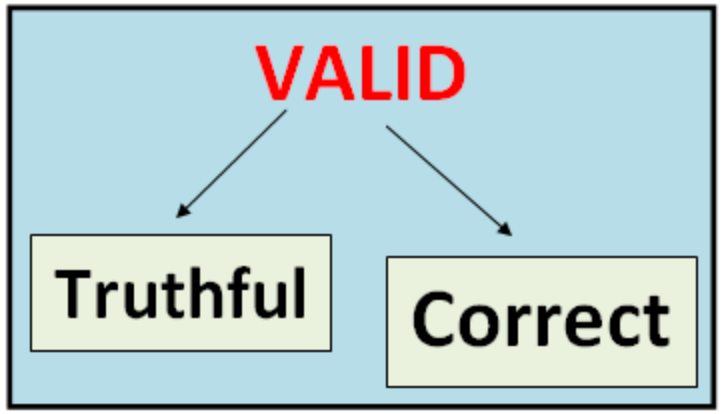

- Use logical reasoning puzzles or problems that require analytical thinking.
  - **Example Question:** "You have two ropes that each take one hour to burn, but burn at inconsistent rates. How can you measure 45 minutes using these ropes?"

Evidence-Based HR: How to Validate a Test

Step 1: Analyze The Job

Step 2: Choose The Test

Step 3: Administer The Test

Evidence-Based HR: How to Validate a Test

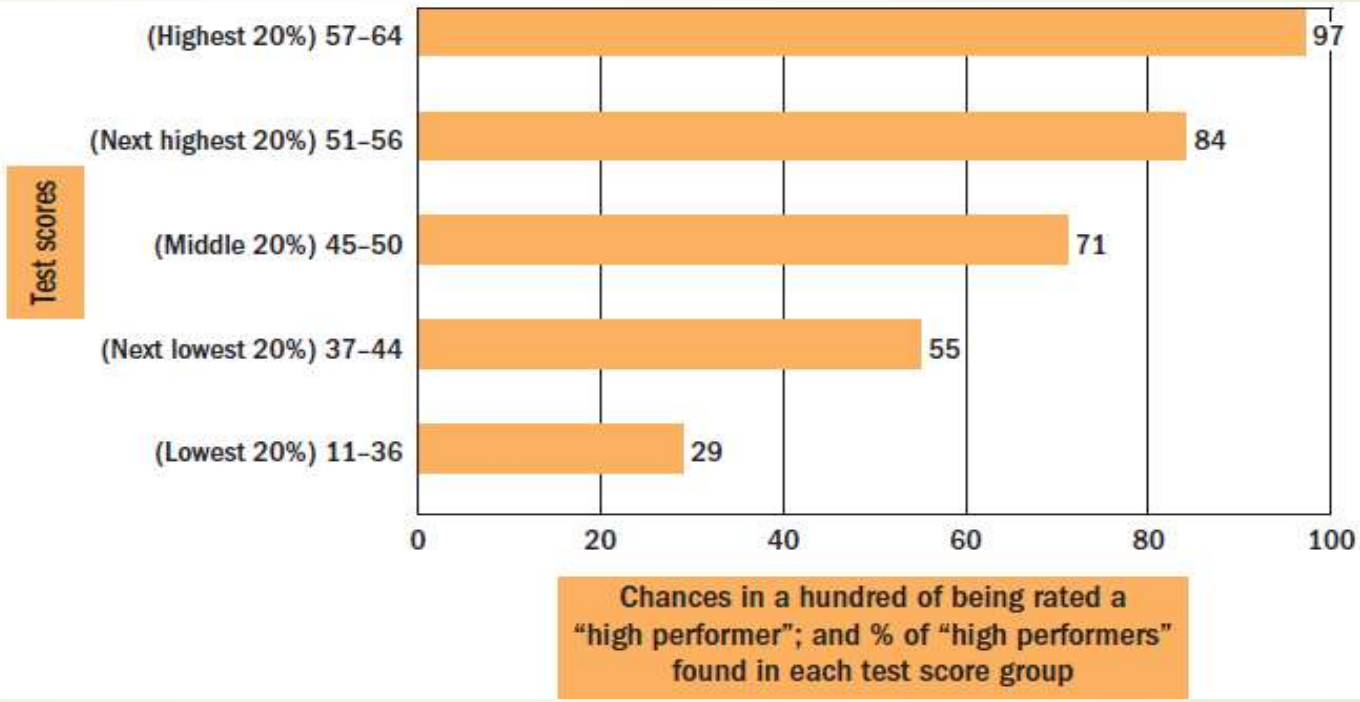

Step 4: Relate Your Test Scores and Criteria

Step 5: Cross-Validate and Revalidate

FIGURE 6-4 Expectancy Chart

Note: This expectancy chart shows the relation between scores made on the Minnesota Paper Form Board and rated success of junior draftspersons.

Example: Those who score between 37 and 44 have a 55% chance of being rated high performer and those scoring between 57 and 64 have a 97% chance.

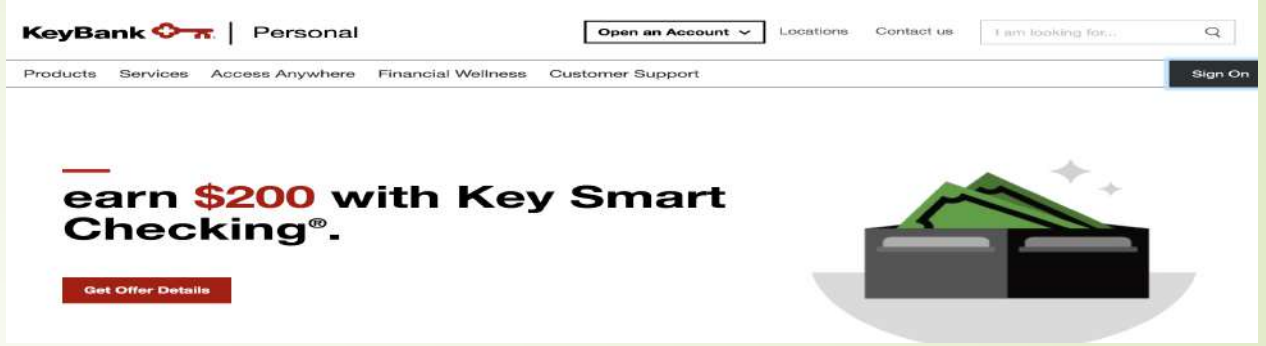

Copyright © 2017 Pearson Education, Ltd.

Bias: For example, a particular IQ test may provide a valid measure of cognitive ability for middle-class whites but not for some minorities, if the score depends on familiarity with certain aspects of middle-class culture (e.g. such as assertiveness and competitiveness).

Utility analysis: , "Does it pay to use the test?"

Using Tests to Cut Cost and Boost Profits

1-15

Financial services firm Key Bank knew it needed a better way to screen and select tellers and call-center employees.

The company calculated it cost about $10,000 to select and train an employee, but it was losing 13% of new tellers and call-center employees within the first 90 days.

That turnover number dropped to 4% after Key Bank implemented a computerized *virtual job tryout* ***candidate assessment screening tool.***

"We calculated a $1.7 million cost savings in teller turnover in one year, simply by making better hiring decisions, reducing training costs and increasing quality of hires," said the firm's human resources director.

1. Tests of Cognitive Ability

Intelligence Tests (IQ)

Assess a range of mental abilities: memory, vocabulary, verbal fluency, and numerical reasoning.
Examples: **Stanford-Binet** and **Wechsler Adult Intelligence Scale (WAIS)** — often used in research or assessment centers.

Specific Cognitive Aptitude Tests

Focus on narrower skills such as **verbal comprehension**, **numerical reasoning**, **logical deduction**, or **spatial ability**.
Example: **SHL Numerical and Verbal Reasoning Tests** – widely used by banks, consulting firms, and tech companies.

General Cognitive Ability Tests (GCA / "g factor")

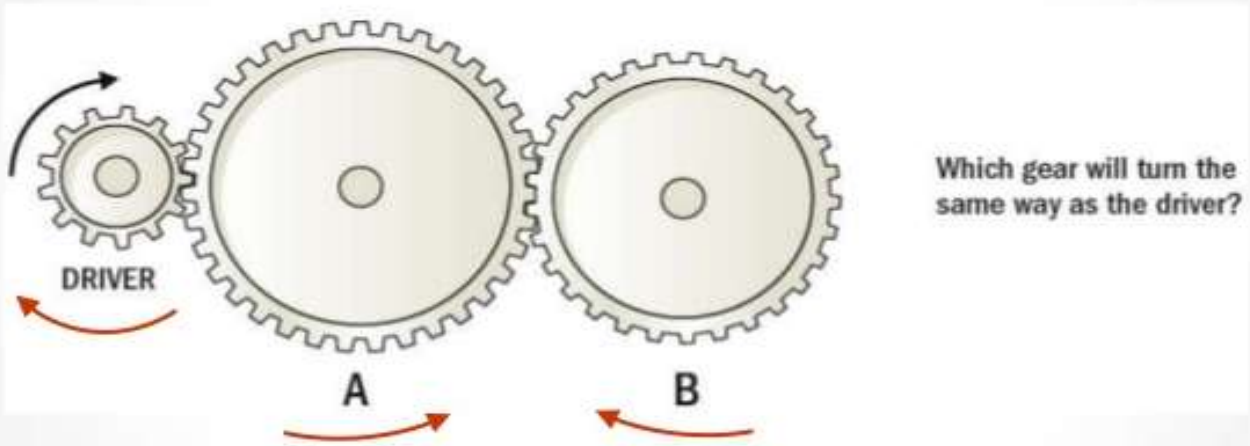

Measure broad learning and problem-solving capacity.
Example: **Wonderlic Personnel Test** – a 12-minute test used by employers to assess overall reasoning, math, and language ability.

- **Unilever – Game-Based Cognitive Tests**
- Uses **Pymetrics**: 12 short neuroscience-based games testing **memory, attention, pattern learning, and risk-taking**.
- Replaced traditional IQ tests with gamified assessments.
- Results: **75% faster hiring**, **+25% diversity**, and higher prediction of job success.
- Focus: *Learning agility, fairness, and candidate engagement.*
- **IBM – Cognitive Ability Assessment**
- Uses **online aptitude tests** (via **SHL/Aon**): **numerical, logical, and verbal reasoning**.
- Evaluates candidates' **analytical thinking and adaptability** for tech and consulting roles.
- Global use → consistent, data-driven, bias-checked selection.
- Focus: *Identify quick learners and problem solvers for AI-driven roles.*
- **Deloitte – Online Cognitive & Aptitude Tests**
- Uses **Aon's (Cut-e) cognitive assessments** for graduate and internship recruitment.
- Tests include:
  - **Numerical reasoning:** interpret charts, ratios, and business data.
  - **Verbal reasoning:** evaluate written information logically.
  - **Abstract/logical reasoning:** identify patterns and solve puzzles.

- **"If cognitive ability predicts performance so strongly, why should companies still combine it with interviews or personality tests?"**

Example: Tests of Physical & Motor Abilities

FIGURE 6–5 Type of Question Applicant Might Expect on a Test of Mechanical Comprehension

6–13

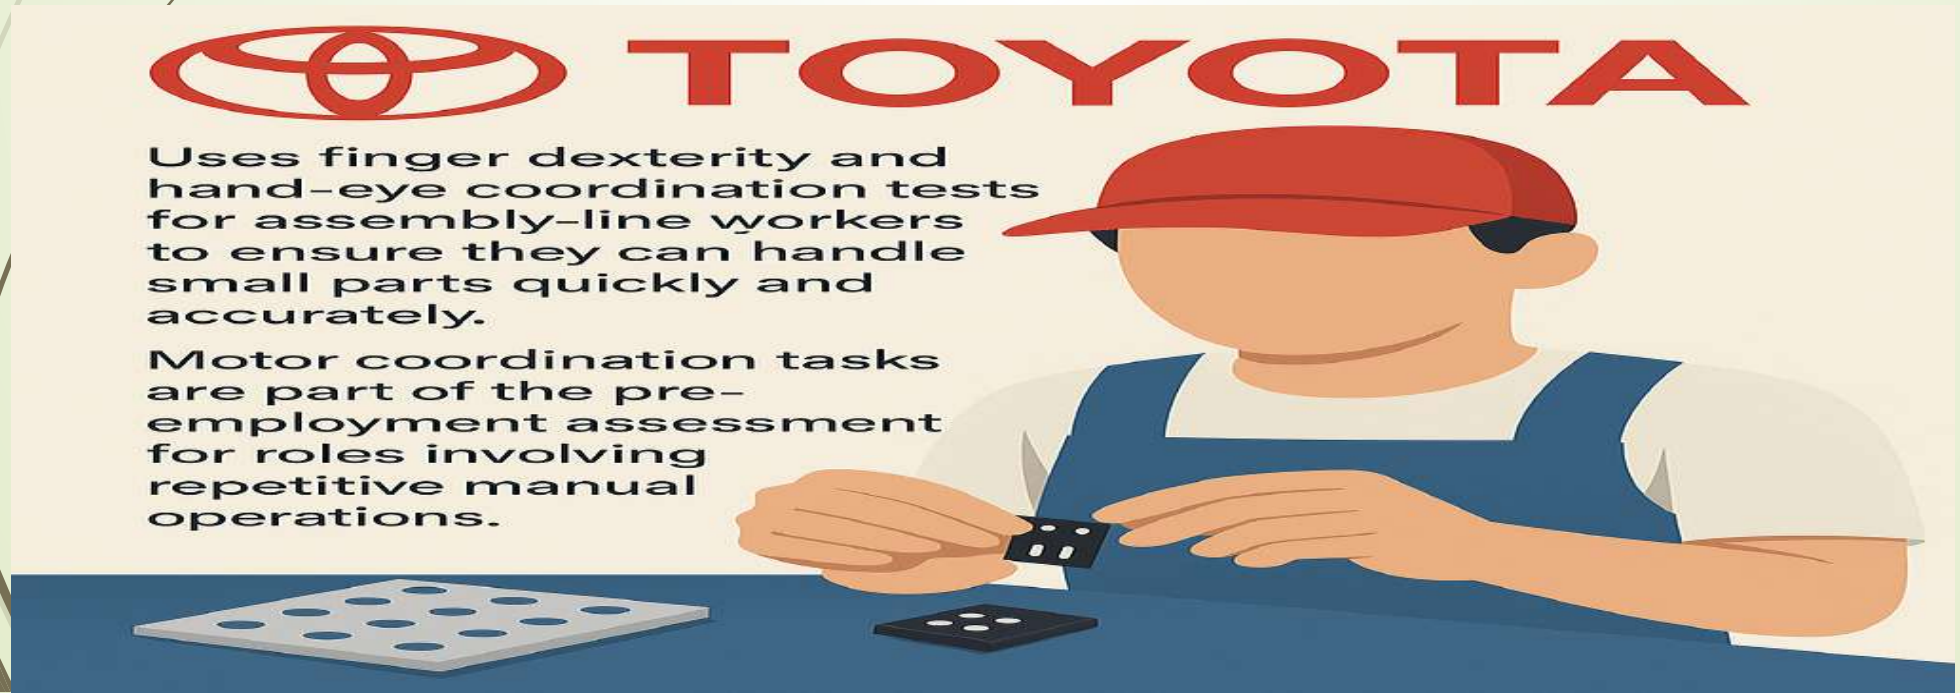

Copyright © 2011 Pearson Education, Inc. publishing as Prentice Hall

- This question assesses a candidate's **mechanical reasoning** — specifically, their ability to understand **how gears, forces, and motion work**. It is commonly used for jobs in:
- Engineering & technical apprenticeships
- Mechanics & machine operators
- Aviation maintenance
- Manufacturing & assembly line work
- Skilled trades (electricians, plumbers, HVAC technicians)

2. Tests of Physical & Motor Abilities

Used for positions that demand **physical coordination, manual dexterity, balance, or stamina**. These tests assess a candidate's ability to perform tasks that require bodily movement and control.

- **Finger Dexterity Tests:** Evaluate fine motor skills (e.g., assembly-line or precision work).
- **Reaction-Time Assessments:** Common for roles like **pilots** or **drivers**, where quick reflexes are crucial.
- **Physical Fitness Tests:** Measure strength, endurance, and agility—often used for **police officers**, **firefighters**, or **military personnel**.

3. Technical / Job-Specific Skills Tests

- Evaluate **actual job skills**, not just potential.
  Examples:
  - **HackerRank / Codility** (software engineers)
  - **Excel modeling tests** (finance roles)
  - **Case interviews** (consulting)
- **Work sample tests are one of the most accurate predictors of performance.**

Google – Uses *online coding tests* and *system design interviews* to assess software engineers' real-world programming and problem-solving skills.

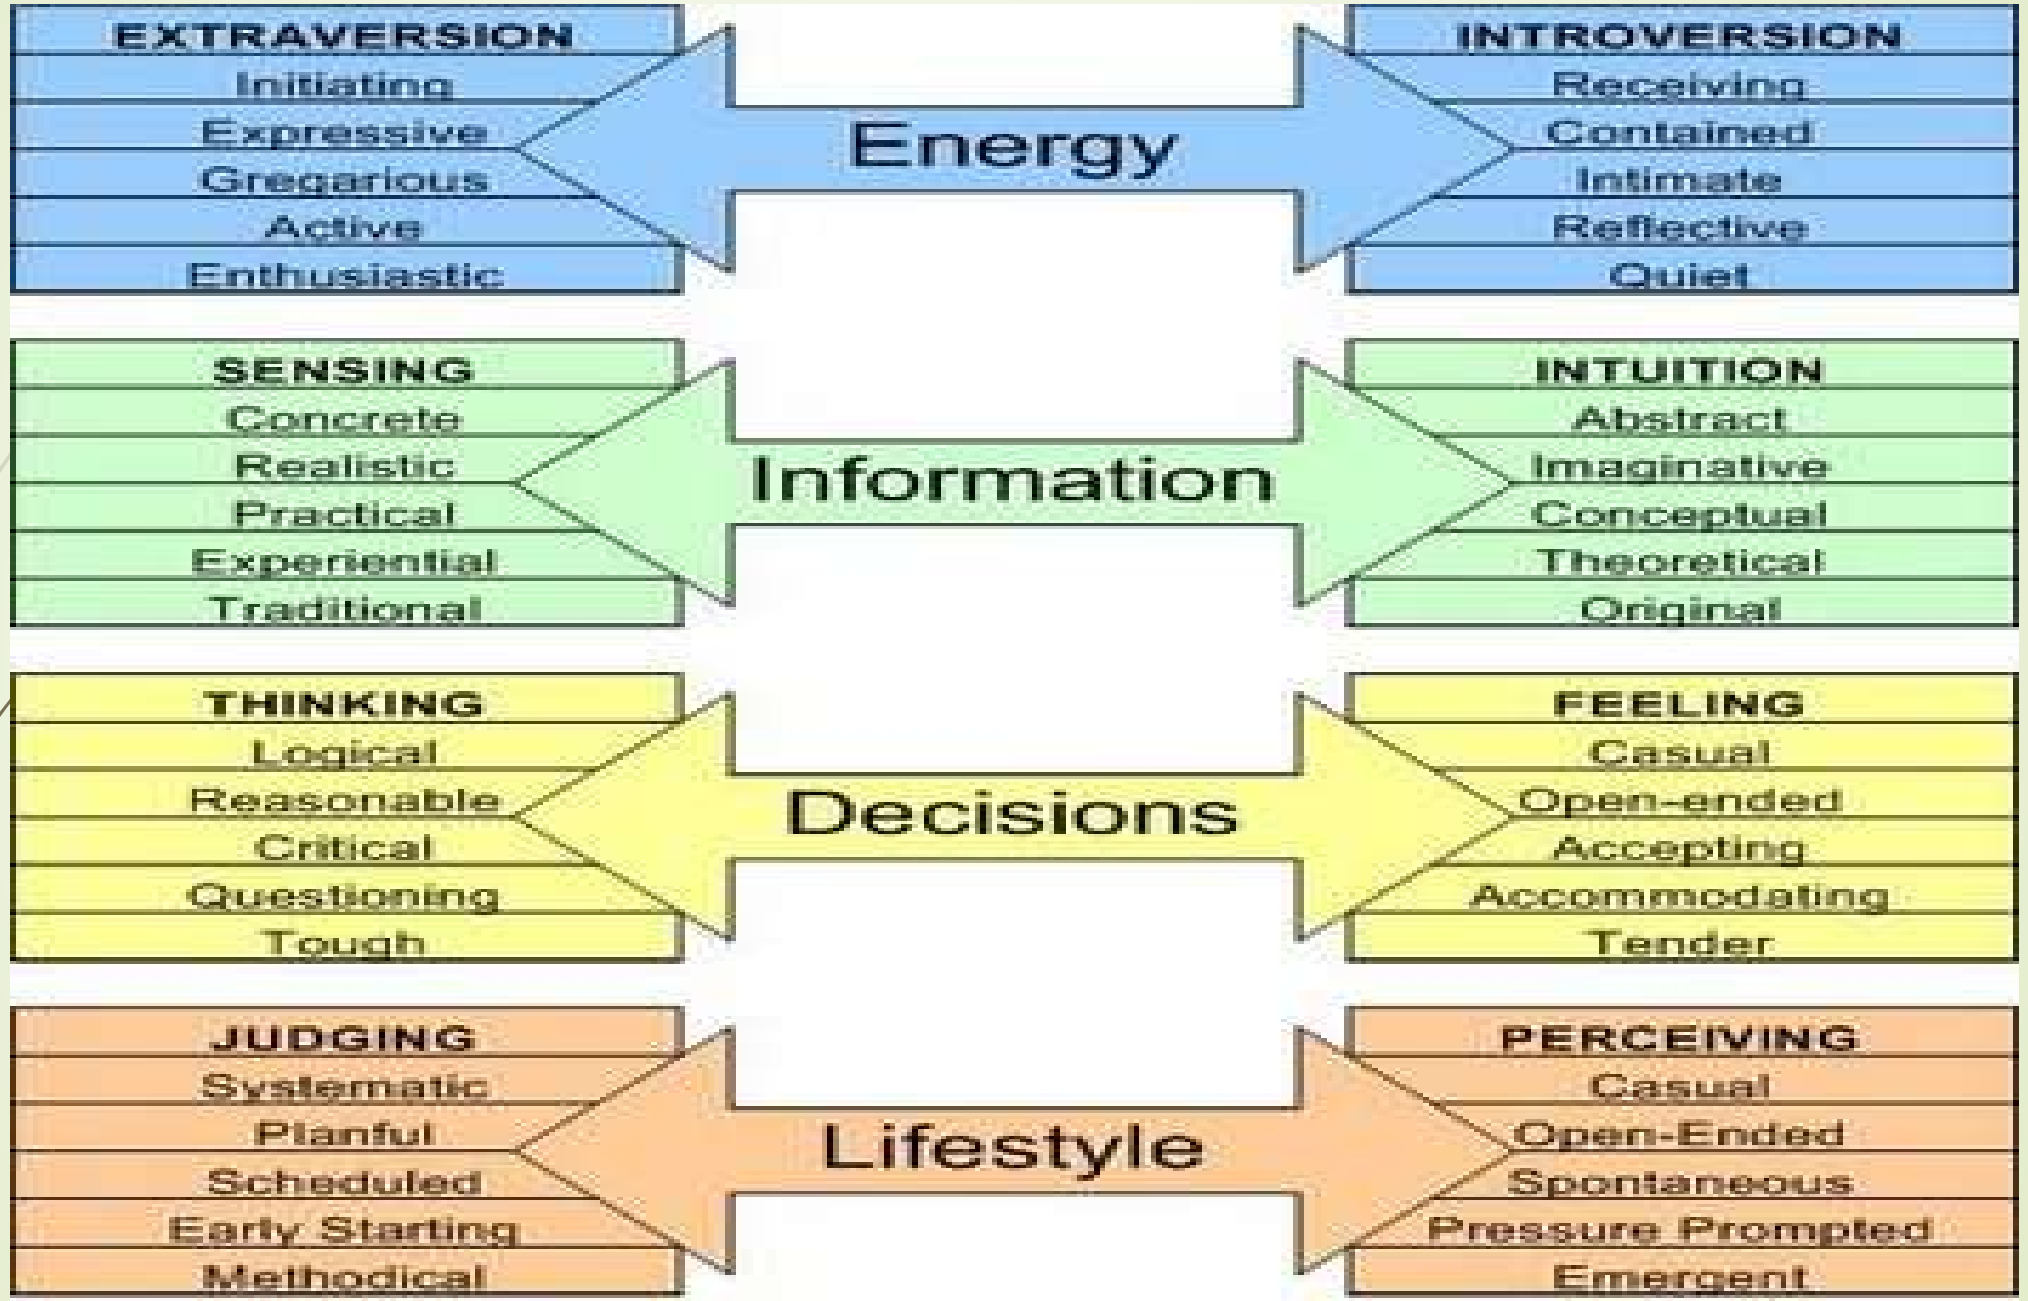

Boeing – Applies *engineering and maintenance simulations* to test technical accuracy, safety awareness, and understanding of aerospace systems.

Deloitte – Conducts *Excel and financial modeling cases* to evaluate analytical precision and client-reporting abilities.

Amazon Web Services (AWS) – Uses *cloud infrastructure labs* and *troubleshooting scenarios* to assess applied technical knowledge and solution orientation.

4. Personality and Interest Tests

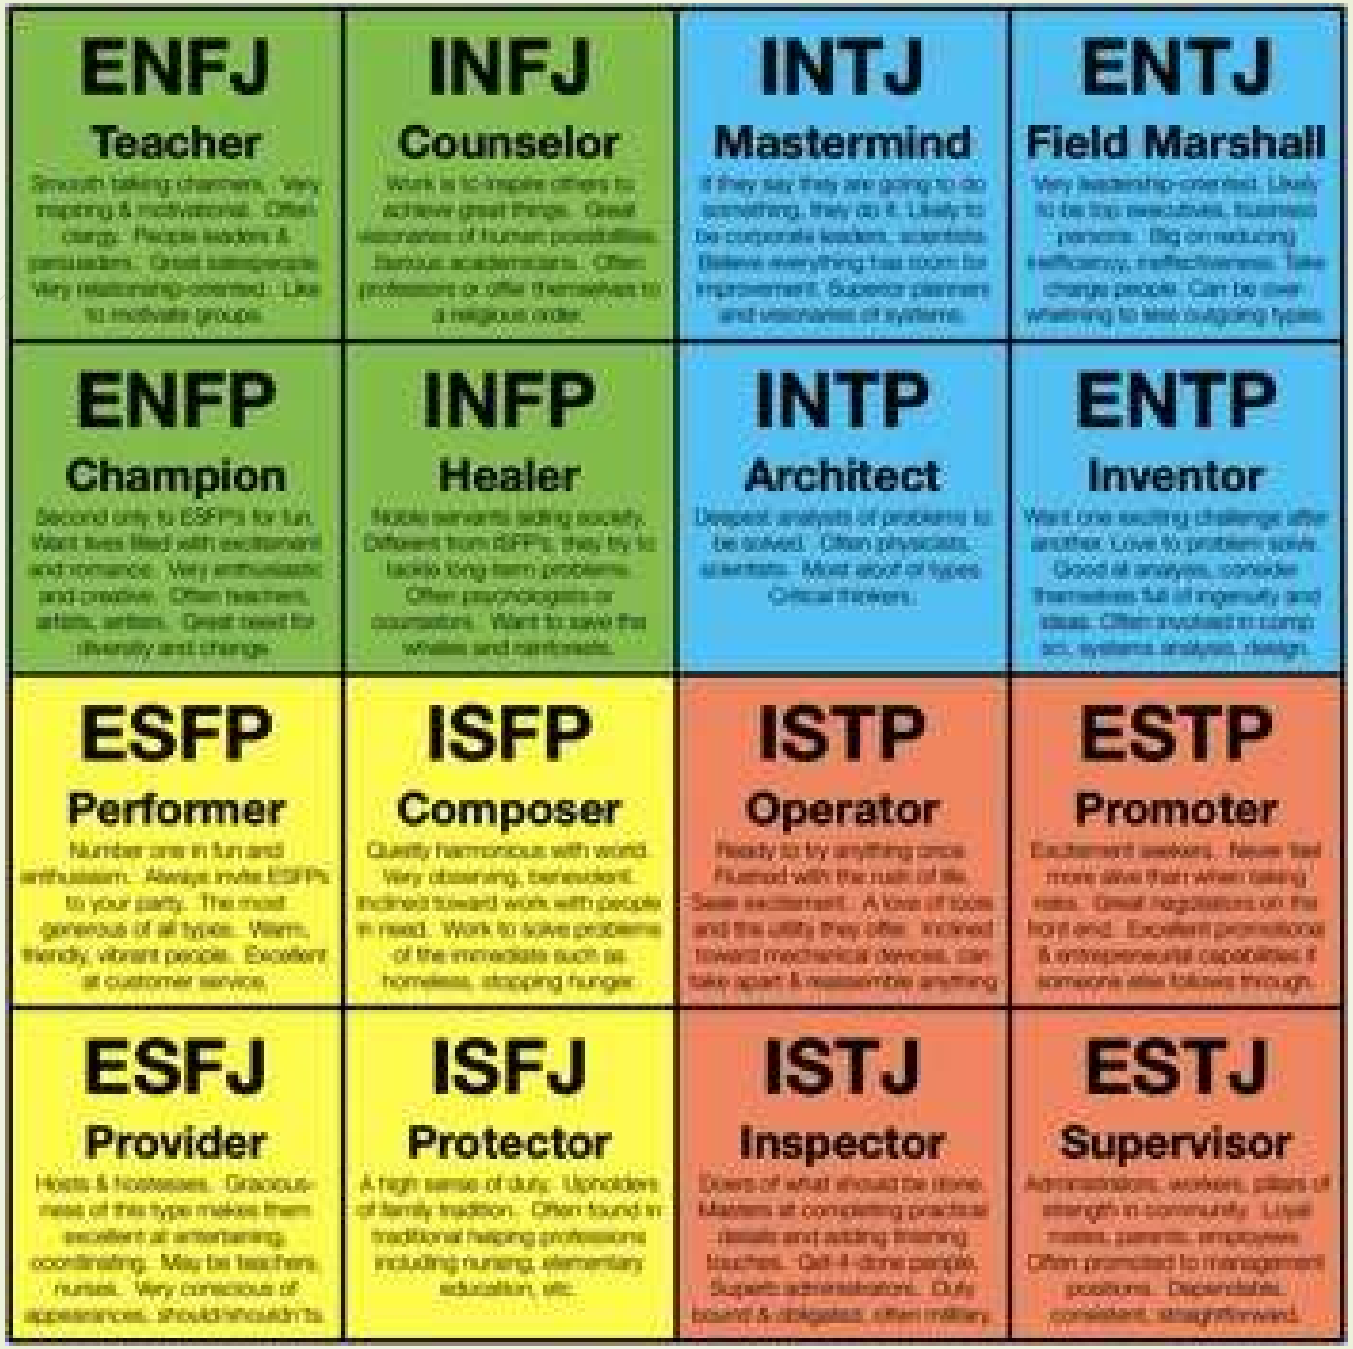

- **Personality Inventories:** Examine behavior patterns and interpersonal style. *Examples:* **Big Five Personality Assessment** (most scientifically reliable), **MBTI** (popular but less predictive in research).
- **Interest Inventories:** Help match individuals to roles aligned with motivation.
- **Important:** Personality predicts **cultural fit** and teamwork—not technical skill.

Personality test

- https://www.16personalities.com/free-personality-test

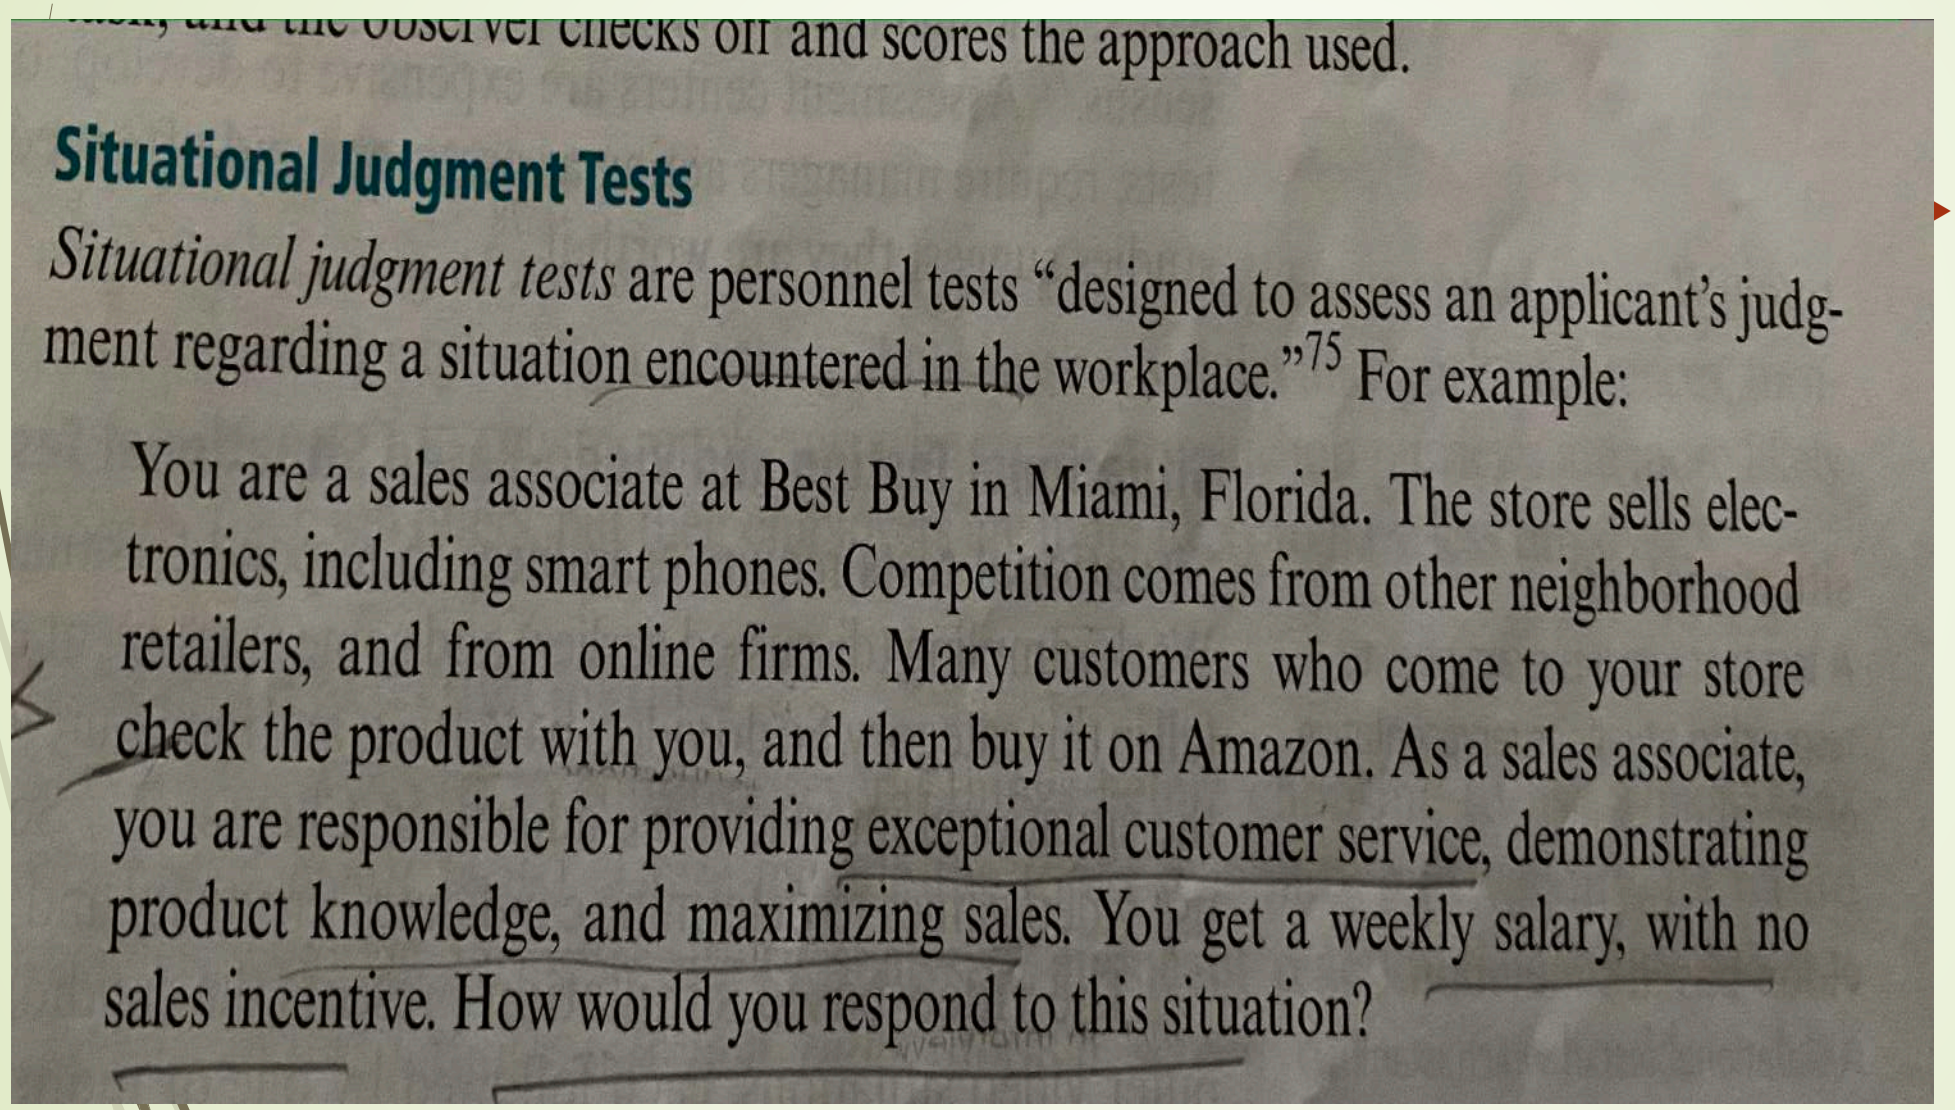

THE BEST JOBS
FOR EVERY PERSONALITY TYPE
We consulted the book "Do What You Are" and one of its authors, Paul Tieger, to determine five of the best jobs for each of the 16 Myers-Briggs personality types.
INTERACTION WITH WORLD
I INTROVERTS often like working alone or in small groups, prefer a more deliberate pace, and like to focus on one task at a time.
E EXTROVERTS are energized by people, enjoy a variety of tasks, a quick pace, and are good at multitasking.
ABSORPTION OF INFORMATION
S SENSORS are realistic people who like to focus on the facts and details, and apply common sense and past experience to come up with practical solutions to problems.
N INTUITIVES prefer to focus on possibilities and the big picture, easily see patterns, value innovation, and seek creative solutions to problems.
DECISION-MAKING
T THINKERS tend to make decisions using logical analysis, objectively weigh pros and cons, and value honesty, consistency, and fairness.
F FEELERS tend to be sensitive and cooperative, and decide based on their own personal values and how others will be affected by their actions.
ORGANIZATION
J JUDGERS tend to be organized and prepared, like to make and stick to plans, and are comfortable following most rules.
P PERCEIVERS prefer to keep their options open, like to be able to act spontaneously, and like to be flexible plans made.
ESTJ
Realists who are quick to make practical decisions.
1. Insurance sales agent
2. Pharmacist
3. Lawyer
4. Project manager
5. Judge
ISTJ
Hard workers who value their responsibilities and commitments.
1. Auditor
2. Accountant
3. Chief financial officer
4. Web development engineer
5. Government employee
ESFJ
Gregarious traditionalists motivated to help others.
1. Sales representative
2. Nurse/Healthcare worker
3. Social worker
4. PR account executive
5. Loan officer
ISFJ
Modest and determined workers who enjoy helping others.
1. Dentist
2. Elementary school teacher
3. Librarian
4. Franchise owner
5. Customer service representative

ENFJ
Teacher
Smooth talking charmers. Very inspiring & motivational. Often clergy. People leaders & persuaders. Great salespeople. Very relationship-oriented. Like to motivate groups.
INFJ
Counselor
Work is to inspire others to achieve great things. Great visionaries of human possibilities. Serious academicians. Often professors or offer themselves to a religious order.
INTJ
Mastermind
If they say they are going to do something, they do it. Likely to be corporate leaders, scientists. Believe everything has room for improvement. Superior planners and visionaries of systems.
ENTJ
Field Marshall
Very leadership-oriented. Likely to be top executives, business persons. Big on reducing inefficiency, ineffectiveness. Take charge people. Can be overwhelming to less outgoing types.
ENFP
Champion
Second only to ESFPs for fun. Want lives filled with excitement and romance. Very enthusiastic and creative. Often teachers, artists, writers. Great need for diversity and change.
INFP
Healer
Noble servants aiding society. Different from ESFPs, they try to tackle long term problems. Often psychologists or counselors. Want to save the whales and rainforests.
INTP
Architect
Deepest analysts of problems to be solved. Often physicists, scientists. Most aloof of types. Critical thinkers.
ENTP
Inventor
Want one exciting challenge after another. Love to problem solve. Good at analysis, consider themselves full of ingenuity and ideas. Often involved in comp sci, systems analysis, design.
ESFP
Performer
Number one in fun and enthusiasm. Always invite ESFPs to your party. The most generous of all types. Warm, friendly, vibrant people. Excellent at customer service.
ISFP
Composer
Quietly harmonious with world. Very observing, benevolent. Inclined toward work with people in need. Work to solve problems of the immediate such as homeless, stopping hunger.
ISTP
Operator
Ready to try anything once. Flushed with the rush of life. Seek excitement. A love of tools and the utility they offer. Inclined toward mechanical devices, can take apart & reassemble anything.
ESTP
Promoter
Excitement seekers. Never feel more alive than when taking risks. Great negotiators on the front end. Excellent persuasive & entrepreneurial capabilities if someone else follows through.
ESFJ
Provider
Hosts & hostesses. Graciousness of this type makes them excellent at entertaining, coordinating. May be teachers, nurses. Very conscious of appearances, should/shouldn'ts.
ISFJ
Protector
A high sense of duty. Upholders of family tradition. Often found in traditional helping professions including nursing, elementary education, etc.
ISTJ
Inspector
Doers of what should be done. Masters at completing practical details and adding finishing touches. Get-it-done people. Superb administrators. Duty bound & obligated, often military.
ESTJ
Supervisor
Administrators, workers, pillars of strength in community. Loyal mates, parents, employees. Often promoted to management positions. Dependable, consistent, straightforward.

5. Situational Judgment Tests (SJTs)

- Present job-related scenarios and ask how the candidate would respond.
  Used heavily in: Banking, corporate graduate programs, HR trainee programs.

Situational judgment tests

observer checks off and scores the approach used.

Situational Judgment Tests

Situational judgment tests are personnel tests "designed to assess an applicant's judgment regarding a situation encountered in the workplace."[75] For example:

You are a sales associate at Best Buy in Miami, Florida. The store sells electronics, including smart phones. Competition comes from other neighborhood retailers, and from online firms. Many customers who come to your store check the product with you, and then buy it on Amazon. As a sales associate, you are responsible for providing exceptional customer service, demonstrating product knowledge, and maximizing sales. You get a weekly salary, with no sales incentive. How would you respond to this situation?

- "designed to assess an applicant's judgment regarding a situation encountered in the workplace."

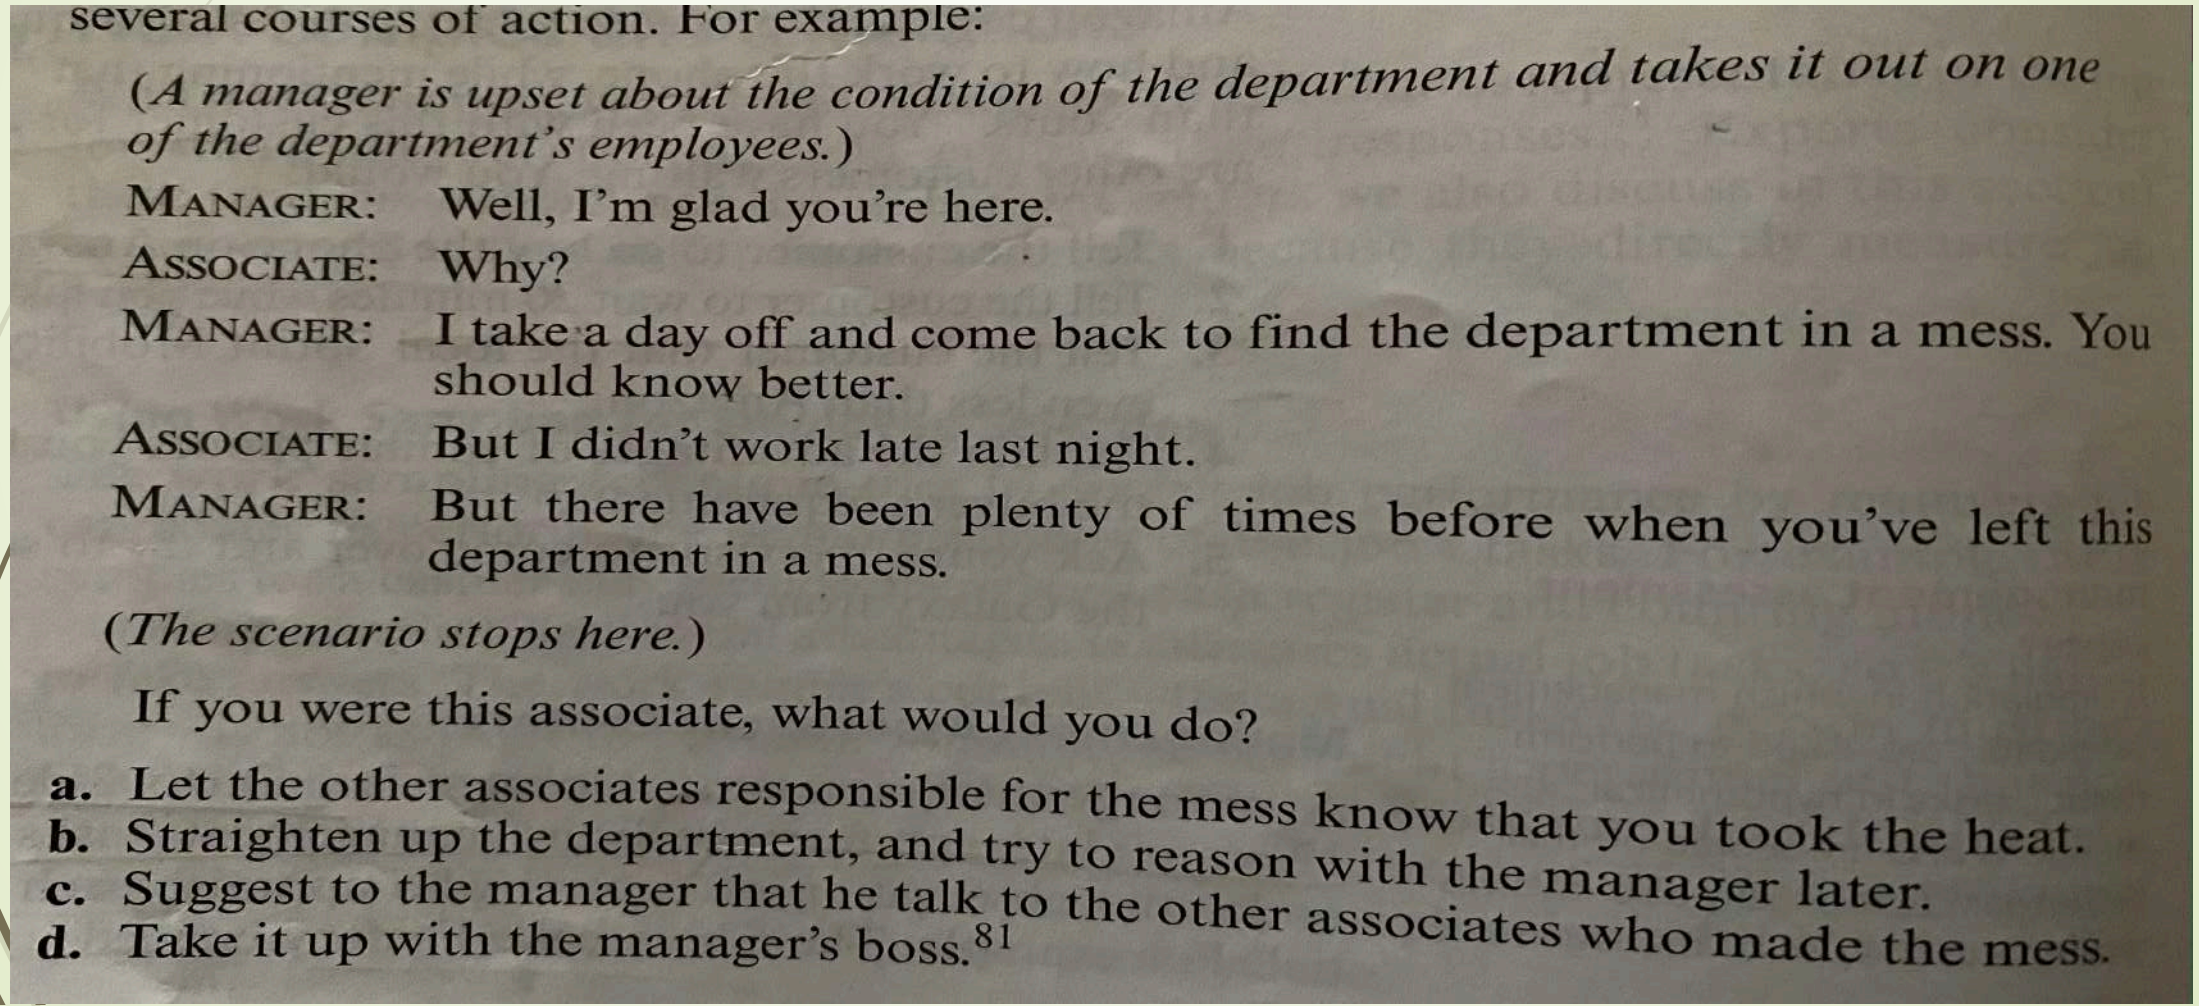

Situation:

A customer comes to you with a printout for a Samsung Galaxy phone from Amazon.com, and proceeds to ask you detailed questions about battery life, and how to work the phone, while mentioning that "Amazon's price is $50 less than yours." You have been with this customer for almost an hour, and there are other customers waiting. You would:

1. Tell the customer to go buy the phone on Amazon.
2. Tell the customer to wait 20 minutes while you take care of another customer.
3. Tell the customer that the local Sprint Mobility dealer has the phone for even less than Amazon.
4. Explain the advantages of similar phones you have that may better fulfill the buyer's requirements.
5. Ask your supervisor to come over and try to sell the customer on buying the Galaxy from you.

Video-Based Situational Testing

presents the candidate with several online, or computer video situations, each followed by one or more multiple-choice questions.

several courses of action. For example:

(A manager is upset about the condition of the department and takes it out on one of the department's employees.)

MANAGER: Well, I'm glad you're here.

ASSOCIATE: Why?

MANAGER: I take a day off and come back to find the department in a mess. You should know better.

ASSOCIATE: But I didn't work late last night.

MANAGER: But there have been plenty of times before when you've left this department in a mess.

(The scenario stops here.)

If you were this associate, what would you do?

a. Let the other associates responsible for the mess know that you took the heat.
b. Straighten up the department, and try to reason with the manager later.
c. Suggest to the manager that he talk to the other associates who made the mess.
d. Take it up with the manager's boss.[81]

6. Job Knowledge Tests

- Assess knowledge required **before entering** the job.
  Example: Sales applicants tested on product or industry knowledge.

Job Knowledge Test vs. Technical / Job-Specific Skills Test

Aspect	Job Knowledge Test	Technical / Job-Specific Skills Test
Focus	Measures what candidates **know** about the job	Measures what candidates **can do** in the job
Type	**Theoretical / Conceptual**	**Practical / Performance-based**
Purpose	Assess understanding of **principles, rules, or processes**	Assess ability to **apply skills and perform tasks**
Example Question / Task	"Explain sales techniques or market trends."	"Deliver a mock sales pitch or code a short program."
Used For	Roles needing **pre-existing professional knowledge**	Roles requiring **hands-on technical proficiency**

Job Knowledge Tests – Company Examples

Company / Sector	Type of Knowledge Tested	Example of Assessment
Pfizer	Product and industry knowledge	Candidates answer scenario-based questions about **drug benefits, dosage, and competitor positioning**.
Hilton IBM	IT systems and troubleshooting	Applicants solve **gmini audit cases** or **tax compliance quizzes** simulating client work.
Deloitte.Ealors	Accounting and compliance knowledge knowledge	Applicants solve **mini audit cases** or **tax compliance quizzes** simulating client work.

7. Work Samples / Realistic Job Simulations

FIGURE 6-7 Example of a Work Sampling Question

Note: This is one step in installing pulleys and belts.

Checks key before installing against:

—shaft	score 3
—pulley	score 2
—neither	score 1

Note: This is one step in installing pulleys and belts.

Employers such as Honda first train and then have applicants perform several of the job tasks, and then evaluate the candidates before hiring them.

Bi Shanghong/Xinhua Press/Corbis

8. Emotional Intelligence (EQ) Tests

- Assess an individual's ability to **understand, manage, and use emotions effectively** — both personally and in interactions with others.
  Key dimensions include:
- **Self-awareness** (knowing one's emotions)
- **Self-regulation** (controlling impulses and stress)
- **Empathy** (understanding others' feelings)
- **Social skills** (communication, teamwork, conflict management)

- **MSCEIT (Mayer–Salovey–Caruso Emotional Intelligence Test) – measures ability-based EQ (perceiving, using, understanding, and managing emotions).**

- **TalentSmart EQ Assessment – widely used in corporate training and leadership development.**

Emotional Intelligence (EQ) Tests – Company Examples

Company	Use of EQ Testing	Purpose
Google	Assesses empathy and collaboration in leadership interviews	Build psychologically safe, high-performing teams
Johnson & Johnson	Includes EQ in leadership programs	Develop emotionally aware, inspiring leaders
Starbucks	Uses EQ-based hiring and training	Enhance customer empathy and service quality
Cleveland Clinic	Trains healthcare staff in EQ skills	Improve patient communication and teamwork

9. Integrity Tests

- Assess a candidate's **honesty, dependability, and ethical behavior** — predicting tendencies toward **theft, rule violations, or counterproductive work behaviors**.

- **Types:**
- **Overt Integrity Tests:** Directly ask about attitudes toward dishonesty (e.g., "Is it ever okay to take office supplies home?").
- **Personality-Oriented (Veiled) Integrity Tests:** Indirectly measure traits such as **conscientiousness, reliability, and rule compliance**.

USING WORK SAMPLING FOR EMPLOYEE SELECTION

Management Assessment Centers

- 2-to 3-day simulation in which candidates perform realistic management tasks under the observation of experts who appraise each candidate's leadership potential.

- Typical simulated tasks include: The in-basket (gets reports, memos, notes of incoming phones, , emails), Leaderless group discussion, Management games, Individual oral presentations, Testing, and the interview.

The Toyota Way

Step 1: an in-depth online application (20–30 minutes)

Step 2: a 2–5-hour computer-based assessment

Step 3: a 6–8-hour work simulation assessment

Step 4: a face-to-face interview

Step 5: a background check, drug screen, and medical check

Step 6: job offer

Copyright © 2017 Pearson Education, Ltd.

TABLE 6–2 Evaluation of Assessment Methods on Four Key Criteria

Assessment Method	Validity	Adverse Impact	Costs (Develop/ Administer)	Applicant Reactions
Cognitive ability tests	High	High (against minorities)	Low/low	Somewhat favorable
Job knowledge test	High	High (against minorities)	Low/low	More favorable
Personality tests	Low to moderate	Low	Low/low	Less favorable
Biographical data inventories	Moderate	Low to high for different types	High/low	Less favorable
Integrity tests	Moderate to high	Low	Low/low	Less favorable
Structured interviews	High	Low	High/high	More favorable
Physical fitness tests	Moderate to high	High (against females and older workers)	High/high	More favorable
Situational judgment tests	Moderate	Moderate (against minorities)	High/low	More favorable
Work samples	High	Low	High/high	More favorable
Assessment centers	Moderate to high	Low to moderate, depending on exercise	High/high	More favorable
Physical ability tests	Moderate to high	High (against females and older workers)	High/high	More favorable

Note: There was limited research evidence available on applicant reactions to situational judgment tests and physical ability tests. However, because these tests tend to appear very relevant to the job, it is likely that applicant reactions to them would be favorable.

Copyright © 2011 Pearson Education

Background Investigations and Other Selection Method

Testing is only part of an employer's selection process.

Other tools may include **background investigations and reference checks, pre-employment information services, honesty testing, and substance abuse screening.**

How to Check a Candidates Background?

- Verifying an applicant's current (or former) position and salary with his or her current (or former) employer by phone

- Calling the applicant's current and previous supervisors to try to discover more about the person's motivation, technical competence, and ability to work with others (although, again, many employers have policies against providing such information).

- Getting background reports from commercial credit rating companies for information about credit standing, indebtedness, reputation, character, and lifestyle.

- Checking social network sites

Digital Tools - Background Checks

- New LinkedIn premium service “Reference Search”
- Review your Facebook or other social media site. How do you think a prospective employer would react to what you’ve had posted there?

Using Pre-employment Information Services

It is easy to have employment screening services check out applicants.

Providers use databases to access information about matters such as **workers' compensation, credit histories, and conviction and driving records**

However

https://info.smartrecruiters.com/content/basics-job-applicant-pre-employment-screening

Making the Background Check More Valuable

Making the Background Check More Valuable

- Include on the application form a statement for applicants to **sign explicitly authorizing a background and credit check**
- **Telephone references** tend to produce more candid assessments.
- Persistence and attentiveness to **possible red flags** improve results.
- **Compare the application to the résumé**; people tend to be more creative on their résumés than on their application forms, where they must certify the information.
- Try to **ask open-ended questions** to get the references to talk more about the candidate.
- But in asking for information: Only ask for and obtain information that you're going to use; remember that using arrest information is highly problematical; **use information that is specific and job related; and keep information confidential**
- Ask the references supplied by the applicant to suggest **other references**. You might ask each of the applicant's references,

Drug Screening Options

Quest Diagnostics™

LAB-BASED DRUG TESTING

Perfect for low-cost lab results, with many test options.

- 1,350+ Locations (*primarily near health care facilities*)
- 5- and 10-Panel Tests
- DOT 7-Panel

eScreen

INSTANT LAB TESTING

Quick results on target drugs for fast hiring decisions.

- 2,750+ Locations (*primarily near business centers*)
- 5-Panel Instant Test
- Negative results typically available in 15 minutes

MANUAL COLLECTION DRUG TESTING

Instant, on-site results. A wide variety of tests available, including 5, 6, 7, 8, 10, and 12-Panel.

Smart recruiters and Gameloft

- https://www.smartrecruiters.com/about-us/customers/
- Which aspect of HRM do you observe in this conversation? What does she talk about?

Know Your Employment Law: *Testing and Equal Employment Opportunity*

(1) You must be able to prove that your tests are related to success or failure on the job, and

(2) You must prove that your tests don't unfairly discriminate

Test Taker's Individual Rights and Test Security

- **Test takers have rights such as:**
- ● To the confidentiality of test results.
- ● To informed consent regarding use of these results.
- ● To expect that only people qualified to interpret the scores will have access to them, or that sufficient information will accompany the scores to ensure their appropriate interpretation.
- ● To expect the test is fair. For example, no test taker should have prior access to the questions or answers.

Testing for Assignments Abroad

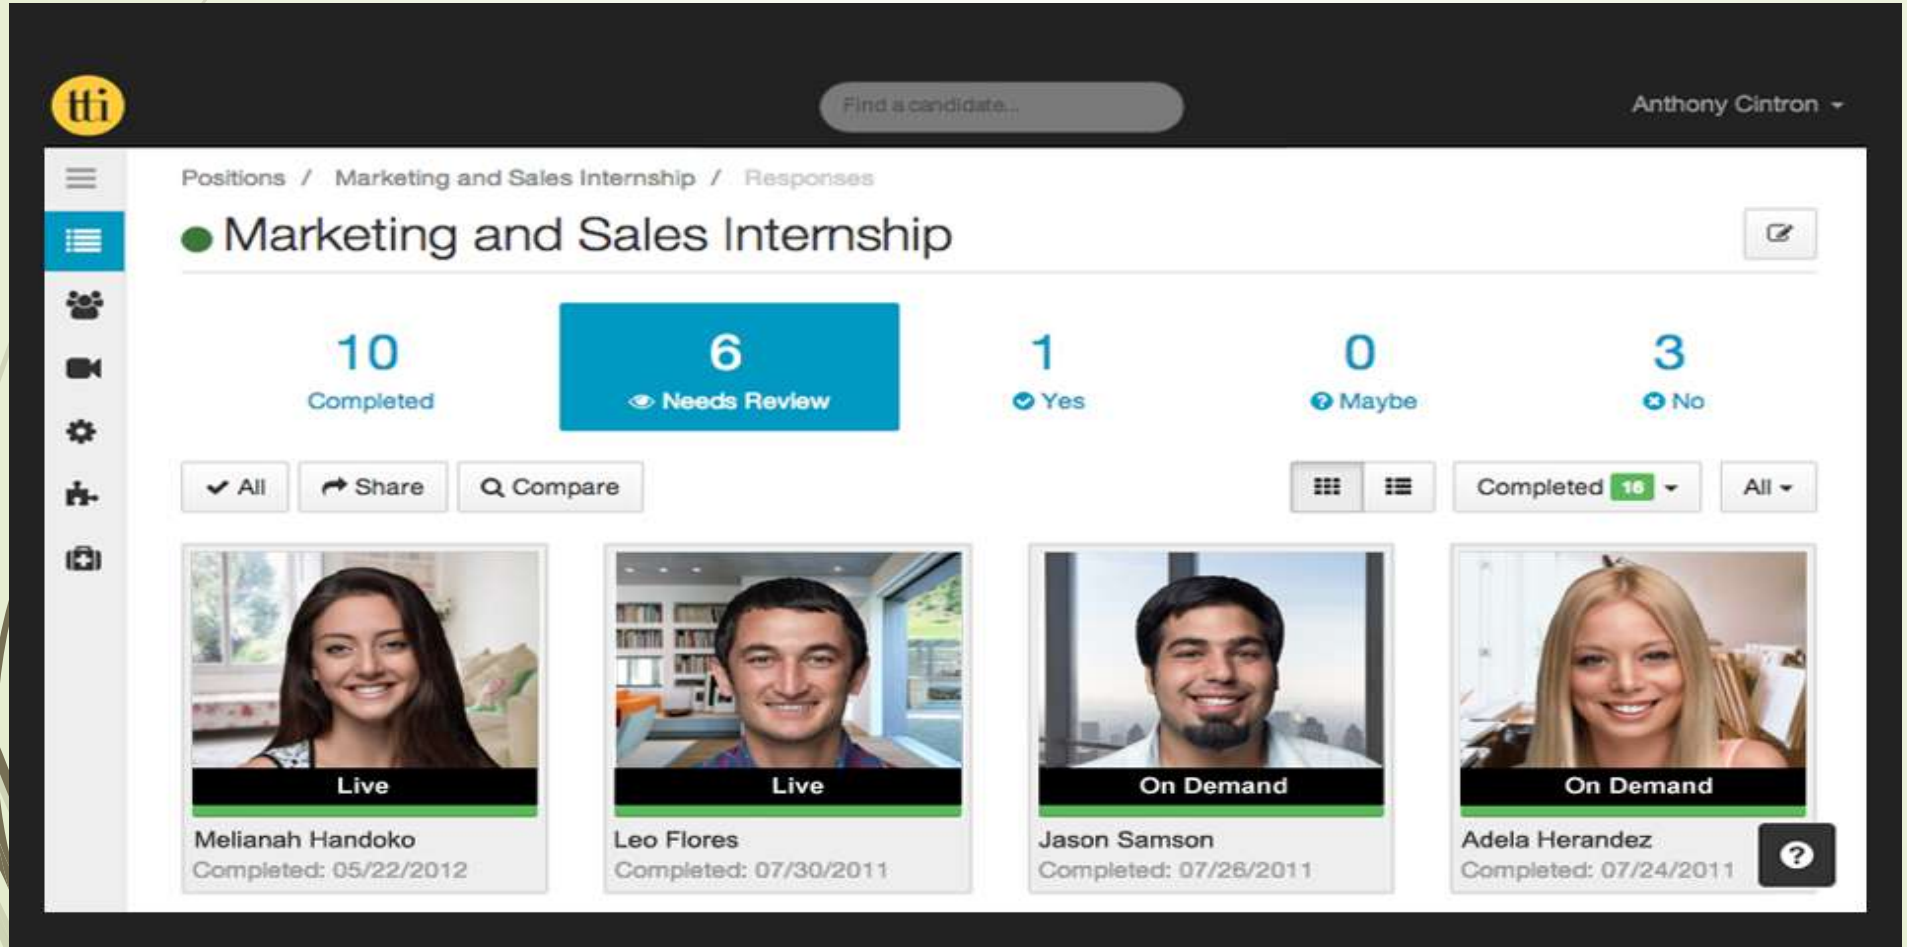

- Employers often use special inventories such as the **Global Competencies Inventory (GCI)** here.

- It focuses on three aspects of adaptability.
- ✓The Perception Management Factor assesses people's tendency to be rigid in their view of cultural differences, to be judgmental about those differences, and to deal with complexity and uncertainty.
- ✓ The Relationship Management Factor assesses a person's awareness of the impact he or she is having on others.
- ✓The Self-Management Factor assesses one's mental and emotional health

USING TESTS TO CUT COST AND BOOST PROFITS

- Outback Steakhouse has used pre-employment tests almost from when the company started. The testing seems successful. While annual turnover rates for hourly employees may reach 200% in the restaurant industry, Outback's turnover ranges from 40% to 60%.
- Outback wants employees who are highly social, meticulous, sympathetic, and adaptable.
- They use a personality assessment test to screen out applicants who don't fit the Outback culture. This test is part of a three-step pre-employment screening process. Applicants take the test, and managers then compare the candidates' results to the profile for Outback Steakhouse employees.
- Those who score low on certain traits (like compassion) don't move to the next step. Those who score high are interviewed by two managers, who ask behavioral questions such as "What would you do if a customer asked for a dish we don't have?"■

Video interviews

7 Interviewing Candidates

Copyright © 2017 Pearson Education, Ltd.

Basic Types of Interviews

Can be classified according to:

1. **Structure**
2. **Content**
3. **Administration**
4. **Pros & Cons**

Basic Types of Interviews

- Structured vs. Unstructured Interviews
- Questions to ask
  - Situational
  - Behavioral
  - Job-related
  - Stress
  - Puzzle questions

Urban Outfitters

Urban Outfitters switched to **HireVue on-demand interviews in its 200 retail stores**. The HireVue system enabled applicants to watch videos about Urban Outfitters and the job, and then to respond in writing and by video to Urban's interview questions and instructions, at their leisure, "on demand."

The hiring managers then reviewed the recorded interviews, usually outside of peak business hours when the stores weren't as busy. The new system reportedly has been a boon to Urban Outfitters. It reduced screening time by 80%, lets store managers process many more applicants, and is preferred by applicants, 90% of whom can do their interviews after hours. The HireVue system also supports Urban Outfitters' strategy. As it says, "Moving to digital interviewing has transformed our hiring process into a true reflection of the Urban Outfitters culture. Our value in creativity and community and our nonconformist approach now begins with our candidate experience. No other initiative has impacted our hiring teams like digital recruiting has."

Discussion: You have to hire dozens of wait staff every year for a new restaurant on Miami Beach. Explain how you would use a HireVue interview, including questions and tasks for candidates.

- https://www.youtube.com/watch?v=8LwveoDO_M8 !!!

Avoiding Errors That Can Undermine an Interview's Usefulness

1. Use Structure Interviews
2. Know What to Ask
3. Avoid the Common Interviewing Errors

Copyright © 2017 Pearson Education, Ltd.

Avoiding Errors That Can Undermine an Interview's Usefulness continued

- **First Impression (Snap Judgments)**
- **Not Clarifying What the Job Requires**
- **Candidate-Order (Contrast) Error and Pressure to Hire**

Copyright © 2017 Pearson Education, Ltd.

Avoiding Errors That Can Undermine an Interview's Usefulness continued

- **Nonverbal Behavior and Impression Management**

- **Effect of Personal Characteristics: Attractiveness, Gender, Race**

Copyright © 2017 Pearson Education, Ltd.

Selection Practices Abroad

- One study focused on Bangladesh. Traditional selection practices there are different from what one might expect in the United States. For example, "age is considered synonymous to wisdom." Therefore, job advertisements for mid- and senior-level positions often set a minimum age as a selection criteria

- **You are interviewing candidates in Bangladesh and you have a great candidate who unfortunately is 25 years old, when the job calls for someone at least 40. List three interview questions you would ask to see if the person is still qualified.**

Application Case

Selection Process at FC Barcelona (FCB)

FC Barcelona's commitment is epitomized in their slogan "more than a club". Reigning over most football teams in social media platforms, the club has around 96 million followers on Twitter and Facebook. FCB has an estimated worth of $3.16 billion, second only to rivals Real Madrid in the list of most valuable teams in the world[1].

Apart from how they play the game and their 14 championships (out of a possible 19), the club's focus on its extensive youth academy, La Masia, from which it draws much of its talent, is unique. FCB also organizes football (soccer) camps all over the world, including one in Boston, USA, which offers children, ages 6 to16, the opportunity to experience specialized training. In 2015, two players from the camp will be selected for the 2016 Easter FCB Escola, an official tournament which will be held in Barcelona.

Recruiting Players and Talent Management

The registration process starts during summer and prospective players are directed to the official registration page. Interested candidates are encouraged to pre-register to indicate their interest in the club. This is followed by FCB's technical team assessing the players who will attend the summer programs and try-outs.

Before July 31, the club will communicate the names of the players invited to join the FCB Escola Academy through a personal e-mail to each registered member. Each player selected will have a personal access code enabling them to proceed to the next step. After this selection, the FCB's permanent academy officially starts its activities by September.

Questions

6-10. Visit FC Barcelona's (or a similar club's) official Web site and discuss the selection criteria used for selecting team players.

6-11. Several types of selection tests are discussed in the chapter. Do you think these are applicable to a sports club like FCB? Discuss using relevant examples.

Sources: Mike Ozanian, "Real Madrid Tops Ranking of The World's Most Valuable Soccer Teams," Forbes, May 6, 2015, www.forbes.com.; "Player Selection Process and Registration for the FC Barcelona Escola Vancouver," http://fcbescola.fcbarcelona.com/, July 16, 2015.

Continuing Case

Carter Cleaning Company

Honesty Testing

Jennifer Carter, of the Carter Cleaning Centers, and her father have what the latter describes as an easy but hard job when it comes to screening job applicants. It is easy because for two important jobs—the people who actually do the pressing and those who do the cleaning/spotting—the applicants are easily screened with about 20 minutes of on-the-job testing. As with typists, Jennifer points out, "Applicants either know how to press clothes fast or how to use cleaning chemicals and machines, or they don't, and we find out very quickly by just trying them out on the job." On the other hand, applicant screening for the stores can also be frustratingly hard because of the nature of some of the other qualities that Jennifer would like to screen for. Two of the most critical problems facing her company are employee turnover and employee honesty. Jennifer and her father sorely need to implement practices that will reduce the rate of employee turnover. If there is a way to do this through employee testing and screening techniques, Jennifer would like to know about it because of the management time and money that are now being wasted by the never-ending need to recruit and hire new employees. Of even greater concern to Jennifer and her father is the need to institute new practices to screen out those employees who may be predisposed to steal from the company.

Employee theft is an enormous problem for the Carter Clean-Centers, and not just cash. For example, the cleaner/spotter opens the store without a manager present, to get the day's work ted, and it is not unusual for that person to "run a route." Running oute means that an employee canvasses his or her neighborhood pick up people's clothes for cleaning and then secretly cleans and sses them in the Carter store, using the company's supplies, gas, l power. It would also not be unusual for an unsupervised person his or her supervisor, for that matter) to accept a 1-hour rush order cleaning or laundering, quickly clean and press the item, and return o the customer for payment without making out a proper ticket for e item posting the sale. The money, of course, goes into the worker's cket instead of into the cash register.

The more serious problem concerns the store manager and the unter workers who actually handle the cash. According to Jack Carter, You would not believe the creativity employees use to get around the anagement controls we set up to cut down on employee theft." As ne extreme example of this felonious creativity, Jack tells the following tory: "To cut down on the amount of money my employees were steal-ng, I had a small sign painted and placed in front of all our cash registers. he sign said: YOUR ENTIRE ORDER FREE IF WE DON'T GIVE YOU A CASH REGISTER RECEIPT WHEN YOU PAY. CALL 552–0235. It was my ntention with this sign to force all our cash-handling employees to give receipts so the cash register would record them for my accountants. After comes in is recorded in the cash register, then we should have a much better handle on stealing in our stores. Well, one of our managers found a way around this. I came into the store one night and noticed that the cash register this particular manager was using just didn't look right, although the sign was placed in front of it. It turned out that every afternoon at about 5:00 p.m. when the other employees left, this character would pull his own cash register out of a box that he hid underneath our supplies. Customers coming in would notice the sign and, of course, the fact that he was meticulous in ringing up every sale. But unknown to them, for about 5 months the sales that came in for about an hour every day went into his cash register, not mine. It took us that long to figure out where our cash for that store was going."

Here is what Jennifer would like you to answer:

Questions

6-12. What would be the advantages and disadvantages to Jennifer's company of routinely administering honesty tests to all its employees?

6-13. Specifically, what other screening techniques could the company use to screen out theft-prone and turnover-prone employees, and how exactly could these be used?

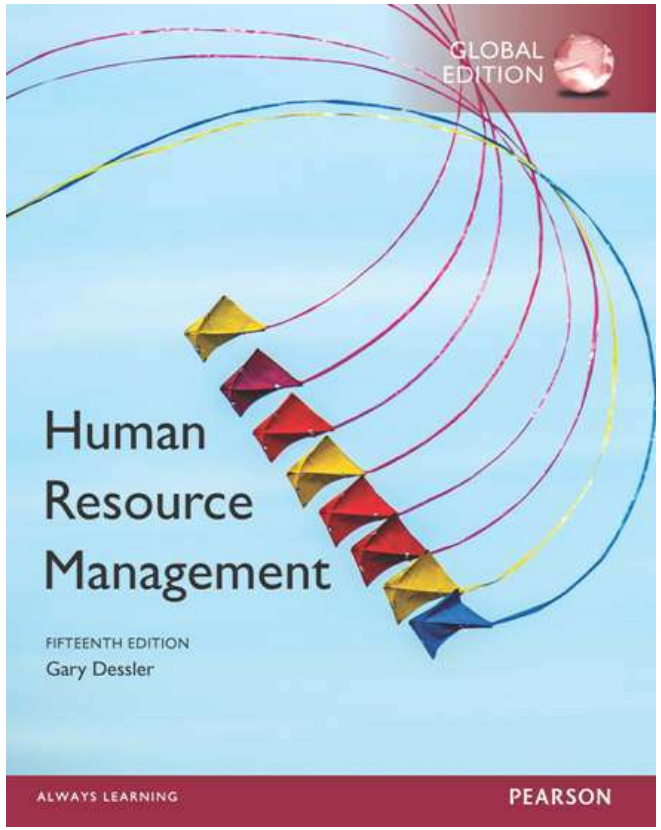

6-14. How should her company terminate employees caught stealing, and what kind of procedure should be set up for handling reference calls about these employees when they go to other companies looking for jobs?

Effectiveness in recruiting candidates.

- 1) Workforce planning and forecasting,
- 2) Importance of effective recruitment
- 3) Recruiting job candidates (internal and outside sources of candidates, recruiting more diverse workforce)
- 4) Developing and using application forms.

- **Personnel Planning and Recruiting**

Learning Objectives

What are the techniques used in employment planning and forecasting?

What might be the examples for the need for effective recruiting?

What are the main internal and outside sources of candidates?

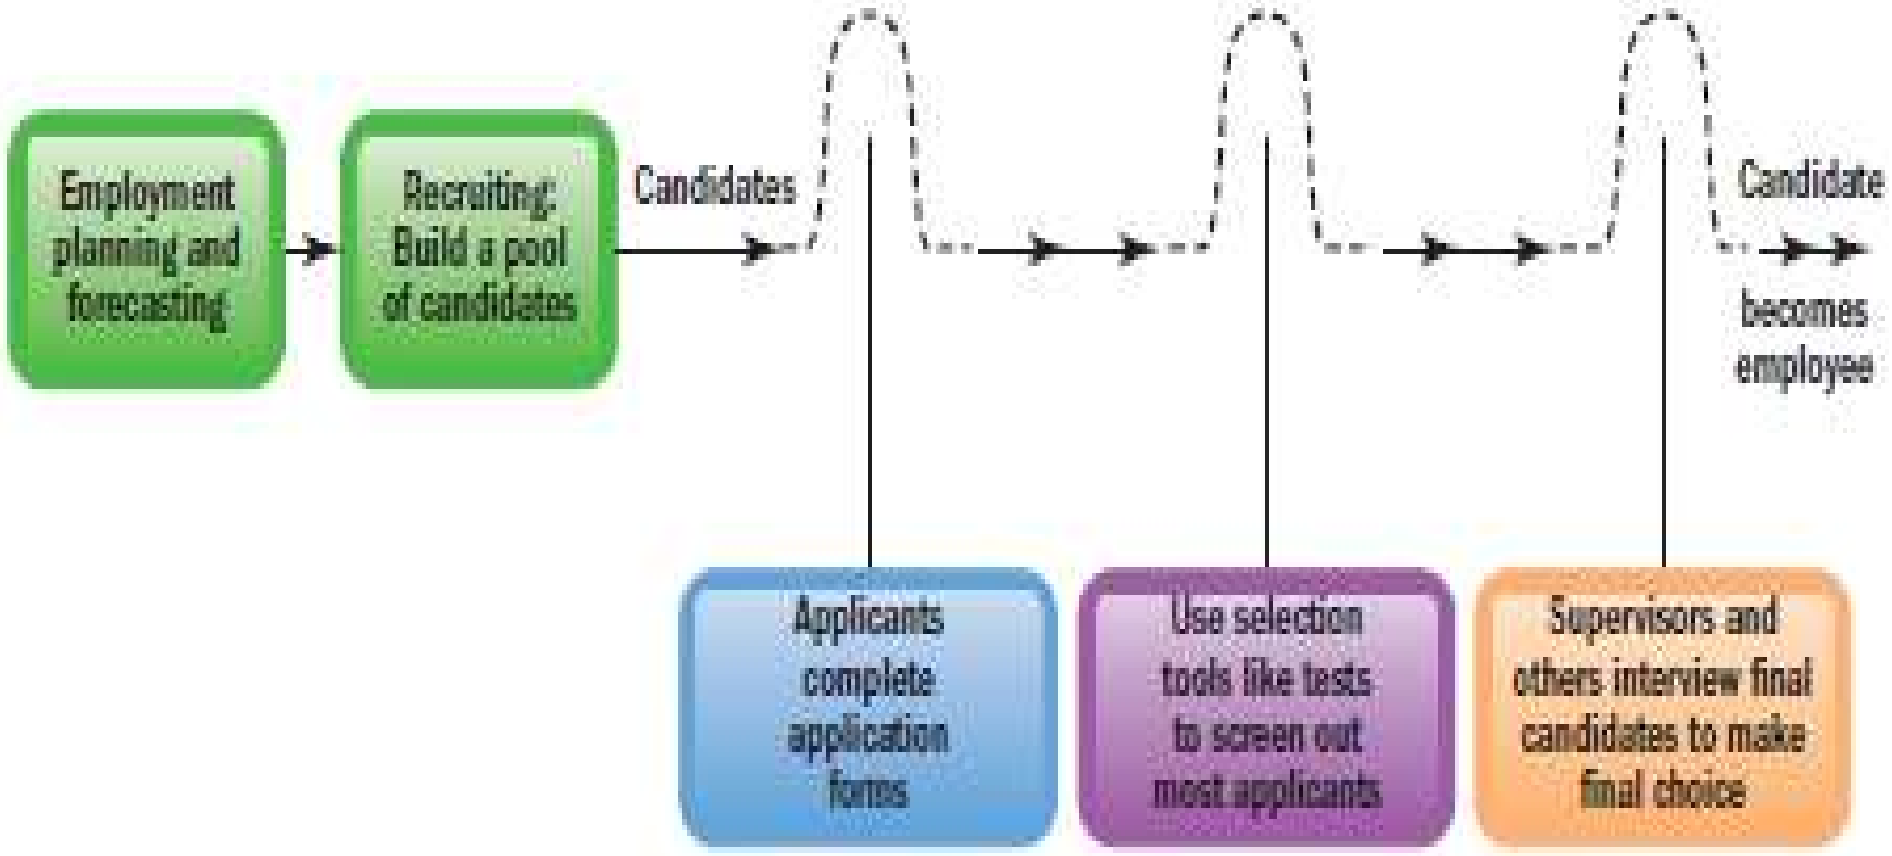

How workforce planning method might be used to improve employee engagement?

How to recruit a more diverse workforce?

Copyright © 2017 Pearson Education, Ltd.

Introduction

FIGURE 5-1 Steps in Recruitment and Selection Process

The recruitment and selection process is a series of hurdles aimed at selecting the best candidate for the job.

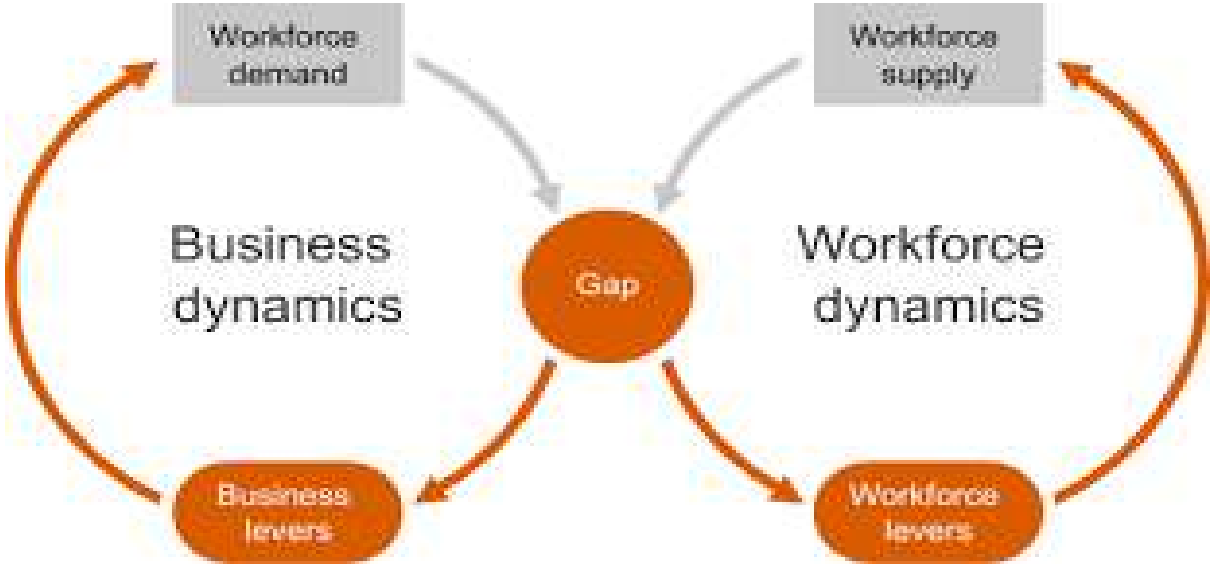

1- Workforce Planning and Forecasting

is the process of deciding what positions the firm will have to fill, how to fill them and when.

How to forecast workforce needs?

Strategy and Workforce Planning: Workforce plans should flow from the firm`s strategic plans and will be affected by the need to fill or eliminate positions or increase cost

Predictive Workforce Monitoring:

Most employers review their workforce plans every year or so, but this isn't always sufficient.

Workforce planning therefore often involves *paying continuous attention* to workforce planning issues.

How to forecast workforce needs?

- **1-understand organizational strategy, objectives and plans**

- E.g. If management expects production to increase by 50% in manufacturing, then typically there would need to be an increase in workforce or a plan about using more robotics, which may decrease workforce to meet the demand. However, without this information, the accuracy of the plan will not be accurate.
- **--- shift to digital transformation : CarrefourSA invests in e-commerce → hires data analysts & warehouse automation staff.**
- Top-down or bottom-up approach (e.g. engaging with departmental heads) ?

How to forecast workforce needs?

- **2.Analyze the Current Workforce**

What skills do our employees currently possess?	Helps identify **skill gaps**.
What are turnover, absenteeism & performance trends?	Predicts labor stability.
What percentage of the workforce is nearing retirement?	Signals future **internal talent shortages**.

Example:
Siemens monitors its aging engineering workforce → invests in **internship + graduate engineering programs** to avoid future talent gaps.

How to forecast workforce needs?

- **4- Evaluate External Factors** (e.g. industry trends, economic forecasts, technological advancements, and demographic shifts.)

Industry Trends	Whether demand in your industry is rising or falling.	**Hospitality & tourism** recovered post-COVID → **hotels increased hiring** again (Ibis, Hilton).
Economic Forecasts	Inflation, wage levels, unemployment, and consumer spending influence hiring.	**Inflation in Türkiye** increased labor costs → **retail chains adjusted wages** to retain store employees.
Technological Advancements	New tools, automation, and AI change skill needs.	**IKEA self-checkout** → fewer cashier staff but **more floor support staff**.
Demographic Shifts	Aging workforce, migration, youth population trends impact labor supply.	**Siemens & Ford Otosan** recruit aggressively in universities to replace **retiring engineers**.
Regulations & Laws	Employment laws, union agreements, work permit rules.	**Refugee work permit rules in Türkiye** affect **service & textile sector hiring**.

Utilising technology in Workforce Planning e.g.

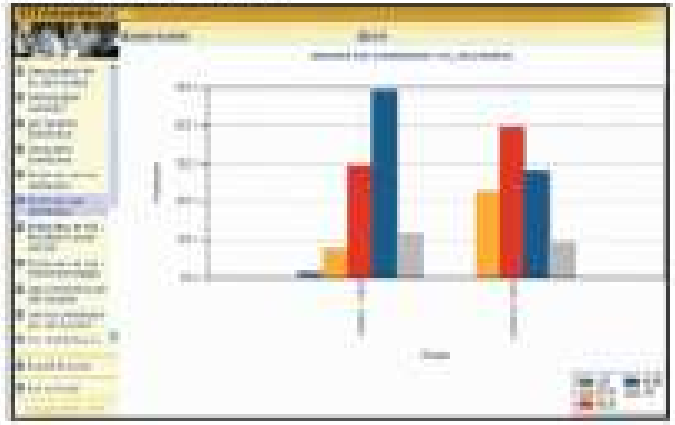

(Towers Watson MAPS)

Historical workforce trends and current one.
Dig into specific workforce issues on the fly, bringing evidence directly to leaders to support targeted action.

Spot trends easily and quickly with digital views of business-critical metrics and analysis of workforce dynamics.

The dashboards, which are part of Towers Watson's workforce planning Internet software, help clients manage the workforce planning process.

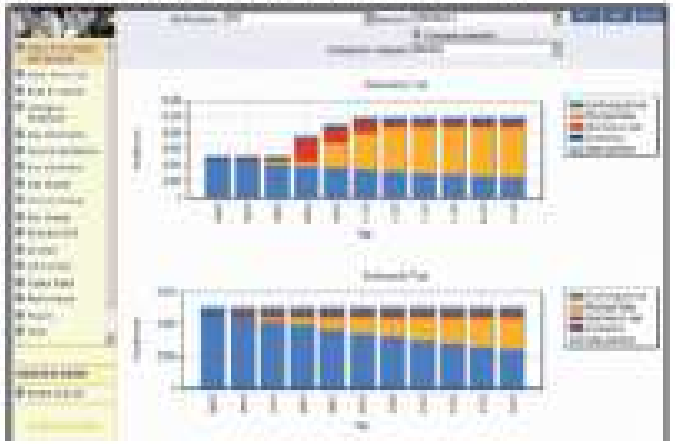

Workforce scan

Dashboards

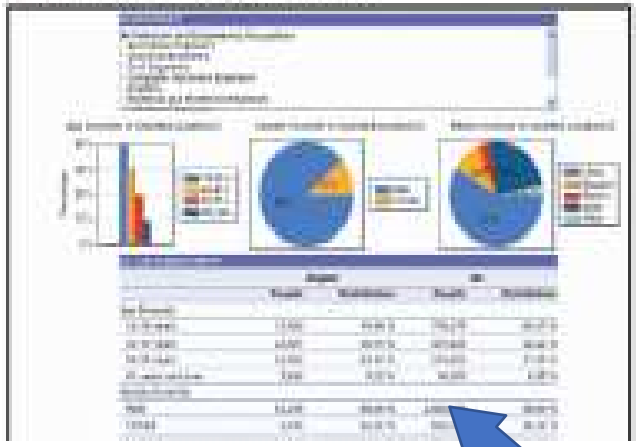

Workforce projection model

shows projected employment and skill levels given the "status quo"

External labour scan

Labour market trends, e.g. Unemployment rates, industry-specific labor trends, emerging skills, skill shortages, GenZ expectations

Improving Performance:

The Strategic Context: Four Seasons

Four Seasons builds its strategy around offering superior customer service, and that requires highly motivated and high-morale employees.

How can Four Seasons use its recruitment practices to encourage such motivation and morale?

----One way Four Seasons does this is **by filling hotel positions around the world with internal transfers**.

In one recent year, for instance, about 280 employees relocated from hotels in one country to another within the Four Seasons chain.

Employees love it. It gives them a chance for adventure and to see the world, while building a career with a great hotel chain. And it's great for Four Seasons too, because the resulting high morale and motivation supports Four Seasons' **strategic goal of superior customer service.**

In other words, Four Seasons **uses recruitment practices that produce the excellent service the chain needs to achieve its strategic goals.**

Can you think of any other benefits Four Seasons may derive from its policy of transferring employees among its hotels? What are they?

Talent Development and Skill Diversification

- Broadened Skill Sets:
- Leadership Development:
- Career Advancement

Improved Service Consistency

- Knowledge Sharing: best practices

Effective Resource Utilization

Flexible Staffing

Reduced Recruitment Costs

How to forecast workforce needs?

How past firm`s employment needs is helpful in predicting future needs?
E.g. Number of employees hired, turnover rates, and staffing levels, to identify trends.

determining future staff needs by using ratios between, for example, sales volume and number of employees needed

graphical method used to help identify the relationship between two variables

- Trend analysis involves spotting trends among the people in an organization.
- This could include things like employee turnover rates, skill levels, or demographics. By understanding these trends, HR can better predict future staffing needs and make informed decisions about hiring, training, and development.

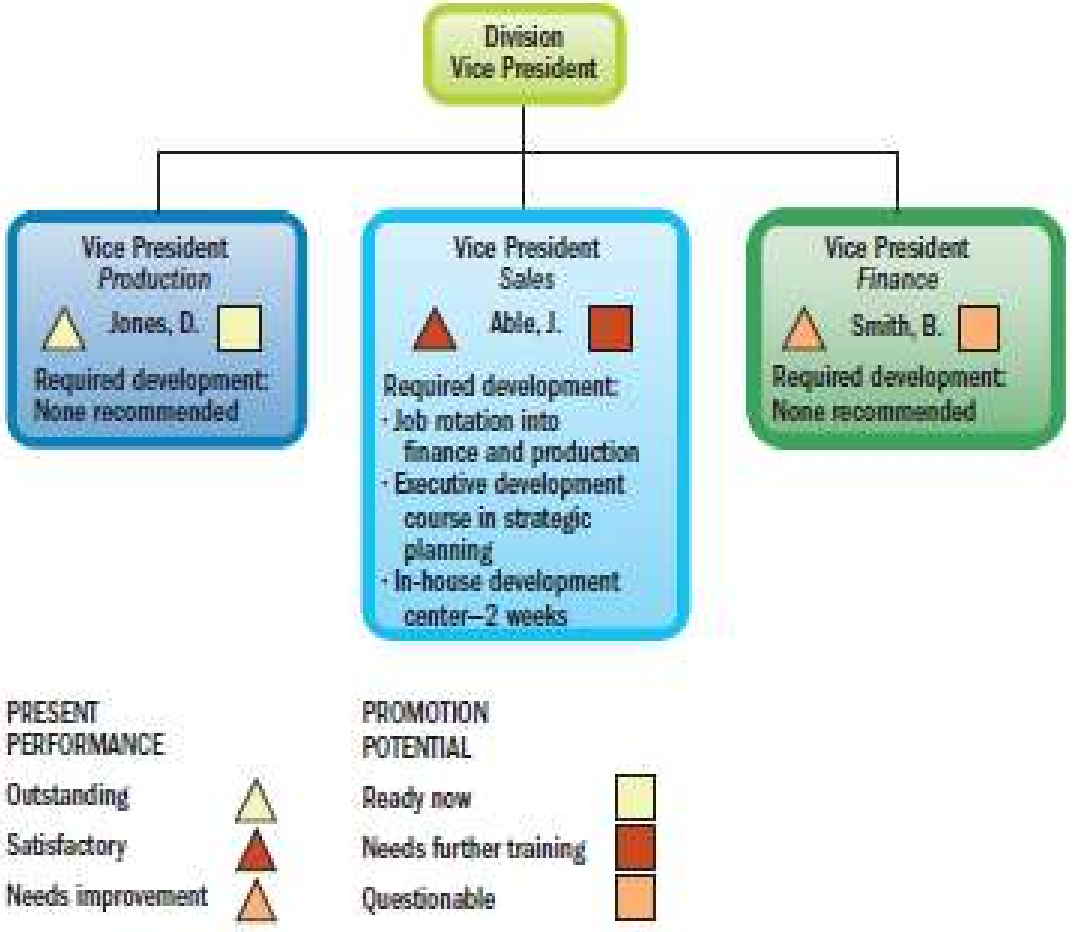

Ratio analysis examples

- Employee-to-Supervisor Ratio:
- Turnover Rate
- Productivity Ratios (revenue per employee or profit per employee)
- Training and Development Investment Ratio
- Diversity and Inclusion Ratios

Forecasting the Supply of Inside Candidates

1) Personnel Replacement Charts

2)Computerized skills inventories system

3) Markov Analysis

probabilities that employees in the chain of feeder positions for a key job

Example of a Markov Analysis Matrix

Current Position	Junior Engineer (JE)	Engineer (E)	Senior Engineer (SE)	Total
Junior Engineer (JE)	0.50	0.30	0.10	0.90
Engineer (E)	0.20	0.60	0.50	1.30
Senior Engineer (SE)	0.10	0.10	0.40	0.60
Total	0.80	1.00	1.00	2.80

Company	Where Used	Purpose
IBM	Promotion and internal mobility	Predict leadership pipeline needs
Deloitte	Consultant career pathway	Determine how many new graduates to hire
Amazon	Warehouse labor planning	Replace turnover and maintain productivity
Walmart	Store role progression	Plan training & reduce store-level turnover
Toyota / Ford	Skilled technician workforce	Forecast retirements & plan apprenticeships

(e.g., Junior → Mid → Senior → Manager).

(e.g**consultant career progression** (Analyst → Consultant → Manager → Senior Manager → Partner).

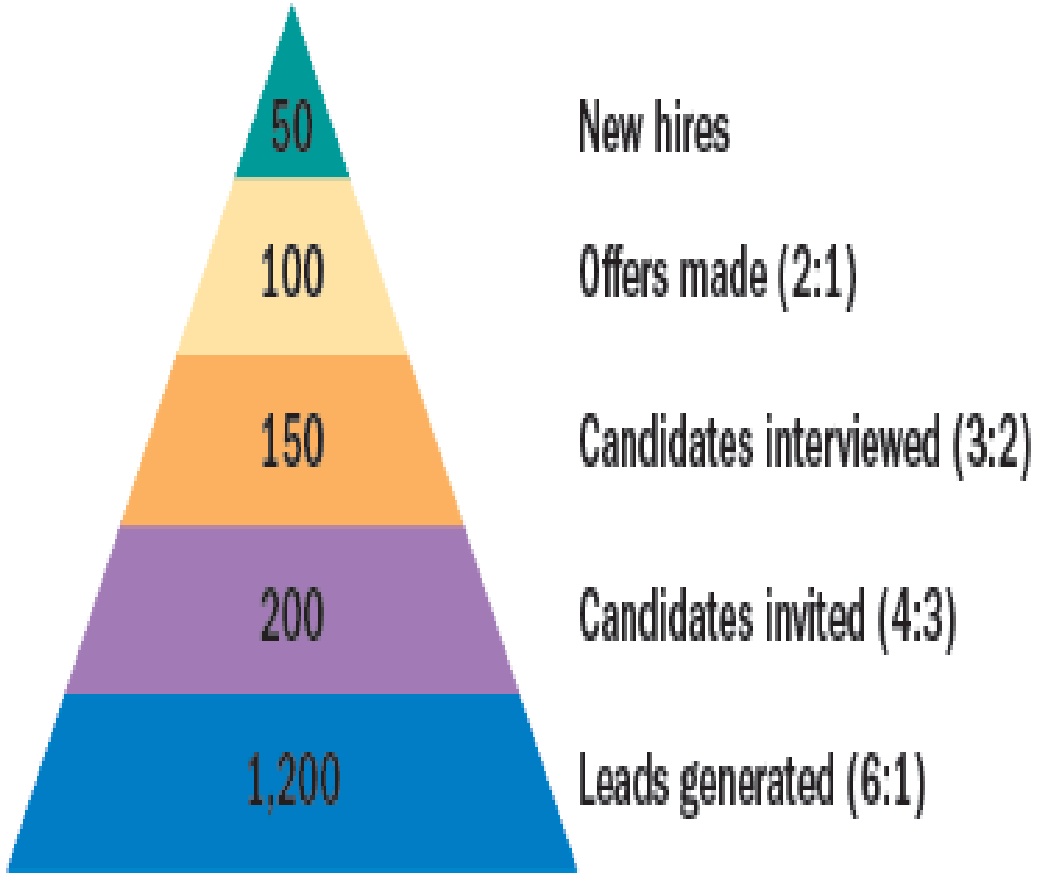

(e.g., New hire → Trainee → Full-capacity worker → Team lead).

2- Why Effective Recruiting Is Important

- The need for effective recruiting
- What makes recruiting a challenge?

FIGURE 5-5 Recruiting Yield Pyramid

The Recruiting Yield Pyramid

Know Your Employment Law

Recruiting Employees

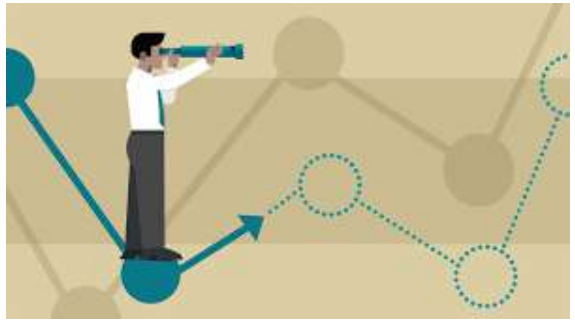

It is illegal for employers to conspire not to hire each other's employees.

Yet Apple and Google recently paid over $400 million to settle a claim alleging that they did just that.

In 2010, Google, Apple, Adobe Systems Inc, Intel, Intuit Inc and Walt Disney Co's Pixar unit agreed to a settlement of a U.S. Justice Department probe that bars them from agreeing to refrain from poaching each other's employees.

- no-poach agreements and the need for competitive hiring practices to foster a dynamic and fair employment landscape
- -top executives and skilled employees in Turkish Banking Sector
- companies like Turkcell and Vodafone have faced allegations of coordinating not to hire each other's technical staff.
- Tofaş and Ford Otosan, have occasionally been scrutinized for informal agreements regarding recruitment practices.
- Technology start-ups…

3-Promoting From Within or Hiring From Outside?

Promoting from within the company

Advantages

Faster Onboarding and Adaptation

Increased Employee Morale, Stronger Company Loyalty

Knowledge of Company Values and Goals

Cost Savings

Reduced Risk

Accelerated Skill Development

Improved Succession Planning

Disadvantages

Limited Fresh Perspectives

Stagnation of Skills

Nepotism and Favouritism

Skill Gaps

Missed Diversity and Inclusion Goals

Succession Planning Challenges

Overlooking External Talent

Hiring outside the company

Advantages

Fresh Perspectives

Diverse Skill Sets

Industry Best Practices

Reduced Internal Politics

Broad Networks

Disadvantages

Cultural Fit Challenges

Higher Recruitment Costs

Unknown Performance

Longer Onboarding

Lack of Loyalty

Failure to Recognize Internal Talent

Cultural Clashes

Legal and Regulatory Risks

Promoting from within the company

- **Procter & Gamble (P&G)**: P&G is known for its policy of promoting from within. The company has a robust leadership development program
- **IBM**: IBM emphasizes internal mobility, encouraging employees to explore different roles within the company.

- **Starbucks**: Starbucks often promotes baristas and shift supervisors to managerial positions.
- **Hilton Hotels:** Hilton has a strong culture of promoting from within, particularly in management roles.
- **Coca-Cola**: Coca-Cola places a strong emphasis on internal promotions

Internal Sources of Candidates

- Finding Internal Candidates
- Rehiring
- Succession planning
- How to announce?

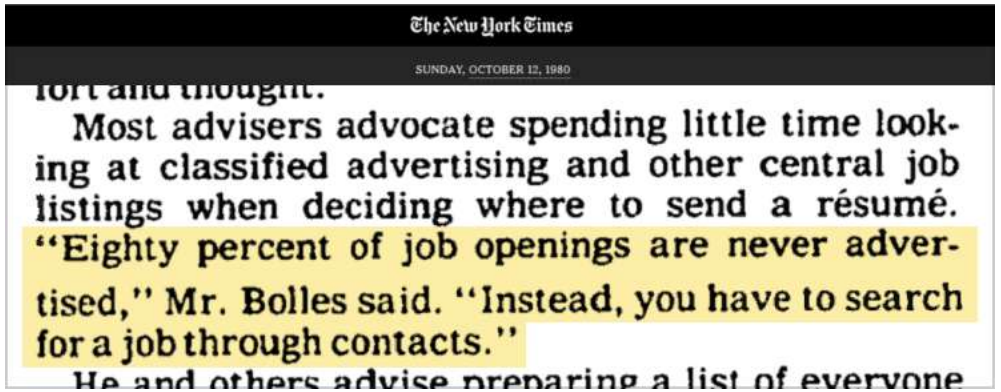

Succession Planning

Succession planning involves developing workforce plans for the company's top positions.

Ongoing process of systematically identifying, assessing, and developing organizational leadership to enhance performance.

Outside Sources of Candidates

Informal Recruiting and the Hidden Job Market

The New York Times

SUNDAY, OCTOBER 12, 1980

Most advisers advocate spending little time looking at classified advertising and other central job listings when deciding where to send a résumé. "Eighty percent of job openings are never advertised," Mr. Bolles said. "Instead, you have to search for a job through contacts."

- Job openings aren't publicized
- Jobs are created and become available when employers come across the right candidates

Why Employers Use the Hidden Job Market?

- Jobvite's 2024-2025 Job Seeker Nation Survey reports

Job Information Source	% of Job Seekers	What It Means
Traditional job boards & company career pages	**Still the most common application channel**	People apply widely, competition is high.
Employee referrals / friends	**~50%**	Informal networks are *still the strongest job lead source*.
Professional networks (LinkedIn, alumni, industry circles)	**~37%**	Networking shapes access to better-quality opportunities.
Social media (LinkedIn, Instagram, TikTok, X)	**~35%**	Recruiting is becoming more personal and conversational.

Key Insight:

Even in 2024–2025, **a large share of job opportunities is accessed *outside* public job postings**.

What Has Changed in 2024–2025?

Trend	Impact
86% of workers are open to new opportunities, even if they like their job.	Companies focus more on *retaining* and *attracting* passive candidates.
Remote & flexible work expectations increased.	Employers search for talent beyond local job boards — more networking, more referrals.
Hiring difficulties remain high globally (~76% report talent shortages).	Firms activate employee networks, alumni circles, and professional communities.

Most jobs are not won by applying — they are accessed through *relationships.*
Learning to build professional networks is a key employability skill."

Why hidden job market?

- to avoid the lengthy and expensive process of open online applications
- choose alternatives such as hiring internally, using a recruiting firm or headhunters and relying on referrals from current employees.

And how potential employees access to hidden market?

- **Network traditionally.**
- **Say yes to invitations beyond traditional networking functions.**
- **Practice your elevator speech.**
- **Contact employers of interest.** (e.g. sending a letter of interest, dont wait for job openings)
- **Volunteer at companies of interest.**
- **Dig around at your own company.**
- **Subscribe to news alerts.** (Follow companies of interest on LinkedIn)

Recruiting via the Internet 2024-2025

Interactive Virtual Workplace Tours (e.g., Meta, Google, Deloitte)	Candidates explore culture online before applying.
One-Click Apply via LinkedIn / Indeed / Glassdoor	Applicants now use stored profiles to apply instantly.
Career Microsites + Landing Pages	Companies use job-specific landing pages optimized for mobile.
AI + Asynchronous Video Interviews (HireVue, SparkHire)	Candidates record answers once; hiring teams review anytime.
TikTok & Instagram Recruiting (e.g., Chipotle, Starbucks)	Employer brand and hiring now happen on *social video channels*.

Company	Platform	What They Do
Chipotle	TikTok	“A day in the life” employee videos to attract frontline workers.
Starbucks	Instagram Reels	Stores share workplace atmosphere + hiring announcements.
Google	YouTube Shorts	Employee career journeys + behind-the-scenes culture clips.
Trendyol (Turkey)	TikTok & Instagram	Team culture videos + internship and graduate program promotions.

Using Applicant Tracking System : **AI-assisted, integrated, and mobile-first**, not just a “storage and screening system

Applicant Tracking System (ATS)

An ATS is a digital platform used to collect, screen, rank, and manage job applicants throughout the recruitment process.

Today’s ATS platforms also:

Automatically scan and analyze CVs using AI (résumé parsing + keyword matching)

Rank candidates based on required skills and job fit

Integrate with LinkedIn, job boards, and social media

Automate candidate emails & interview scheduling

Provide analytics reports (time-to-hire, hiring source, DEI metrics)

Ensure legal compliance and data protection

Why ATS Is Even More Critical in 2024–2025 ?

Are You Our Next Key Player?

PLANT CONTROLLER — **Northern New Jersey**

Are you looking to make an impact? Can you be a strategic business partner and team player, versus a classic, "bean counter"? Our client, a growing Northern New Jersey manufacturer with two locations, needs a high-energy, self-initiating, technically competent Plant Controller. Your organizational skills and strong understanding of general, cost, and manufacturing accounting are a must. We are not looking for a delegator, this is a hands-on position. If you have a positive can-do attitude and have what it takes to drive our accounting function, read on!

Responsibilities and Qualifications:

- Monthly closings, management reporting, product costing, and annual budget.
- Accurate inventory valuations, year-end physical inventory, and internal controls.
- 4-year Accounting degree, with 5–8 years experience in a manufacturing environment.
- Must be proficient in Microsoft Excel and have general computer skills and aptitude.
- Must be analytical and technically competent, with the leadership ability to influence people, situations, and circumstances.

If you have what it takes to be our next key player, tell us in your cover letter, *"Beyond the beans, what is the role of a Plant Controller?"* **Only cover letters addressing that question will be considered. Please indicate your general salary requirements in your cover letter and email or fax your resume and cover letter to:**

Recruiting

Referrals and Walk-ins

Employee referral campaigns are a very important recruiting option. Here the employer posts announcements of openings and requests for referrals on its website, bulletin boards, and/or wallboards. It often offers prizes or cash awards for referrals that lead to hiring.

-----Google uses a structured referral program where employees submit referrals in the internal system. Referred candidates move through a fast-track review.

-------Trendyol runs "Refer a Friend" campaigns through internal Slack/Teams channels. Employees receive bonus payments if their referral is hired.

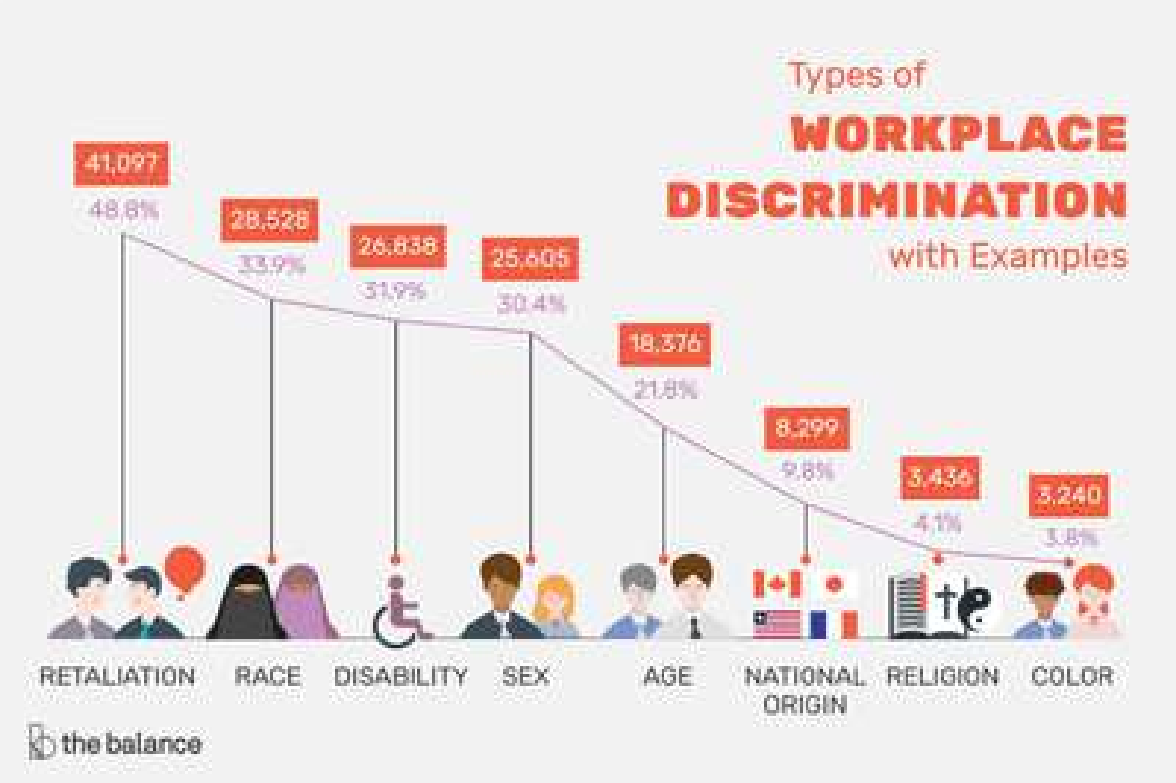

----Starbucks accept walk-in applicants with short on-site interviews.

On-Demand Recruiting Services ---Uber uses mobile-based quick-apply hiring for drivers/couriers. Candidates submit phone number + ID → hiring proceeds rapidly.

College Recruiting

- **Internships**

4-Recruiting more diverse workforce

- Single parents
- Older workers
- Minorities / Immigrant workers
- People with disabilities
- Refugees and displaced workers
- LGBTQ+ employees
- **“Diversity is not just about hiring different people — it is about designing work so different people can stay and succeed.”**

Company	Policy / Program	Why It Matters
Microsoft	“Parents at Microsoft” support groups + flexible remote work	Retains working parents & caregivers
CarrefourSA (Turkey)	Actively hires + trains **older workers** for customer service roles	Values reliability + reduces turnover
HepsiBurada	Re-skilling programs for women returning to workforce	Expands talent pool + boosts gender inclusion
IKEA	Inclusive shift arrangements and disability employment programs	Creates equitable access to stable work

- **Turkish Executive’s Gender Discrimination Lawsuit: Google Ordered to Pay $1.15 Million**
- Ülkü Rowe, a Turkish senior manager who worked at Google for nearly seven years, filed a lawsuit against the company claiming **gender discrimination**. The court ruled in Rowe’s favor and ordered Google to pay **$1.15 million in compensation**.
- Rowe stated:
- *“Technology companies now shape the future of nations. I did not want to remain silent in the face of injustices and inequalities in these companies.”*

Türk yöneticiden 'cinsiyet ayrımcılığı' davası: Google 1.15 milyon dolar tazminat ödeyecek

Google'da yaklaşık 7 yıldır çalışan Türk yönetici Ülkü Rowe, 'cinsiyet ayrımcılığı' iddiasıyla çalıştığı şirkete dava açtı. Mahkeme, Google'ın Türk asıllı yöneticiye 1.15 milyon dolarlık tazminat ödemesine hüküm verdi. Rowe, "Ülkelerin geleceğini artık teknoloji şirketleri yönlendiriyor. Özellikle bu şirketlerdeki haksızlıklar ve adaletsizliklere sessiz kalmak istemedim" dedi.

Developing and Using Application Forms

- **Purpose of Application Forms**
- **Application Guidelines**

- Power Construction is planning to open five new construction projects next year. What information should HR collect before deciding whether to hire new employees or reassign existing staff?

- https://vimeo.com/1168194009?utm_source=chatgpt.com
- Q1. Why did Power Construction's expansion into 14 states make its existing workforce planning system ineffective?
- Q2. How did implementing Bridgit change the way Power Construction planned and allocated its workforce?
- Q3.Imagine Power Construction wins a major project in another state. How should the company decide which employees to assign to the project?

- **1. What were the main workforce planning challenges faced by Power Construction?**
- Increased complexity of workforce allocation across multiple locations.
- Reliance on Excel, PDFs, and manual coordination.
- Difficulty tracking employee availability, skills, and project assignments.
- Up to 80% of meeting time spent verifying workforce information rather than making strategic decisions.

- **Q2. How did implementing Bridgit change the way Power Construction planned and allocated its workforce?**
- Centralized employee and project information.
- Provided updated visibility into workforce availability and assignments.
- Improved employee-to-project matching based on experience and location.
- Reduced administrative work and improved coordination.
- Enabled more proactive workforce planning.

- **Q3. Imagine Power Construction wins a major project in another state. How should the company decide which employees to assign to the project?**
- Identify the project's staffing requirements and timeline.
- Assess current employees' availability and relevant experience.
- Consider geographic location and relocation requirements.
- Evaluate previous project experience and team compatibility.
- Identify skill gaps and opportunities for internal reassignment.
- Recruit externally if internal workforce capacity is insufficient.

Improving Performance:
HR as a Profit Center

Predicting Labor Needs

Valero Energy created a “labor supply chain” for improving the efficiency of its workforce planning, recruiting, and hiring process. It includes an **analytic tool that predicts Valero’s labor needs based on past trends.**

And, it includes computer screen “dashboards” that show how components in the staffing chain, such as ads placed on job boards, are performing according to cost, speed, and quality.

Before implementing the labor supply chain system, it took 41 pieces of paper to bring on board an employee and more than 120 days to fill a position; each hire cost about $12,000.

The new system eliminated most of the paper forms needed to hire an employee, time to fill fell below 40 days, and cost per hire dropped to $2,300.

practice

- Analyze and list the aspects of the job that have been stressed in the video. Differentiate between a written job description and a video

- Case: Evaluating Appian's Recruitment Strategy
- Discussion Questions
- How does Appian use employer branding to attract potential employees?
- What kind of candidates is the company trying to attract? Which elements of its recruitment message communicate this?
- If you were Appian's HR manager, what would you improve in this recruitment campaign to attract a larger and more diverse pool of qualified applicants?

- **How does Appian use employer branding to attract potential employees?**
- Showcasing organisational culture: Appian presents itself as a fast-paced, friendly and collaborative workplace.
- Employee testimonials: Existing employees describe their experiences, making the employer brand more personal and credible.
- Communicating company identity: The video introduces the company's history and working environment to help candidates understand the organisation.
- Emotional appeal: Rather than focusing exclusively on salaries or job requirements, Appian promotes the experience of belonging to its organisation.

- **What kind of candidates is the company trying to attract? Which elements of its recruitment message communicate this?**

Target candidates (inferred)	Recruitment message
Collaborative employees	Friendly workplace and employee testimonials
Adaptable, energetic individuals	Fast-paced organisational culture
Candidates interested in technology	Identity as a software and automation company
People seeking cultural fit	Emphasis on everyday employee experiences

- **If you were Appian's HR manager, what would you improve in this recruitment campaign to attract a larger and more diverse pool of qualified applicants?**

- **.** Communicate a clearer Employee Value Proposition (EVP): Provide specific information about career development, learning opportunities, benefits and working arrangements.
- Highlight diversity and inclusion: Include employees from different backgrounds, roles and career stages.
- Provide a realistic job preview: Show not only positive cultural aspects but also the actual responsibilities, expectations and challenges of working at Appian.
- Diversify recruitment channels: Distribute the video through LinkedIn, university career centres, professional networks and specialised job platforms.
- Evaluate effectiveness: Track application numbers, applicant diversity, qualified applicants, conversion rates and subsequent employee retention.

Application Case

Ya Kun Kaya International

Ya Kun was founded in 1944 by Loi Ah Koon, as a coffee shop that served coffee, tea, eggs, and toast. Ya Kun International moved to Singapore in 2001, where it now has 32 outlets, and has 27 franchise outlets in other parts of Asia. Its overseas outlets are located in Indone- sia, Taiwan, Japan, South Korea, Vietnam, and the Philippines.

Ya Kun has a family-style work environment and an established "promotion-from-within" policy. There is also a strong emphasis on team- work, where helping one another is the norm, even between employees across outlets and departments. The top management reinforces this teamwork culture at Ya Kun. The organization also has a very flat structure, where the staff feels comfortable approaching their superiors to discuss their problems or suggestions for improvements.

Job openings for the outlet staff are advertised in Chinese and English newspapers, as well as through recruitment notices at Ya Kun outlets. Applicants who respond to the advertisements are invited for interviews. Applicants go through two rounds of interviews—one with the senior area manager and one with the operations manager. Job applicants are screened primarily for their level of commitment and willingness to work shifts. Other desirable qualities include integrity, diligence, and honesty. Prior experience in the food and beverage industry is not essential. Ya Kun believes that if an applicant is committed and willing to learn, the necessary skills to excel in the job can easily be taught. Successful applicants then go through 2 weeks of training and remain on probation for 3 months. Most of Ya Kun Singapore's outlet staff are more than 30 years of age because mature workers generally have better work attitudes and exhibit a higher level of job commitment. Also, the majority of the outlet staff are Singaporeans, with a small proportion from Malaysia and China. Most of the outlet staff are full-time workers, with some part-time staff hired to complement the full-time staff when they go on vacation or become ill. The usual operating hours of each outlet are from 7 A.M. to 11 P.M., and the staff work 8-hour shifts. Each outlet has about 10 staff working each of the two shifts. The emphasis on good attitude and character in the selection of outlet staff has helped Ya Kun build a pool of hardworking and committed workers. Loyalty, honesty, and fairness are the most important attributes sought in selecting store managers from among the outlet staff. All these help keep the staff happy and committed to the company, which Ya Kun believes has translated into their serving customers well.

The main challenge Ya Kun faces is recruiting employees with the right attitude, because the technical skills required are relatively easy to learn. Some applicants are unwilling to work shifts, making it difficult for Ya Kun to hire them: shift work is inevitable in the food and beverage retail industry.

Questions

5-15. How would you forecast the manpower needs of Ya Kun?

5-16. What are the advantages and disadvantages of Ya Kun's hiring part-time workers?

5-17. Good attitude and commitment are two important attributes that Ya Kun looks for in prospective employees. Is a job interview an effective method to assess these two attributes? How else can Ya Kun get reliable information about these two attributes?

5-18. What suggestions would you make to Ya Kun to improve its recruiting processes?

Sources: The information in this case was obtained through online interviews with staff from Ya Kun; Ya Kun Kaya Toast, http://yakun.com.s accessed November, 2009.

How would you forecast the manpower needs of Ya Kun?

- As stated in the case, each outlet requires 10 Full-Time Equivalent (FTE). To provide for employees going on leave and absenteeism, we add a 10% allowance, making it 11 FTE.
- Let n be the number of outlets in a given year.
- Let e be the projected number of outlets Ya Kun plans to open in the next year.
- Let t be the estimated number of resignations over the next year.
- Let p be the estimated number of personnel who are promoted to store manager or transferred to the headquarters in the next year.
- Total number of new outlet staff required in the next year = Total number of manpower required in one year's time - Total number of manpower required now + Estimated number of resignations over the next year + Estimated number of promotions over the next year.
- Total number of manpower required in one year's time = 11 (n + e)
- Total number of manpower required now = 11n
- Total number of new outlet staff required in the next year = 11 (n + e) - 11n + p + t = **11 e + p + t**

- **What are the advantages and disadvantages of Ya Kun's hiring part-time workers?**
- Advantages of hiring part-time workers include flexibility in scheduling as they help fill in the gaps when the full-time workers go on leave or are taken ill; complement the full-time workers; allows Ya Kun to tap into a larger available pool of job applicants as many more people may be willing and able to work part-time as opposed to full-time; and can be deployed strategically during peak hours. On the other hand, the disadvantages include less commitment to the company, difficulty in integrating them as they only work occasionally, and their large numbers may affect teamwork.
- **Good attitude and commitment are two important attributes that Ya Kun looks for in prospective employees. Is a job interview an effective method to assess these two attributes? How else can Ya Kun get reliable information about these two attributes?**
- **A job interview may not be the most effective method to assess these two attributes as these may not be immediately apparent during the interview process.**
- In order to obtain reliable information on these two attributes, managers of Ya Kun may ask the job applicants for referrals in the application pack and contact the referrals to obtain information regarding these two attributes; use critical incidence interviews to test if the job applicants have past examples of these attributes; provide job applicants with a realistic job preview by telling them about all the challenges and worst case scenarios that their staff faces, allowing the applicants to have a better idea of the job and make a better-informed choice of whether to take up the job or not; and use role-playing exercises where the applicants play the role of the staff and the managers the customers, so that the managers may observe how the applicants may potentially react when they are actually working for Ya Kun.

- **What suggestions would you make to Ya Kun to improve its recruiting processes?**
- Ya Kun's low turnover rate and large pool of hardworking committed workers indicates that its recruitment processes are working well. However, to improve its recruiting process, Ya Kun's managers may choose to use more internal referrals as employees know what kinds of applicants will fit well with the prevalent company culture; hire a larger ratio of part-timers to full-timers as this allows them greater flexibility in scheduling; convert part-timers to full-timers if they perform well and if they are open to the switch; and maintain contact with former staff of the company so that they can be informed of any new positions or openings in the company.

Continuing Case

Carter Cleaning Company

Getting Better Applicants

If you were to ask Jennifer and her father what the main problem was in running their firm, their answer would be quick and short: hiring good people. Originally begun as a string of coin-operated laundromats requiring virtually no skilled help, the chain grew to six stores, each heavily dependent on skilled managers, cleaner/spotters, and pressers. Employees generally have no more than a high school education, and the market for them is very competitive. Over a typical weekend, literally dozens of want ads for experienced pressers or cleaner/spotters can be found in area newspapers. All these people usually are paid around $15 per hour, and they change jobs frequently. Jennifer and her father thus face the continuing task of recruiting and hiring qualified workers out of a pool of individuals they feel are almost nomadic in their propensity to move from area to area and job to job. Turnover in their stores (as in the stores of many of their competitors) often approaches 400%. "Don't talk to me about human resources planning and trend analysis," says Jennifer. "We're fighting an economic war, and I'm happy just to be able to round up enough live applicants to be able to keep my trenches fully manned."

In light of this problem, Jennifer's father asked her to answer the following questions:

Questions

5-19. First, how would you recommend we go about reducing the turnover in our stores?

5-20. Provide a detailed list of recommendations concerning how we should go about increasing our pool of acceptable job applicants so we no longer face the need to hire almost anyone who walks in the door. (Your recommendations regarding the latter should include completely worded online and hard-copy advertisements and recommendations regarding any other recruiting strategies you would suggest we use.)

How would you recommend reducing turnover in the stores?

- To reduce turnover, Carter Cleaning should focus on **improving job stability, work environment, and employee expectations**:
- **Improve Selection**
  - Hire based on **reliability and work ethic**, not just availability.
  - Use short structured interviews to screen for dependability.
  - Check references to avoid frequent job-hoppers.
- **Provide Basic Training**
  - Offer **1–2 days of onboarding/training** so employees feel more competent.
  - Create simple **training checklists** for pressing, spotting, store procedures.
- **Increase Retention through Rewards**
  - Offer **small retention incentives**:
    • Attendance bonuses
    • “Employee of the Week” recognition
    • Referral bonuses
- **Clarify Role & Expectations**
  - Provide clear work schedules in advance.
  - Standardize job duties so new hires **know what to expect**.
- **Improve Work Conditions**
  - Ensure respectful treatment from managers.
  - Schedule predictable rest breaks.
  - Keep environment clean and safe.

1. Rewrite Job Advertisement

Source (use different channels)’	Why
Local Facebook Groups & Instagram job posts	Reaches the exact workers in the neighborhood.
Indeed / LinkedIn Basic Job Postings	Free / low-cost visibility.
Local community centers / churches / job fairs	Good source of stable, long-term workers.
Employee Referral Program	Reward employees who bring reliable friends.

- Make the job sound structured, stable, and respectful:
- **Now Hiring:** Customer-focused Cleaners/Pressers
  Paid training, stable hours, friendly team environment.
  No experience required — we train!
  Advancement opportunities.

3. Build a Small “Hiring Pipeline”

- Maintain a **list of past applicants** and contact when there are openings.
  (Like a mini ATS system.)
- **4. Partner with**
- **High schools**
- **Vocational training programs**
- **Local immigrant & employment support centers**
- These sources provide **stable and motivated job seekers.**

BBA-3211
HUMAN RESOURCE MANAGEMENT

2026- Fall/Winter

Dr. Cagla Ozgoren
cagla.ozgoren@bau.edu.tr

LEARNING
OBJECTIVES

TALENT MANAGEMENT

- "Right people, right roles, right time."
- *A strategic process for attracting, developing, motivating, and retaining employees who drive organizational success.*
- **Specific group of people or all employees?**

- **includes all the ways that organizations bring employees on board, keep them happy and productive, and help them continue to develop their skills over time.**

- **Defining talent management** as the holistic, integrated and results and goal-oriented process of planning, recruiting, selecting, developing, managing, and compensating employees.

- Talent managers are responsible for identifying, attracting, and retaining your company's best and brightest employees
- Talent management is the process of developing and retaining employees with high potential.
- It includes identifying, assessing, and developing talent within your organization. Talent management also helps your organization plan for succession by identifying future leaders and ensuring they have the necessary skills and experience in key business functions.

CORE STAGES:

- **Attraction & Employer Branding** – Building a strong reputation (e.g., *Google's "Best Place to Work" campaigns*)
- **Selection & Onboarding** – AI-based screening, structured onboarding (e.g. *GitLab's 100% remote onboarding kit* includes virtual mentors and culture handbooks.)
- **Development** – Continuous learning, coaching, mentoring (online modules for 100k+ employees.)
- **Engagement & Retention** – Employee experience, well-being (*Microsoft Viva* and *Workday Peakon* integrate feedback loops in Teams.)
- **Succession & Leadership** – Developing future leaders

- "Which stage seems most critical in today's remote or hybrid settings?"

WHY IT MATTERS IN 2026

- **Skills gaps:** 44% of workers' skills will be disrupted by 2027 (World Economic Forum).
- **Employee expectations:** Gen Z values purpose, flexibility, and learning.
- **AI disruption:** Many roles are evolving; soft skills matter more.
- **Hybrid work:** Requires new ways to build culture and loyalty.

TOP 5 TALENT MANAGEMENT TRENDS (2025)

- **1. Skills-Based Hiring**
- Shift from degrees →**skills portfolios and micro-credentials.**
- **Examples:**
  - *IBM* removed degree requirements for more than 50% of job postings.
  - *Google* and *Coursera* offer career certificates accepted as hiring credentials.
  - *Unilever* uses internal "Flex Experiences" platform to match employees with project needs based on skills.

- 93% of talent acquisition professionals believe accurate skills assessment is crucial for improving quality of hire (LinkedIn, 2025).
- 55% of organizations map skills directly to jobs, up from 47% in 2023 (Mercer, 2025/26).
- Key Takeaway: Hire for skills and potential, not just credentials. Develop talent through continuous learning and internal mobility.
- .

2-AI-DRIVEN PEOPLE ANALYTICS

- AI and predictive analytics used for:
  - Attrition prediction
  - High-potential identification
  - Personalized career development
- **Examples:**
- *Unilever* uses **HireVue AI interviews** analyzing voice/tone for fit.
- *IBM Watson Career Coach* recommends career paths based on employee skills.
- *Google People Analytics* identifies key drivers of retention ("Project Oxygen").

- *How can HR ensure fairness when using AI for people decisions?*
- *Amazon had to abandon its AI recruiting tool* when it learned the system favored male candidates because past hiring data was male-dominated.

- Key Statistics (SHRM, 2025):
- 43% of organizations use AI in HR, compared with 26% in 2024.
- 89% of HR professionals using AI in recruitment report time savings or increased efficiency.
- 47% of organizations using AI for learning and development apply it to recommend or create personalized learning opportunities.

3-EMPLOYEE EXPERIENCE & WELL-BEING PLATFORMS

- TM now integrates **learning, well-being, and engagement.**
- **Examples:**
  - *Microsoft Viva* unifies feedback, goals, and learning in Teams.
  - *Salesforce* links employee satisfaction to customer satisfaction metrics.
  - *Airbnb* focuses on "belonging" as part of its employee experience philosophy.

  - Trend: TM now treats employees as **internal customers.**

4-CONTINUOUS LEARNING & INTERNAL MOBILITY

- Focus on **lifelong learning** and **career reinvention.**
- **Examples:**
  - *Nestlé Pathways* – career mobility across departments and geographies.
  - *LinkedIn Learning* and *Coursera for Business* – personalized learning dashboards.
  - *AT&T's "Future Ready" initiative* retrains workers for digital roles.
- TM = culture of **upskilling and reskilling.**

5. DIVERSITY, EQUITY & INCLUSION (DEI)

- From policy →to **behavioral leadership.**
- **Examples:**
  - *Salesforce "Equality Groups"* integrate DEI into every team.
  - *Accenture* uses gender and disability inclusion dashboards.
  - *Coca-Cola* ties executive bonuses to DEI metrics.
- TM now measures **"sense of belonging"** as a key retention factor.

- ***Airbnb*** replaced its "DEI survey" with a *Belonging Score* that tracks psychological safety and inclusion perception.
- **Accenture** publishes real-time gender, ethnicity, and disability inclusion data online —setting global transparency standards.
- **Microsoft** releases annual "Diversity & Inclusion Report" to show year-over-year progress.

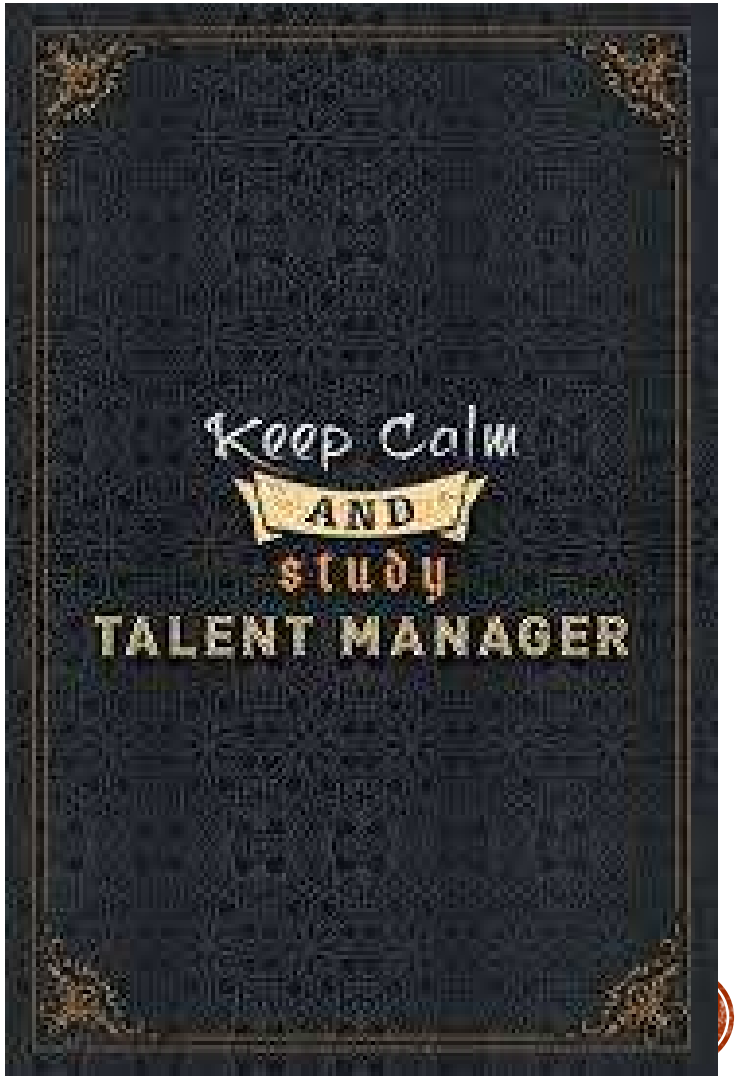

TALENT MANAGEMENT COURSES AND PROGRAMS (COURSERA)

- **Talent Management Practitioner (TMP)**
- This course is for those who want to learn the basics of talent management. You'll learn about topics such as workforce planning, recruiting, selection, and retention.
- **Exam fee:** $625
- **Senior Talent Management Practitioner (STMP)**
- This course is good for those who want to take their talent management skills to the next level. You'll learn advanced topics such as succession planning and leadership development.
- **Exam fee:** $850
- **Associate Professional in Talent Development (APTD)**
- This credential demonstrates your knowledge and proficiency in talent development principles and practices. To earn the APTD, you must pass an exam, have at least three years of experience working, and have completed 28 hours of professional development in talent development.
- **Exam fee:** $499 (members); $699 (non-members)
- **Certified Professional in Learning and Performance (CPLP)**
- The CPLP is a comprehensive certification covering all learning and performance improvement aspects. To earn the CPLP, you must pass a knowledge exam, submit a "work product" for assessment, and have at least three years of experience working in the field.
- **Exam cost:** $900 (members); $1,250 (non-members)
- **Online courses and professional certificates**

JOB TITLES OF TALENT MANAGERS

- A career in talent management can be very rewarding. As a talent manager, there can be a variety of job titles; here are some positions and their annual US salary (base pay + bonuses, commissions, and other additional pay):
- Talent acquisition manager: $110,678
- Talent development manager: $99,862
- Talent management consultant: $99,988
- Organizational development manager: $108,175

FUTURE ROLES IN TALENT MANAGEMENT (2025–2030 FOCUS)

- The future of talent management is **interdisciplinary** — blending HR, data science, psychology, and sustainability.
  The most in-demand skills will be: **data literacy, empathy, creativity, and systems thinking.**
- **People Analytics & AI Specialist**
- Combines HR data, predictive modeling,: *U.S. average salary:* $120,000–140,000

- **--**Human–AI Collaboration Coach (New Frontier Role)
- Prepares leaders and teams to collaborate effectively with AI tools.
- Focuses on ethics, trust, and digital emotional intelligence.
- Salary: $120,000+ (expected rise)
- Emerging in: Tech-forward companies (e.g., Deloitte, PwC, SAP).

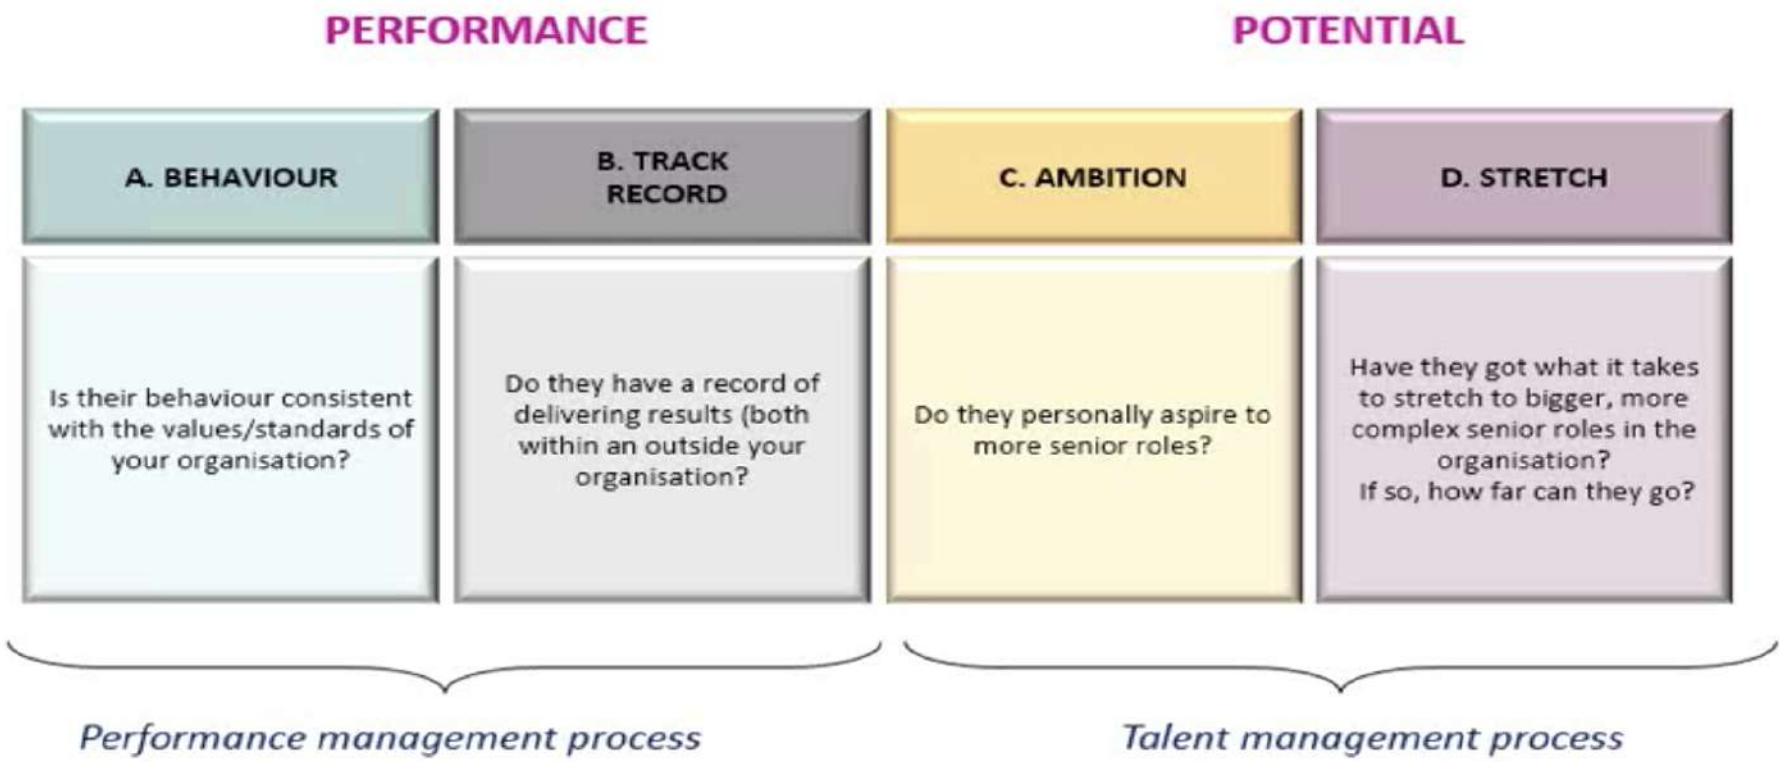

5 TALENT MANAGEMENT SYSTEMS & COMPANY EXAMPLES

System	Main Functions
Workday HCM	End-to-end HR: recruiting, onboarding, learning, analytics, and succession. (Netflix, Microsoft, Unilever)
SAP SuccessFactors	Recruiting, performance, goals, learning, and career development. (Netflix, Microsoft, Unilever)
Oracle HCM Cloud	AI-driven recruiting, talent reviews, learning, and workforce planning.
Cornerstone OnDemand	Learning, skill development, internal mobility, and performance. (Netflix, Microsoft, Unilever)
UKG Pro (Ultimate Kronos Group)	Payroll, workforce management, engagement, and analytics.
BambooHR	Simple HR suite for SMEs: hiring, onboarding, and performance reviews.
Degreed	Learning experience platform (LXP) for upskilling and reskilling employees.

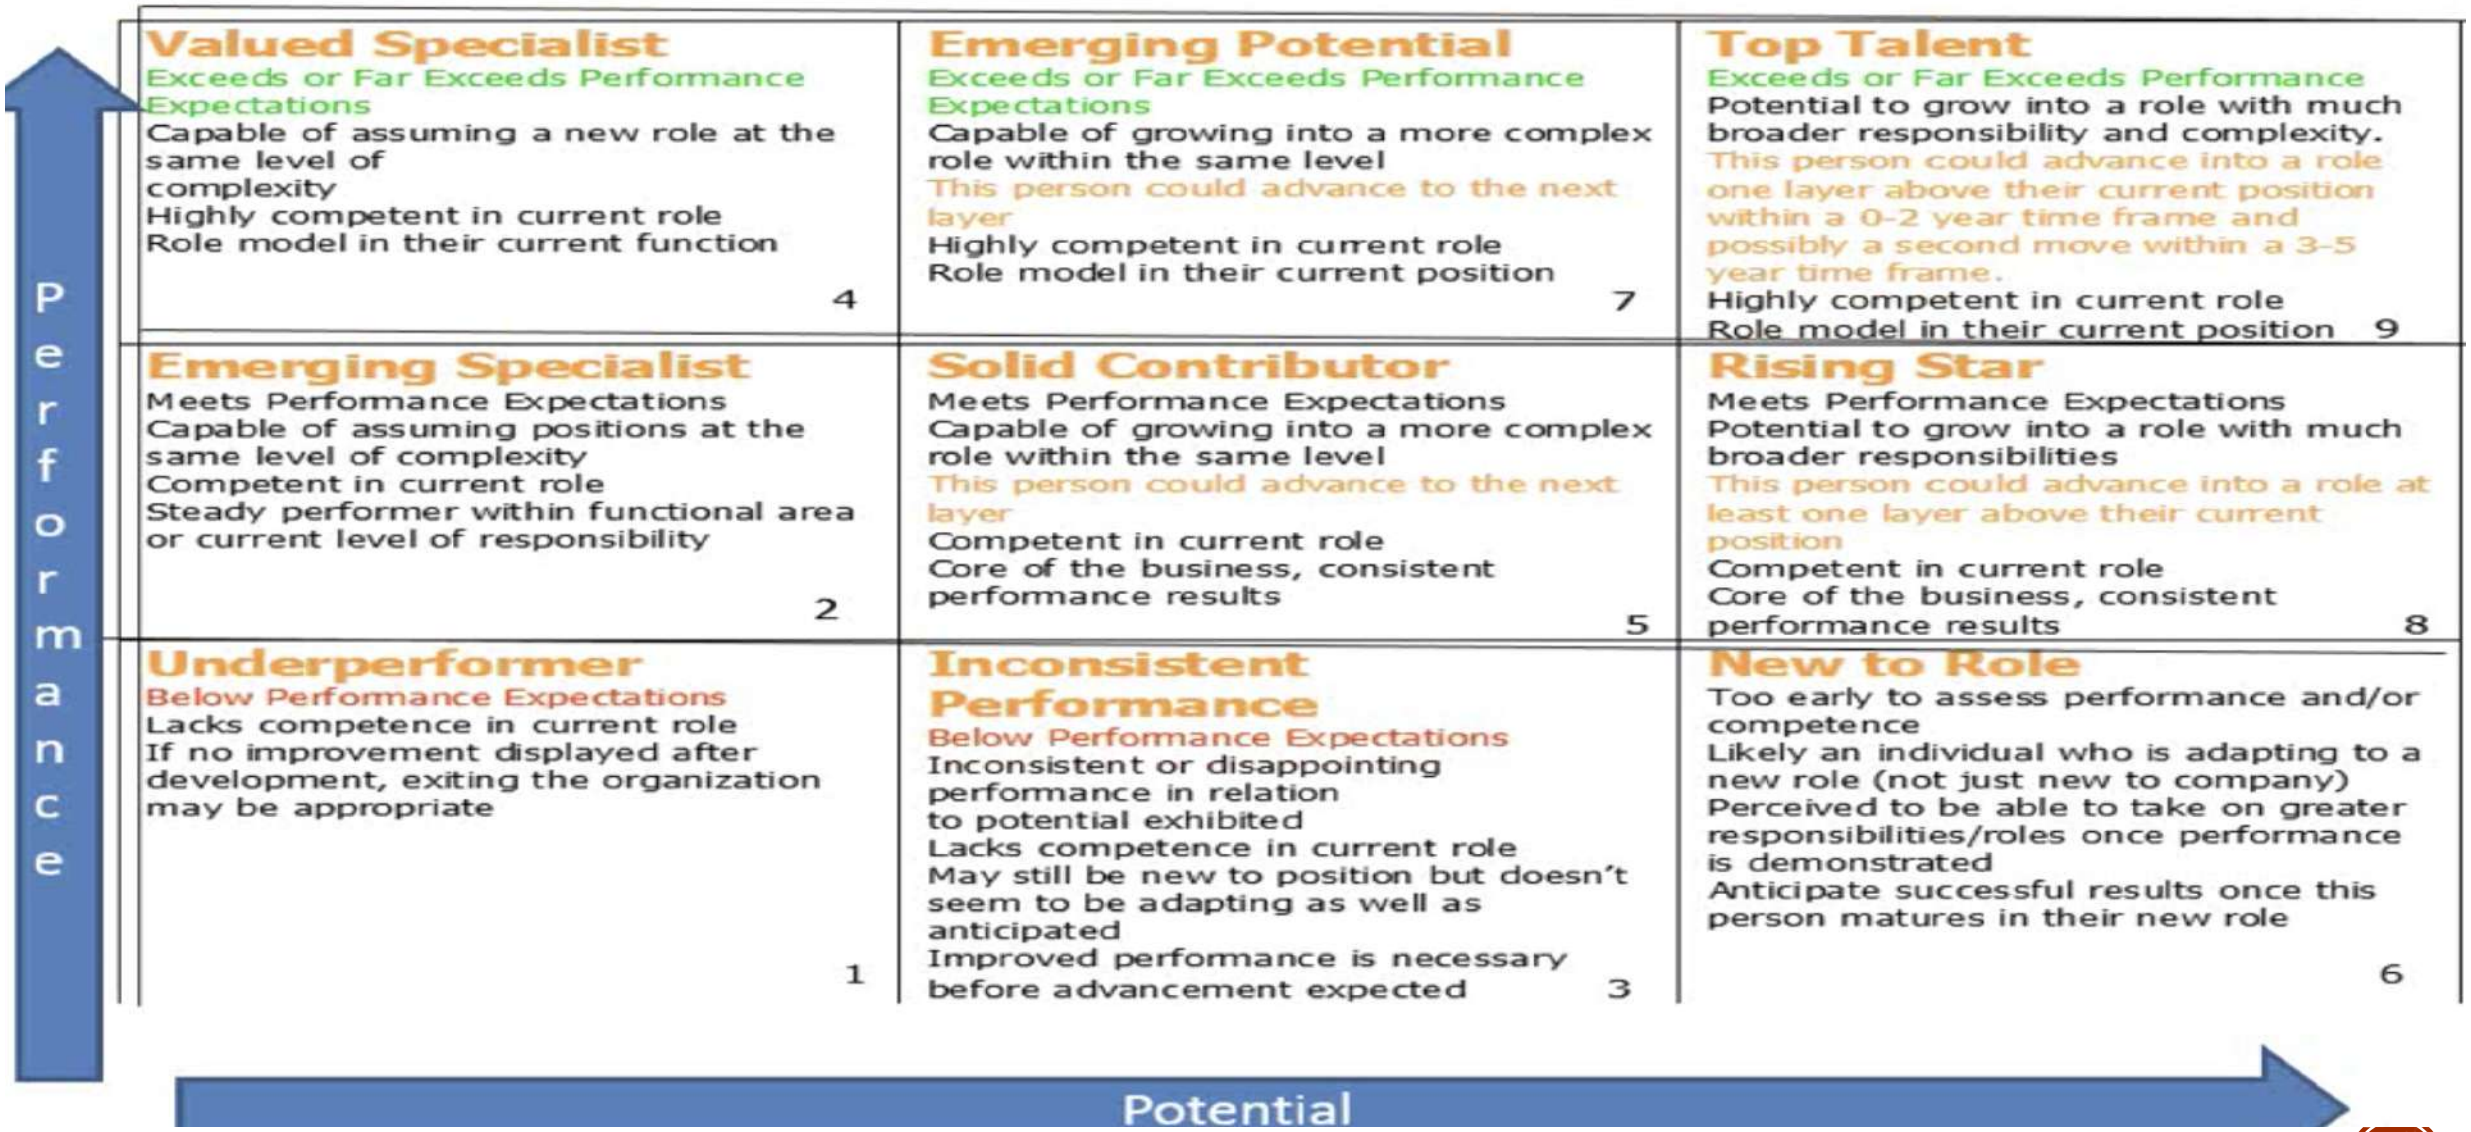

The Talent Selection Model:

Performance and Potential

9 Box Grid

Performance
Potential
Valued Specialist
Exceeds or Far Exceeds Performance Expectations
Capable of assuming a new role at the same level of complexity
Highly competent in current role
Role model in their current function
4
Emerging Potential
Exceeds or Far Exceeds Performance Expectations
Capable of growing into a more complex role within the same level
This person could advance to the next layer
Highly competent in current role
Role model in their current position
7
Top Talent
Exceeds or Far Exceeds Performance
Potential to grow into a role with much broader responsibility and complexity.
This person could advance into a role one layer above their current position within a 0-2 year time frame and possibly a second move within a 3-5 year time frame.
Highly competent in current role
Role model in their current position
9
Emerging Specialist
Meets Performance Expectations
Capable of assuming positions at the same level of complexity
Competent in current role
Steady performer within functional area or current level of responsibility
2
Solid Contributor
Meets Performance Expectations
Capable of growing into a more complex role within the same level
This person could advance to the next layer
Competent in current role
Core of the business, consistent performance results
5
Rising Star
Meets Performance Expectations
Potential to grow into a role with much broader responsibilities
This person could advance into a role at least one layer above their current position
Competent in current role
Core of the business, consistent performance results
8
Underperformer
Below Performance Expectations
Lacks competence in current role
If no improvement displayed after development, exiting the organization may be appropriate
1
Inconsistent Performance
Below Performance Expectations
Inconsistent or disappointing performance in relation to potential exhibited
Lacks competence in current role
May still be new to position but doesn't seem to be adapting as well as anticipated
Improved performance is necessary before advancement expected
3
New to Role
Too early to assess performance and/or competence
Likely an individual who is adapting to a new role (not just new to company)
Perceived to be able to take on greater responsibilities/roles once performance is demonstrated
Anticipate successful results once this person matures in their new role
6

What Is Job Analysis?

- is the procedure through which you determine the duties and skill requirements of a job and the kind of person who should be hired for it.

- Job analysis is the process of systematically collecting information about a job's **tasks, responsibilities, skills, knowledge, and working conditions.**

The Basics of Job Analysis

- **Work activities:** Information about the job's actual work activities, such as cleaning, selling, teaching, or painting. This list may also include how, why, and when the worker performs each activity.
- **Human behaviors:** Information about human behaviors the job requires, like sensing, communicating, lifting weights, or walking long distances.
- **Machines, tools, equipment, and work aids:** Information regarding tools used, materials processed, knowledge dealt with or applied (such as finance or law), and services rendered (such as counseling or repairing).
- **Performance standards:** Information about the job's performance standards (in terms of quantity or quality levels for each job duty, for instance).
- **Job context**

Uses of Job Analysis Information

- Recruitment and selection
- EEO compliance
- Performance appraisal
- Compensation
- Training

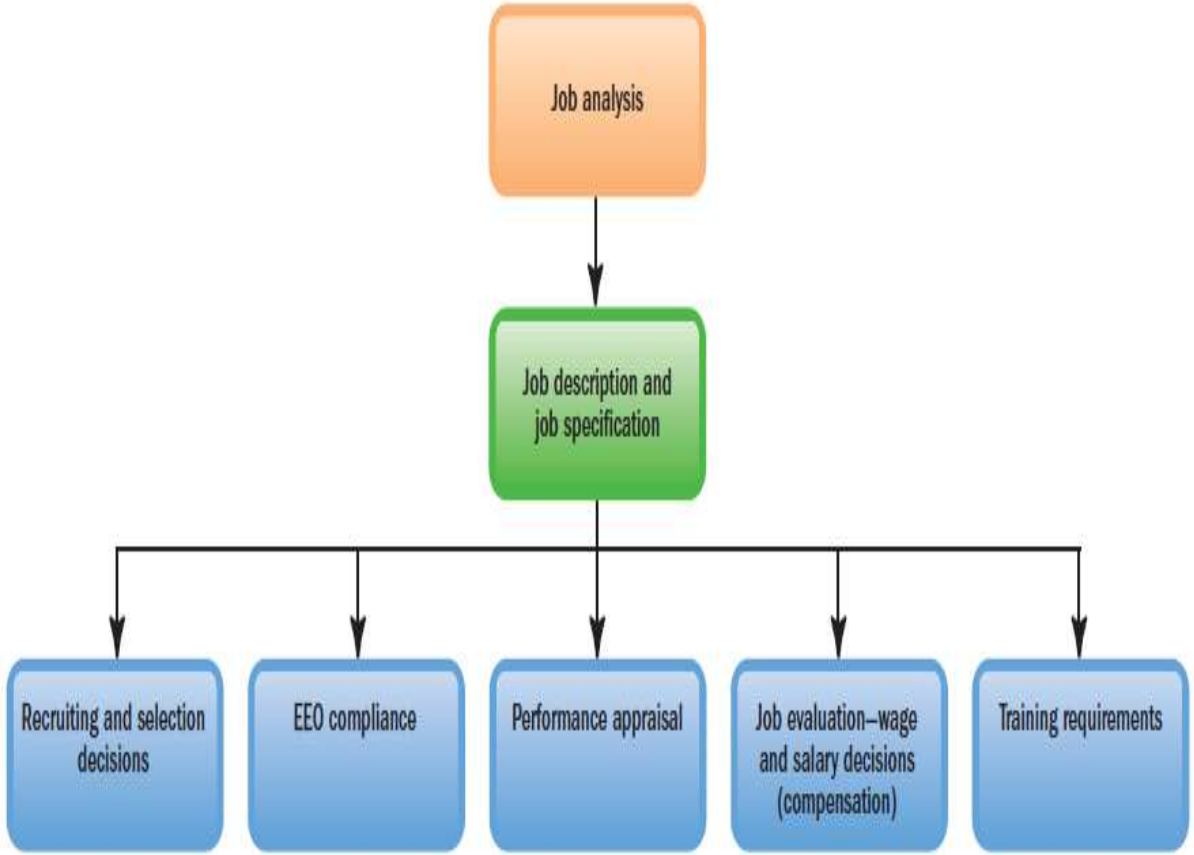

FIGURE 4-2 Uses of Job Analysis Information

Conducting a Job Analysis

1. **Decide how you will use information** (e.g. interviews, questionnaire, numerical rankings, writing job descriptions)
2. **Background information** (such as, İŞKUR Job descriptions database, organizational charts-org. wide distribution of work, with titles; workflow charts)
3. **Representative positions**
4. **Collect and analyze data** (e.g. collect data on job activities, working conditions)
5. **Verify** (with the worker and with his/her supervisor)
6. **Job description and specification**

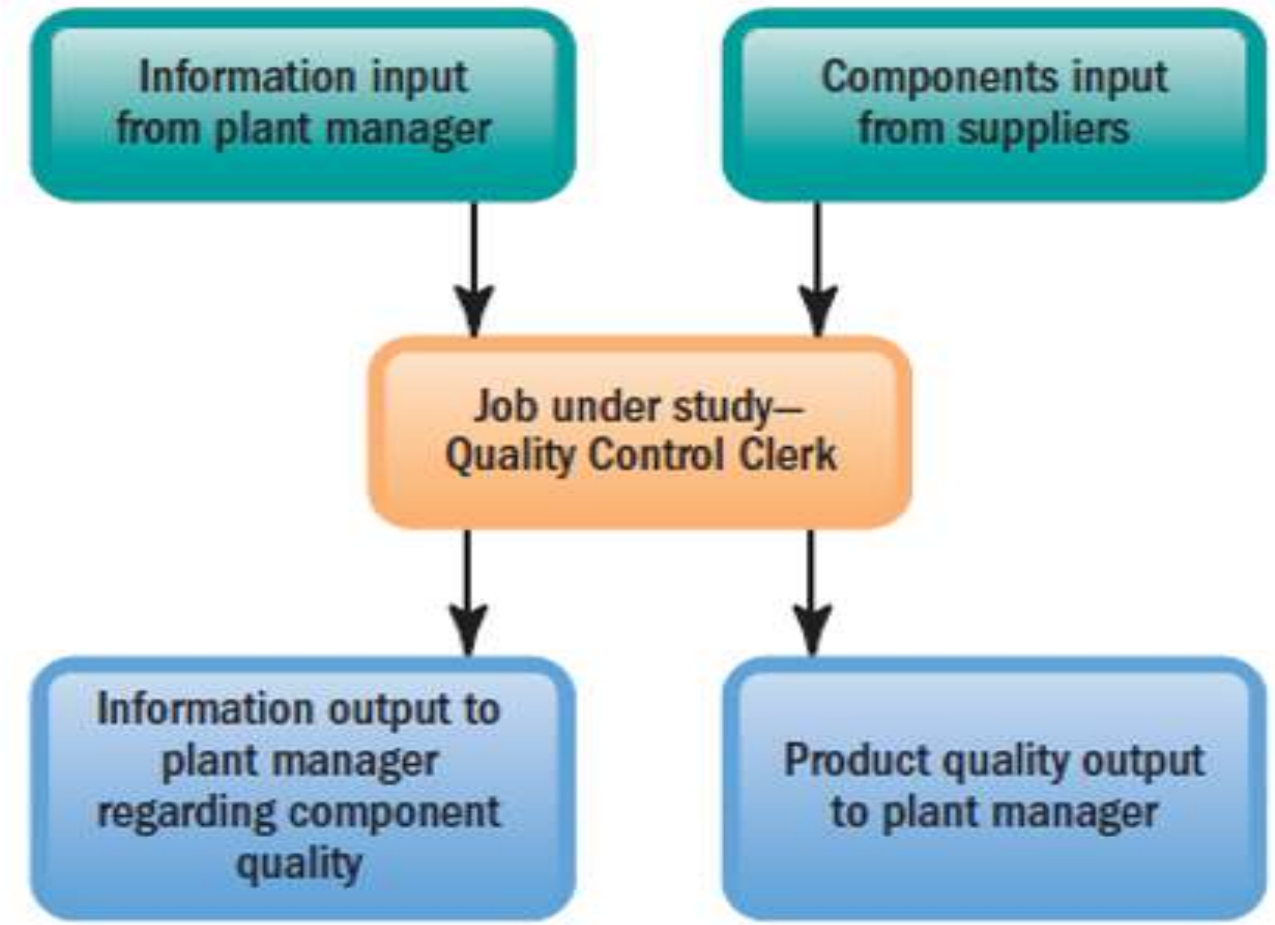

Processes involved in Job Analysis

- ***Workflow Analysis***

Workflow Analysis is the process of **examining how work moves through an organization** — from inputs, to processes, to outputs — and identifying who does what, how, and why.

Why It Matters?

Helps redesign jobs for **efficiency and collaboration**
Supports **automation and AI integration** in HR processes
Essential for **organizational restructuring or process improvement**

Other Processes involved in Job Analysis

- **Business Process Reengineering:** Redesigning business processes, usually by combining steps, so that small multifunction teams, often using information technology, do the jobs formerly done by a sequence of departments.

Job Redesign

- *Job Enlargement*
- *Job Rotation*
- *Job Enrichment*

KEY DISTINCTION

Horizontal vs. Vertical Job Design

The difference is not how much someone works — it is what changes in their role.

JOB ENLARGEMENT

Horizontal expansion

Task A | Task B | Task C

More variety in tasks
Same level of decision-making authority

JOB ENRICHMENT

Vertical expansion

More responsibility

More autonomy

Current role

More control over how work is done

REMEMBER: Enlargement adds tasks. Enrichment adds discretion.

EXAMPLES • FRONTLINE AND SERVICE WORK

Same role, different job redesign

Illustrative situations — not claims about specific employers' actual policies.

JOB / SETTING	JOB ENLARGEMENT	JOB ENRICHMENT
Barista Coffee shop (e.g., Starbucks)	Also takes payments, restocks supplies, and prepares food orders.	Can resolve customer complaints and offer appropriate service recovery.
Receptionist Hotel	Also manages reservations and responds to guest inquiries.	Can approve room upgrades or compensation within a set limit.
Sales associate Fashion retail (e.g., Zara)	Also checks inventory and organises product displays.	Can decide on local merchandising changes using customer feedback.

The difference also applies to knowledge work

More duties do not automatically mean greater authority.

JOB / SETTING	JOB ENLARGEMENT	JOB ENRICHMENT
HR specialist HR department	Takes on onboarding and training coordination in addition to recruitment.	Designs selection methods, shapes recruitment strategy, and evaluates results.
University lecturer Higher education	Organises workshops and academic events alongside teaching.	Has authority to redesign a course and choose teaching and assessment methods.

ASK: Does the new duty increase variety — or does it transfer responsibility?

CLASS DISCUSSION

Which is enlargement? Which is enrichment?

A quick restaurant example. Discuss with the person next to you.

SCENARIO A

An employee who normally takes orders is also asked to prepare drinks and package food.

SCENARIO B

An employee can independently handle complaints, offer service recovery, and suggest operational changes.

Which scenario would be more likely to increase intrinsic motivation — and why?

Discussion time: 2 minutes

Why job enrichment can be more motivating

Not all additional duties create a more meaningful job.

SCENARIO A

JOB ENLARGEMENT

Adds task variety, but the employee has no additional decision-making authority.

SCENARIO B

JOB ENRICHMENT

Adds autonomy, responsibility, and opportunities to influence results.

Takeaway: More tasks may reduce boredom; more autonomy may strengthen intrinsic motivation.

Improving Performance:
HR as a Profit Center

Boosting Productivity Through Work Redesign

Atlantic American Insurance Company

ATLANTIC AMERICAN INSURANCE COMPANY

- The Atlantic American insurance company in Atlanta conducted a workflow analysis to identify inefficiencies in how it processes its insurance claims.
- As the firm's HR director said, "**We followed the life of a claim to where it arrived in the mail and where it eventually ended up**" in order to find ways to improve the process.
- The workflow analysis prompted several performance-boosting redesigns of the insurance claim jobs.
- The firm reduced from four to one the number of people opening mail, replacing three people with a machine that does it automatically. A new date stamping machine lets staff stamp 20 pages at a time rather than 1.
- A new software program adds bar codes to each claim automatically, rather than manually. The new system lowered costs.

THE PROFIT

- https://www.youtube.com/watch?v=1xelHa6pc7I&t=178s

- What would be the workflow in this business? How might this process be improved?
- Job redesign (job enlargement, rotation, enrichment)? Examples?
- Employee engagement?

Industry / Job	Job Enlargement	Job Enrichment
Starbucks Barista	In addition to preparing coffee, the barista handles payments, restocks supplies, and prepares food orders.	The barista is empowered to resolve customer complaints and make decisions about service recovery.
Hotel Receptionist	In addition to checking guests in, the receptionist manages reservations and answers customer inquiries.	The receptionist can independently offer room upgrades or compensation to dissatisfied guests within set limits.
Retail Sales Associate (Zara)	In addition to assisting customers, the employee manages inventory and organises product displays.	The employee is given authority to make merchandising decisions and recommend changes based on customer preferences.
HR Specialist	In addition to recruitment, the specialist handles onboarding and training coordination.	The specialist designs recruitment strategies, selects assessment methods, and evaluates hiring outcomes.
University Lecturer	In addition to teaching, the lecturer coordinates student workshops and helps organise academic events.	The lecturer gains autonomy to redesign a course, develop assessment methods, and introduce new teaching approaches.

Methods for Collecting Job Analysis Information

1. Interviews
2. Quantitative “position analysis” questionnaire
3. Additional Things to keep in mind

The Interview

1. Typical Questions
2. Structure Interviews
3. Pros and Cons
4. Interviewing Guidelines

TYPICAL QUESTIONS

- Typical interview questions include the following:
- What is the job being performed?
- What exactly are the major duties of your position?
- What physical locations do you work in?
- What are the education, experience, skill, and [where applicable] certification and licensing requirements?
- In what activities do you participate?
- What are the job's responsibilities and duties?

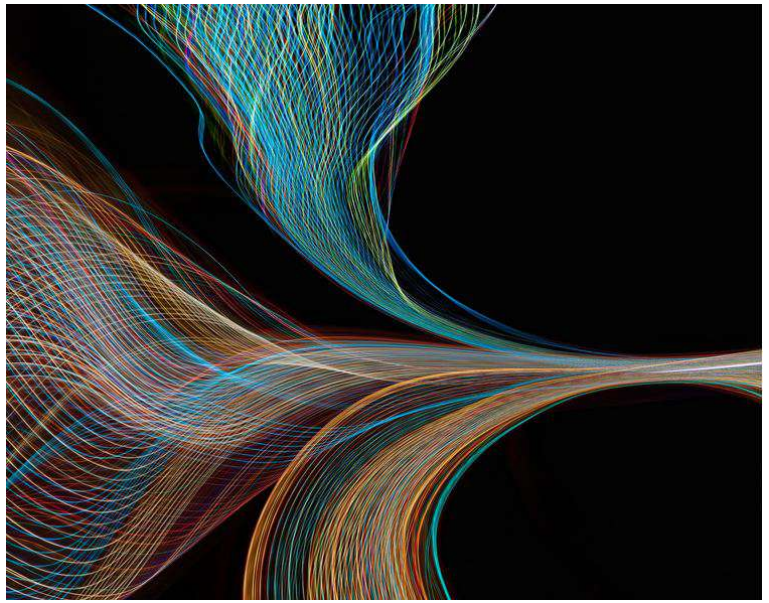

Writing Job Descriptions

Written statement of what the worker actually does, how he or she does it, and what the job's working conditions are.

You use this information to write a job specification; this lists the knowledge, abilities, and skills required to perform the job satisfactorily.

Diversity Counts

Writing Job Descriptions

- Job identification
- Job summary
- Responsibilities and duties
- Authority of incumbent
- Standards of performance
- Working conditions
- Job specifications

Job Identification

JOB TITLE: Telesales Respresentative	**JOB CODE:** 100001
RECOMMENDED SALARY GRADE:	**EXEMPT/NONEXEMPT STATUS:** Nonexempt
JOB FAMILY: Sales	**EEOC:** Sales Workers
DIVISION: Higher Education	**REPORTS TO:** District Sales Manager
DEPARTMENT: In-House Sales	**LOCATION:** Boston
	DATE: April 2013

FIGURE 4-7 **Sample Job Description, Pearson Education**

Source: Reprinted and electronically reproduced by permission of Pearson Education, Inc., Upper Saddle River, New Jersey.

Job Summary

SUMMARY (Write a brief summary of job.)

The person in this position is responsible for selling college textbooks, software, and multimedia products to professors, via incoming and outgoing telephone calls, and to carry out selling strategies to meet sales goals in assigned territories of smaller colleges and universities. In addition, the individual in this position will be responsible for generating a designated amount of editorial leads and communicating to the publishing groups product feedback and market trends observed in the assigned territory.

FIGURE 4-7 **Sample Job Description, Pearson Education**

Source: Reprinted and electronically reproduced by permission of Pearson Education, Inc., Upper Saddle River, New Jersey.

Relationships

Relationships

- ***Reports to:*** Vice president of employee relations.
- ***Supervises:*** Human resource clerk, test administrator, labor relations director, and one secretary.
- ***Works with:*** All department managers and executive management.
- ***Outside the company:*** Employment agencies, executive recruiting firms, union representatives, state and federal employment offices, and various vendors.

Responsibilities and Duties

PRIMARY RESPONSIBILITIES (List in order of importance and list amount of time spent on task.)

Driving Sales (60%)

- Achieve quantitative sales goal for assigned territory of smaller colleges and universities.
- Determine sales priorities and strategies for territory and develop a plan for implementing those strategies.
- Conduct 15–20 professor interviews per day during the academic sales year that accomplishes those priorities.
- Conduct product presentations (including texts, software, and Web site); effectively articulate author's central vision of key titles; conduct sales interviews using the PSS model; conduct walk-through of books and technology.
- Employ telephone selling techniques and strategies.
- Sample products to appropriate faculty, making strategic use of assigned sampling budgets.
- Close class test adoptions for first edition products.
- Negotiate custom publishing and special packaging agreements within company guidelines.
- Initiate and conduct in-person faculty presentations and selling trips as appropriate to maximize sales with the strategic use of travel budget. Also use internal resources to support the territory sales goals.
- Plan and execute in-territory special selling events and book-fairs.
- Develop and implement in-territory promotional campaigns and targeted email campaigns.

Publishing (editorial/marketing) 25%

- Report, track, and sign editorial projects.
- Gather and communicate significant market feedback and information to publishing groups.

Territory Management 15%

- Track and report all pending and closed business in assigned database.
- Maintain records of customer sales interviews and adoption situations in assigned database.
- Manage operating budget strategically.
- Submit territory itineraries, sales plans, and sales forecasts as assigned.
- Provide superior customer service and maintain professional bookstore relations in assigned territory.

Decision-Making Responsibilities for This Position:

Determine the strategic use of assigned sampling budget to most effectively generate sales revenue to exceed sales goals.
Determine the priority of customer and account contacts to achieve maximum sales potential.
Determine where in-person presentations and special selling events would be most effective to generate the most sales.

Know Your Employment Law

Writing Job Descriptions That Comply with the Disabilities Act

Let's take a look…

WORKING CONDITIONS OF PERSONS WITH DISABILITIES

- After the 3 December has been proclaimed as “International Day of Persons with Disabilities” in 1992, “**The Convention on the Rights of Persons with Disabilities and its Optional Protocol**” which is signed and ratified by Turkey, was adopted on 13 December 2006 at the United Nations.

- In **private sector** workplaces employing fifty or more employees within the boundaries of a province, employer must employ disabled persons, numbers of which cannot be less than the %3 of total employees.

- - must be consistent with their occupational skills and physical and mental capacities.
- - cannot be forced to work on hazardous and hard works without a health report stating that he can work on these types of tasks.
- -not any underground and underwater work, and employees engaged in underground
- - should not be worked at nights.
- - take the necessary measures to preserve their health, employ them in the works appropriate to their profession, and provide the necessary tools and equipment required for their work.
- - the starting and ending hours of work can be determined in accordance with the disabled's needs.
- - no wage discrimination.

Standards of Performance and Working Conditions

Standards the company expects the employee to achieve for each of the job description's main duties and responsibilities.

One way to set standards is to finish the statement, "I will be completely satisfied with your work when…."

Writing Job Specifications

The job specification takes the job description and answers the question,

"What human traits and experience are required to do this job effectively?"

CASE

- **Company Background**
- **“Anatolia Coffee Co.”** is a fast-growing Turkish café chain based in İstanbul.
  The company plans to expand from 15 to 25 locations next year and needs to hire **a new Store Manager** for its busy Beşiktaş branch.
- Currently, turnover among baristas and supervisors is high, and service quality varies across stores.
  The HR department has decided to conduct a **job analysis** before recruiting, to ensure that the new Store Manager’s role is clearly defined and aligned with company goals.

- **Your Task**

- As HR specialists at Anatolia Coffee, your team must:
- Draft a **Job Description (JD)** – what the job involves.
- Draft a **Job Specification (JS)** – what kind of person is suitable for the job.

GUIDING INFORMATION FOR THE CASE

- **A. Job Analysis Data (Collected from interviews & observation)**
- The Store Manager supervises **8–10 employees** (baristas, cashiers, shift leads).
- Responsible for **daily operations**, customer satisfaction, and stock control.
- Reports to **the Regional Operations Manager.**
- Works 6 days/week, often weekends.
- Uses company systems for inventory, shift planning, and sales reporting.
- Expected to manage conflicts, train staff, and ensure hygiene standards.

- **Step 1: Write a Sample Job Description (JD)**
- Include:
- **Job Title**
- **Reports To**
- **Main Duties / Responsibilities** (5–7 points)
- **Working Conditions**
- **Performance Standards / KPIs**

- **Step 2: Write a Sample Job Specification (JS)**
- Include:
- **Education & Qualifications**
- **Experience**
- **Technical Skills**
- **Soft Skills / Competencies**
- **Other Requirements** (e.g., language, mobility, personality traits)

HOTEL PARIS

- The company`s job descriptions were out of date and that many jobs had no descriptions at all.

- The manager knew that without accurate job descriptions, all the important work would not work.

- How was this handled?

Translating Strategy into HR Policies and Practices Case*,§

**The accompanying strategy map for this chapter is in MyManagementLab, and the overall map on the inside back cover of this text outlines the relationships involved.*

Improving Performance at The Hotel Paris

The New Job Descriptions

The Hotel Paris's competitive strategy is "To use superior guest service to differentiate the Hotel Paris properties, and to thereby increase the length of stay and return rate of guests, and thus boost revenues and profitability." HR manager Lisa Cruz must now formulate functional policies and activities that support this competitive strategy and boost performance by eliciting the required employee behaviors and competencies.

As an experienced human resource director, the Hotel Paris's Lisa Cruz knew that recruitment and selection processes invariably influenced employee competencies and behavior and, through them, the company's bottom line. Everything about the workforce—its collective skills, morale, experience, and motivation—depended on attracting and then selecting the right employees.

In reviewing the Hotel Paris's employment systems, she was therefore concerned that virtually all the company's job descriptions were out of date, and that many jobs had no descriptions at all. She knew that without accurate job descriptions, all her improvement efforts would be in vain. After all, if you don't know a job's duties, responsibilities, and human requirements, how can you decide whom to hire or how to train them? To create human resource policies and practices that would produce employee competencies and behaviors needed to achieve the hotel's strategic aims, Lisa's team first had to produce a set of usable job descriptions.

A brief analysis, conducted with her company's CFO, reinforced that observation. They chose departments across the hotel chain that did and did not have updated job descriptions. While they understood that many other factors might be influencing the results, they believed that the statistical relationships they observed did suggest that having job descriptions had a positive influence on various employee behaviors and competencies. Perhaps having the descriptions facilitated the employee selection process, or perhaps the departments with the descriptions just had better managers. In any case, Lisa received the go-ahead to design new job descriptions for the chain.

While the resulting job descriptions included numerous traditional duties and responsibilities, most also included several competencies unique to each job. For example, job descriptions for the front-desk clerks included competencies such as "able to check a guest in or out in five minutes or less." Most service employees' descriptions included the competency, "able to exhibit patience and guest supportiveness even when busy with other activities." Lisa knew that including these competencies would make it easier for her team to devise useful employee selection, training, and evaluation processes.

Questions

In teams or individually:

4-22. Based on the hotel's stated strategy and on what you learned here in Chapter 4 of Dessler Human Resource Management, list at least four more important employee behaviors important for the Hotel Paris's staff to exhibit.

4-23. If time permits, spend some time prior to class observing the front-desk clerk at a local hotel. In any case, create a job description for a Hotel Paris front-desk clerk.

HOTEL PARIS: IMPROVING PERFORMANCE AT THE HOTEL PARIS – THE NEW JOB DESCRIPTIONS

- The ability to project a positive attitude and put the customer's needs first, even if the customer is curt.
- Showing tact and discretion in responding to personal requests from a hotel guest.
- Being aware of the reactions of others and responding to those reactions in an appropriate way.
- Being able to handle multiple priorities without getting "flustered."
- The ability to resolve billing issues with discretion and a positive demeanor.
-

PRACTICE

- Prepare a job specification for a customer service representative at bank.
- What sort of a job specification would you develop for a bank manager?

- To what extent do these job specifications differ from each other?
- Provide a detail job description for each of the above-mentioned positions and create a job advertisement for each

Continuing Case

Carter Cleaning Company

The Job Description

Based on her review of the stores, Jennifer concluded that one of the first matters she had to attend to involved developing job descriptions for her store managers.

As Jennifer tells it, her lessons regarding job descriptions in her basic management and HR management courses were insufficient to convince her of the pivotal role job descriptions actually play in the smooth functioning of an enterprise. Many times during her first few weeks on the job, Jennifer found herself asking one of her store managers why he was violating what she knew to be recommended company policies and procedures. Repeatedly, the answers were either "Because I didn't know it was my job" or "Because I didn't know that was the way we were supposed to do it." Jennifer knew that a job description, along with a set of standards and procedures that specified what was to be done and how to do it, would go a long way toward alleviating this problem.

In general, the store manager is responsible for directing all store activities in such a way that quality work is produced, customer relations and sales are maximized, and profitability is maintained through effective control of labor, supply, and energy costs. In accomplishing that general aim, a specific store manager's duties and responsibilities include quality control, store appearance and cleanliness, customer relations, bookkeeping and cash management, cost control and productivity, damage control, pricing, inventory control, spotting and cleaning, machine maintenance, purchasing, employee safety, hazardous waste removal, human resource administration, and pest control.

The questions that Jennifer had to address follow.

Questions

4-18. What should be the format and final form of the store manager's job description?

4-19. Is it practical to specify standards and procedures in the body of the job description, or should these be kept separate?

4-20. How should Jennifer go about collecting the information required for the standards, procedures, and job description?

4-21. What, in your opinion, should the store manager's job description look like and contain?

CONTINUING CASE: CARTER CLEANING COMPANY – THE JOB DESCRIPTION

- This lists the standards the employee is expected to achieve under each of the job description's main duties and responsibilities, and would address the problem of employees not understanding company policies, procedures, and expectations.

- In addition, students may recommend that Jennifer instead take a competency-based approach, which describes the job in terms of the measurable, observable, and behavioral competencies that an employee doing that job must exhibit.
- Because competency analysis focuses more on "how" the worker meets the job's objectives or actually accomplishes the work, it is more worker-focused.
-

- 2-They do not need to be kept separately, and in fact both Jennifer and the employees would be better served by incorporating standards and procedures into the body of the description.
- The exception to this would be if the standards and procedures are so complex or involved that it becomes more pragmatic to maintain a separate procedure manual.
-

- She should first conduct the job analysis by collecting information about the work activities, human behaviors, machines, tools, equipment, work aids, performance standards, job context, and human requirements.
- The best methods for collecting this information in this case are through interviews, questionnaires, observations, and employee diaries/logs. In addition, she should ensure that she is identifying the essential functions of the job, and that the descriptions are ADA-compliant.

- 4-The store manager's job description should include a list of the job's significant responsibilities and duties.

- For example, the following duties should include
- quality control, store appearance and cleanliness, customer relations, bookkeeping and cash management, cost control and productivity, damage control, pricing, inventory control, etc.

- The job description should also include any educational requirements as well as information regarding working conditions.

11 POPULAR METHODS FOR SCREENING CANDIDATES

#1 – CV or Resume screening

#2 – Cover letters

#3 – Phone screening

#4 – Skills assessments

#5 – Video interviews

#6 – ATS screening

#7 – Reference and background checks

#8 – Social media screening

#9 – Take-home assignments

#10 – Gamified job simulations

#11 – Paid trial projects

APPLICATION CASE: TALENT MANAGEMENT AT DUBAI AIRPORT

- 1- A number of Dubai Airport's elements may appeal to prospective employees. According to Dubai Airport's unique HR philosophy for managing talent, they need innovative thinkers ready for any challenge. It represents those elements in the five key values that are at the heart of Dubai Airport's HR approach, "we are proud, ambitious, energetic, caring, and reliable."

- 2-Several elements of the talent management process can easily be recognized in the talent management process of Dubai Airport such as ensuring all talent management functions are goal-directed; management focuses on all functions required for managing the firm's talent; using the same set of competencies for all talent management activities; actively managing each employee's segment; and integrating all talent management functions.

BBA-3211 Human resource management

2026, Fall/Winter

DR. CAGLA OZGOREN
CAGLA.OZGOREN@BAU.EDU.TR

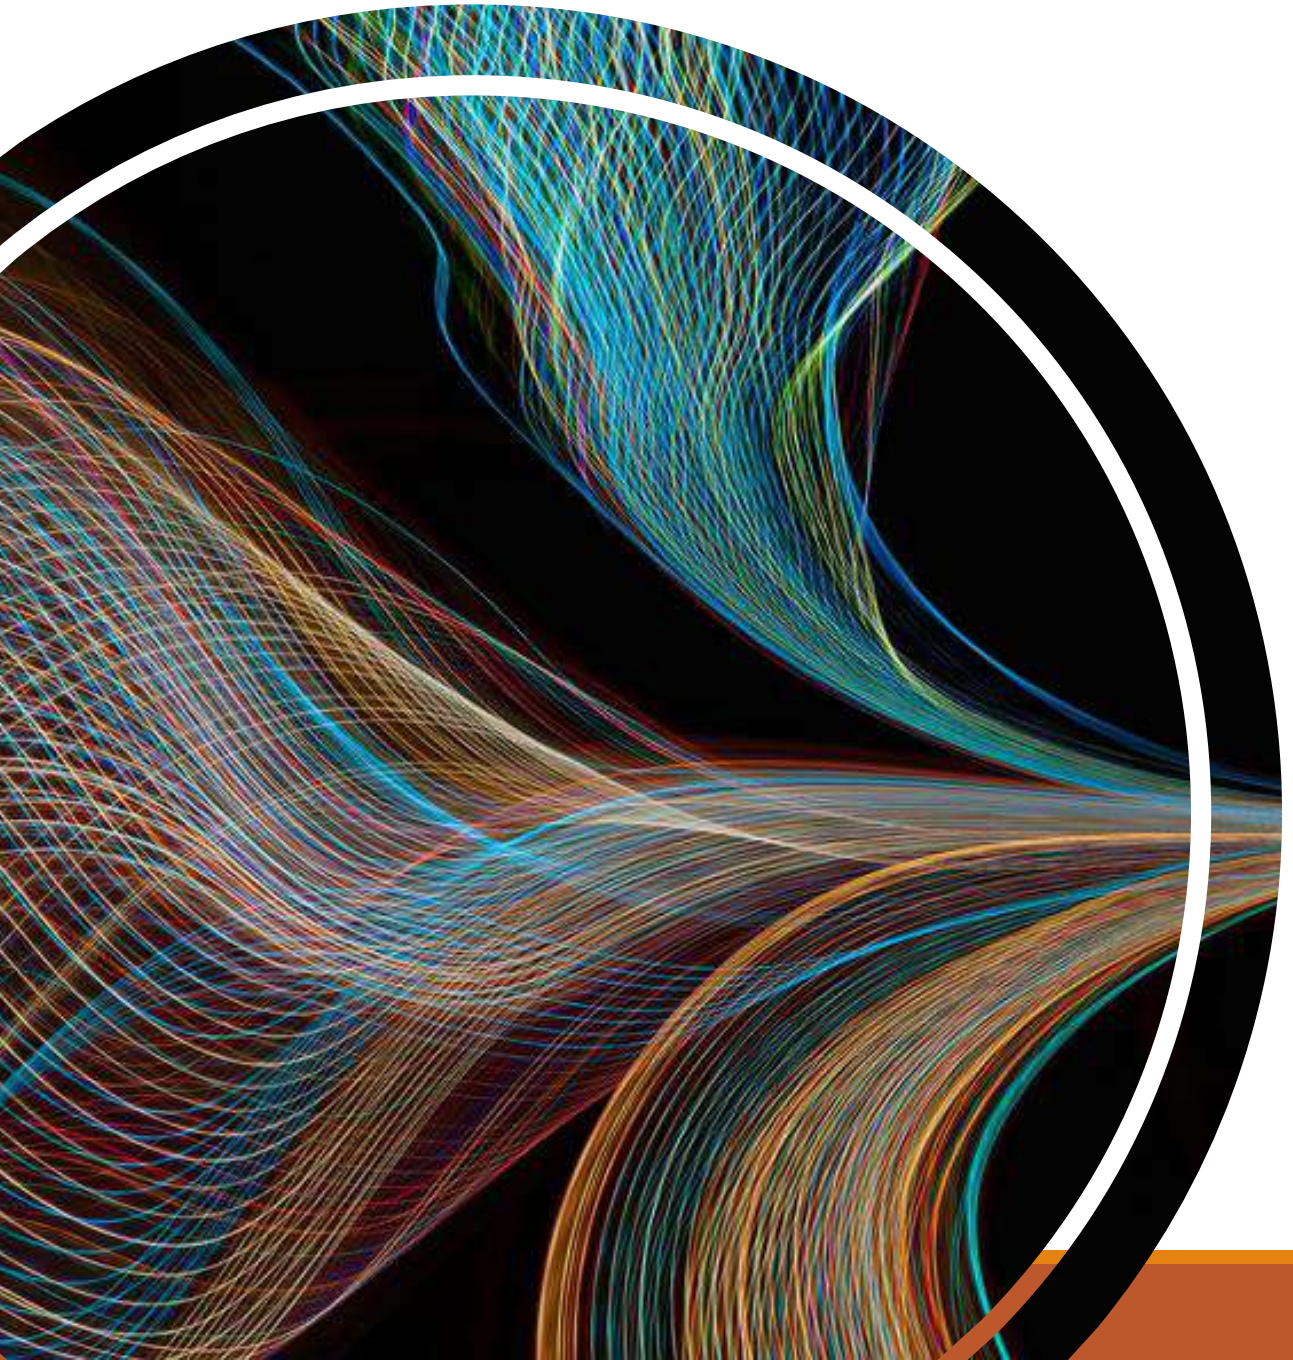

Learning Objectives

What is strategy?

TYPES OF STRATEGIES

- **Corporate Strategy:** What business are we in? (growth, diversification, mergers).
- **Competitive Strategy:** How do we compete? (Porter's cost leadership, differentiation, focus).
- **Functional Strategy:** How do departments—especially HR—support these goals?

CORPORATE STRATEGY

- Identifies the portfolio of businesses that, in total, comprise the company and how these businesses relate to each other

"I'm 100% behind it, but I'm swamped. Who can run with this?"

CORPORATE-LEVEL STRATEGIES

- **Concentration** (specific market, segment, product or geographic area)
- **Diversification** (includes entering new markets, developing new products or services, or expanding into new industries)
- **Vertical Integration** (backward or forward integration)
- **Consolidation (**acquiring or merging with other companies in the same industry to create a larger, more competitive entity)
- **Geographic expansion**

Consolidation in Airlines

Mergers/acquisitions among airlines often aim to expand route networks, reduce duplicated costs, and increase competitive power.

What changes?

- Larger route network
- More passengers + market share
- Lower duplicated costs
- Stronger bargaining power
- Bigger, more competitive airline

Simple explanation:

Two competitors become one larger company to compete more effectively.

2013 — **American Airlines + US Airways**

Created a larger US carrier with broader domestic and international coverage.

2008 — **Delta + Northwest Airlines**

Expanded Delta's network and strengthened its hub system.

2010 — **United + Continental**

Combined two major US networks into one stronger airline.

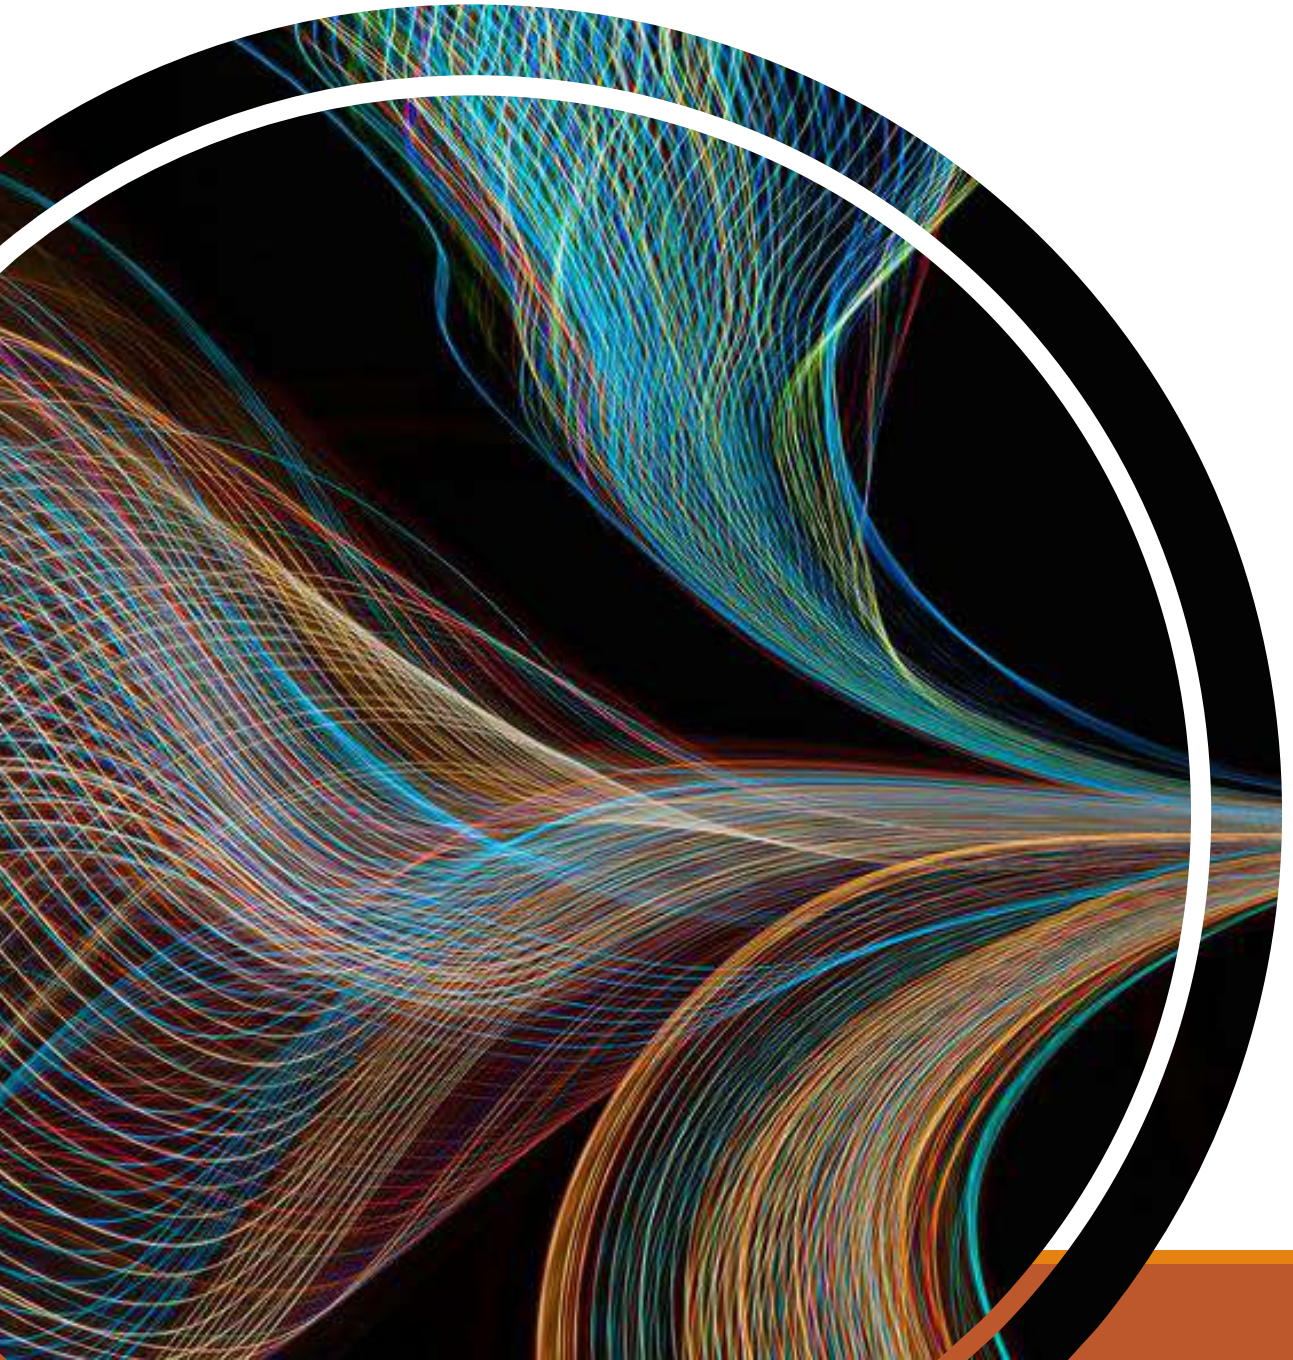

2004 — **Air France + KLM**

Formed a major European airline group while keeping both brands.

2005 — **Lufthansa + SWISS**

Strengthened Lufthansa Group's European network and premium positioning.

Example sentence for class: "American Airlines and US Airways consolidated to create a larger airline with a wider route network and stronger competitive position."

COMPETITIVE STRATEGY

- **A strategy that identifies how to build and strengthen the business's long-term competitive position in the marketplace, which is also known as business-level competitive strategy.**

THE THREE STANDARD COMPETITIVE STRATEGIES

- Cost Leadership
- Differentiation
- Focus

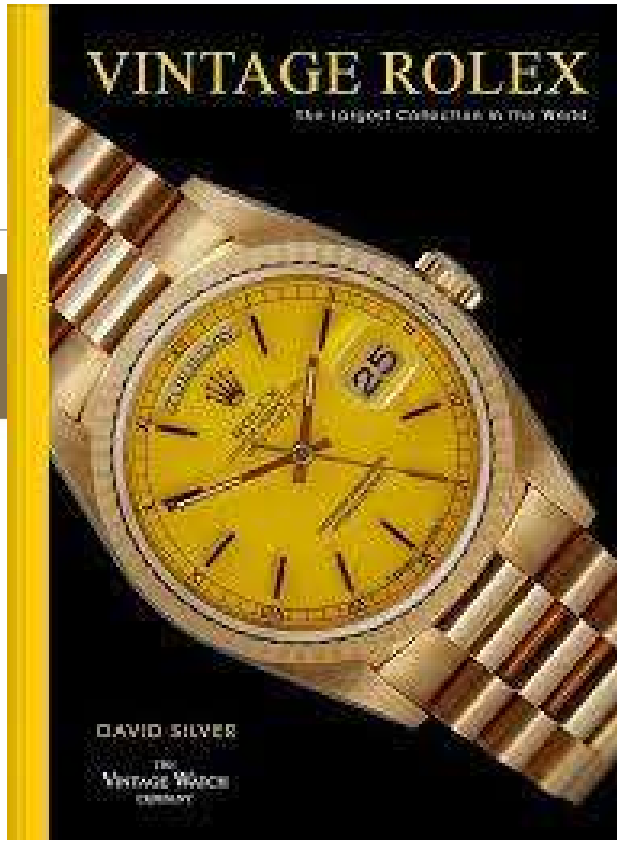

1- low cost provider strategy

Appealing to a broad spectrum of customers based on being the overall low-cost provider of a product or service.

E.g. Walmart: the firm`s advertising slogan such as `Always Low Prices` and `Save Money. Live Better`

2-Differentiation strategy

Options for Differentiating

Companies can pursue differentiation from many angles:

- ☐ ***Unique taste*** – Dr. Pepper, Listerine
- ☐ ***Multiple features*** – Microsoft Office, iPhone, iPod, iPad
- ☐ ***Wide selection*** and ***one-stop shopping*** – Amazon.com
- ☐ ***Superior service*** – FedEx
- ☐ ***Engineering design and performance*** – Mercedes, BMW
- ☐ ***Prestige and distinctiveness*** – Rolex
- ☐ ***Product reliability*** – Johnson & Johnson
- ☐ ***Quality manufacture*** – Michelin, Honda
- ☐ ***Technological leadership*** – 3M Corporation
- ☐ ***Full range of services*** – Charles Schwab
- ☐ ***Wide selection/many varieties*** – Campbell's soups
- ☐ ***High-fashion design*** – Gucci and Chanel

3-Focus strategy

A focus strategy is a business approach that concentrates on serving a specific niche or segment of the market rather than trying to appeal to a broad customer base.

- **Cost Focus Strategy**

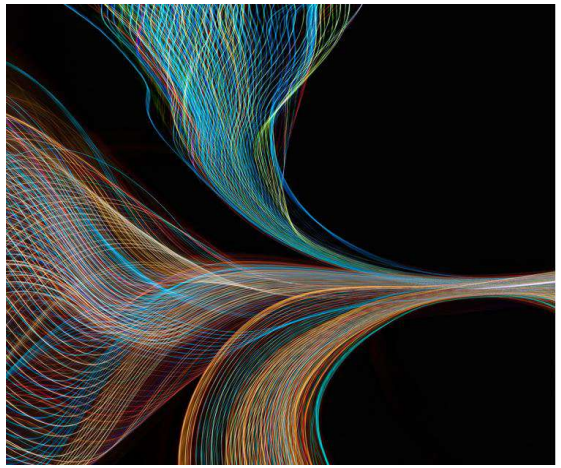

Tato nano cars

- **Differentiation Focus Strategy**

- **Tiffany & Co**
- **Ritz-Carlton**
- **Patagonia**

Functional Strategy

- **A strategy that identifies the broad activities that each department will pursue in order to help the business accomplish its competitive goals.**

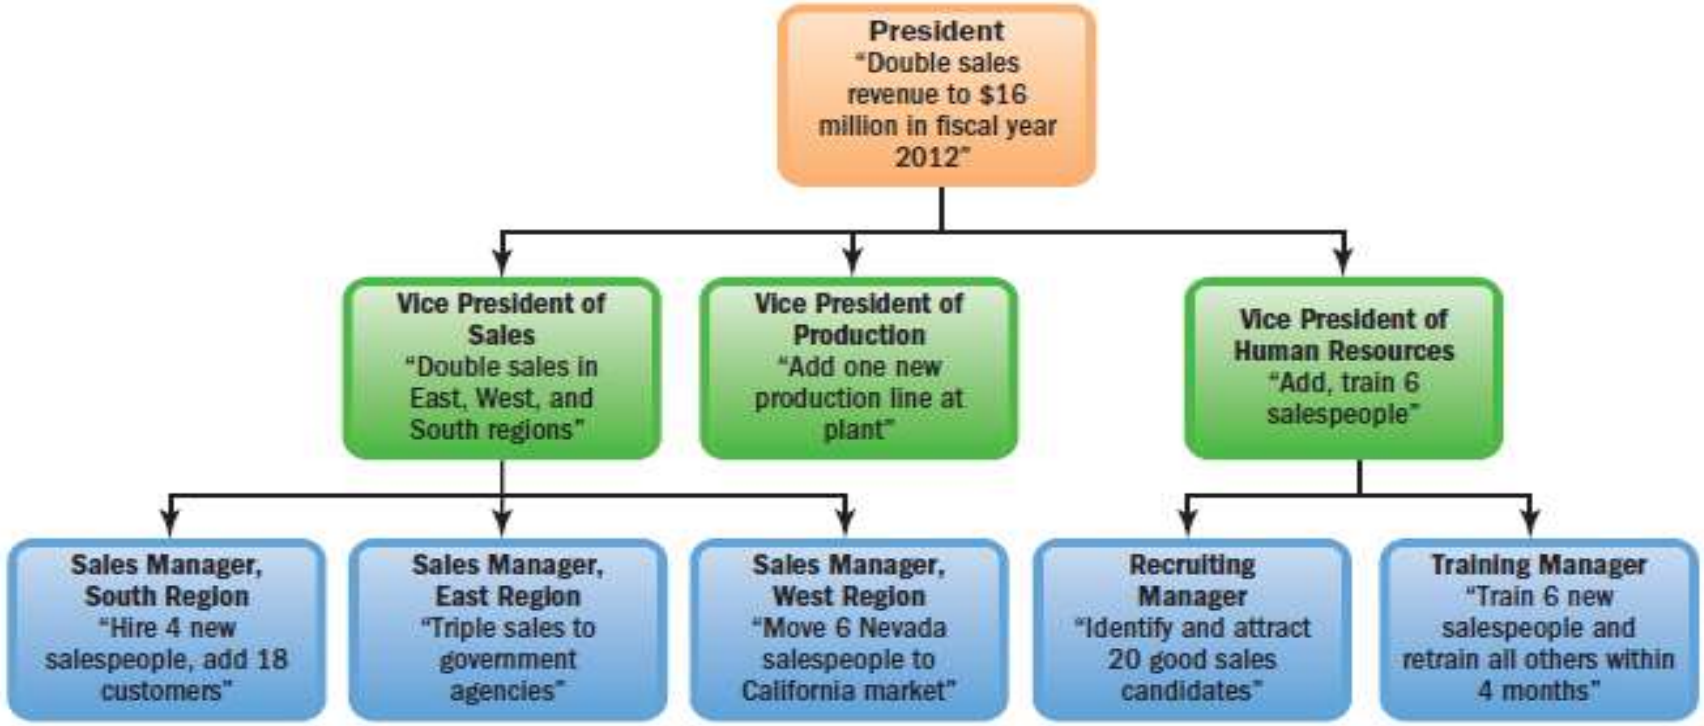

FIGURE 3-1 Sample Hierarchy of Goals Diagram for a Company

THE MANAGEMENT PLANNING PROCESS

- The Hierarchy of Goals
- Policies and Procedures

THE STRATEGIC MANAGEMENT PROCESS

STRATEGIC
PLANNING

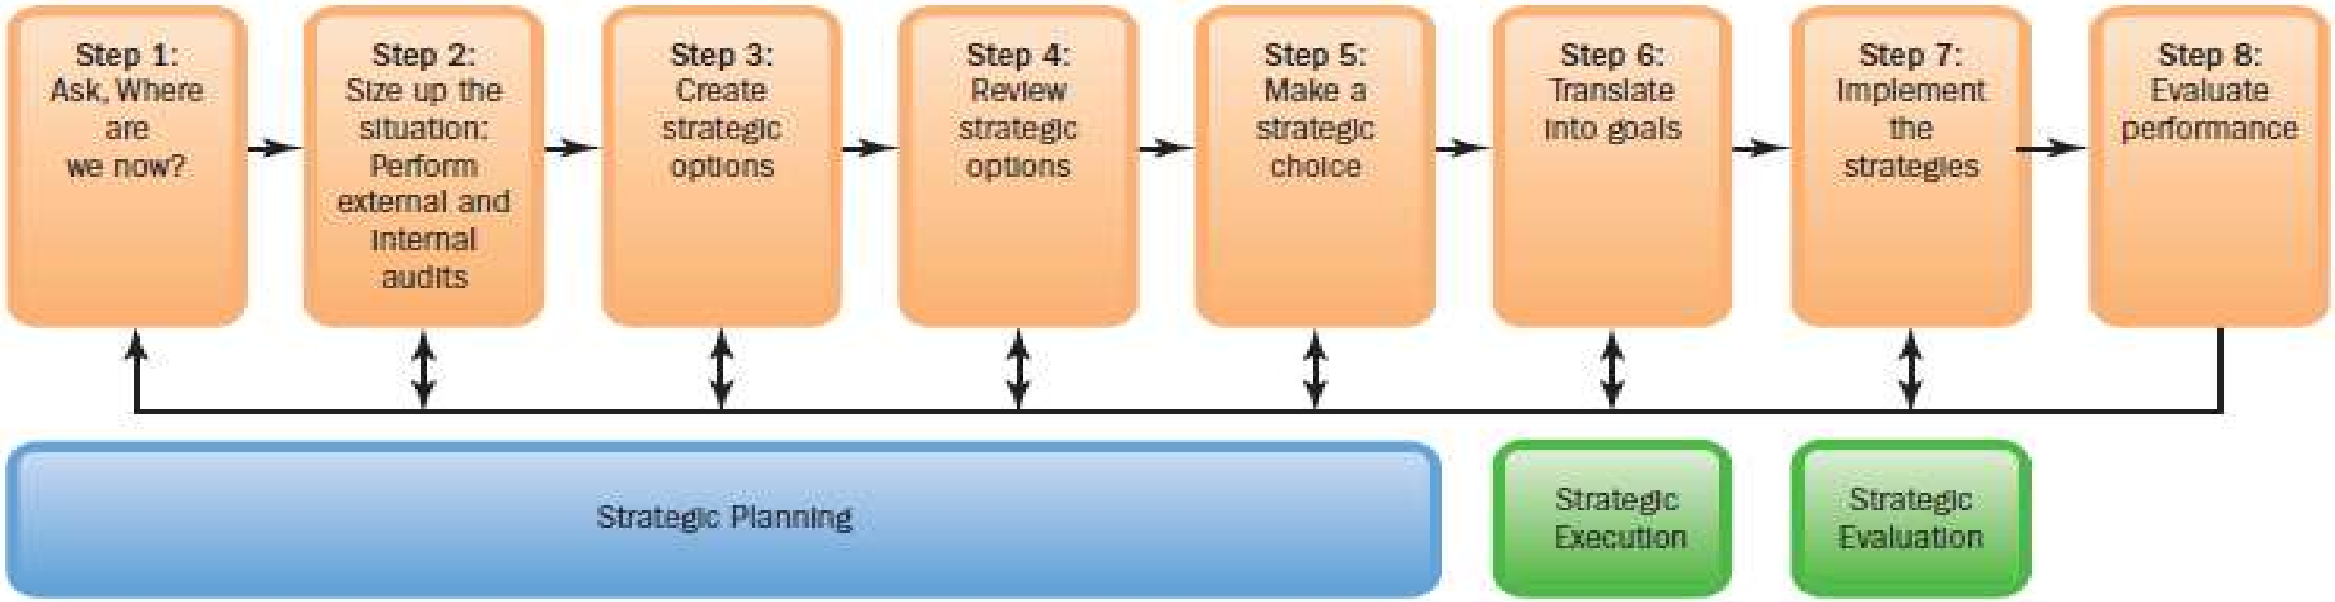

FIGURE 3-2 The Strategic Management Process

THE STRATEGIC MANAGEMENT PROCESS

What is Strategic Human Resource Management?

Strategic human resource management **– means formulating and executing human resource policies and practices that produce the employee competencies and behaviors the company needs to achieve its strategic aims.**

The Strategic Context

The Shanghai Ritz-Carlton Portman Hotel

Let's talk about it…

Interesting Issues:

When the Ritz-Carlton Company took over managing the Portman Hotel in Shanghai, China, the hotel already had a good reputation among business travelers. However, **many luxury hotels were opening there.**

To stay competitive, the Portman's new managers decided to **reposition the hotel with a new strategy, one that emphasized outstanding customer service.** But they knew that improving the service would require new employee behaviors, and therefore new selection, training, and pay policies and practices. We will see what they did.

Their HR strategy involved taking these steps:

- *Strategically*, they **set the goal of making the Shanghai Portman outstanding** by offering superior customer service.

- To achieve this, Shanghai Portman **employees would have to exhibit new *skills and behaviors***, for instance, in terms of how they treated and responded to guests.

- To produce these employee skills and behaviors, **management formulated new human resource management *plans, policies, and procedures*.** For example, they introduced the Ritz-Carlton Company's *human resource system* to the Portman: "Our selection [now] focuses on **talent and personal values** because these are things that can't be taught … it's about caring for and respecting "**best employer in Asia**," "overall best business hotel in Asia," and "best business others." Management's efforts paid off.

Their new human resource plans and practices helped to produce the employee behaviors required to improve the Portman's level of service, thus attracting new guests. Travel publications were soon calling it the hotel in China." Profits soared, in no small part **due to effective strategic human resource management.**

IMPROVING PERFORMANCE: *HR*
As a Profit Center

The Zappos "WOW" Way

Let's talk about it…

IMPROVING PERFORMANCE: *HR As a Profit Center*

The Zappos "WOW" Way

When your strategy involves selling shoes and clothes online to people who can't try them on, you need employees who are energized and enjoy what they're doing—Zappos wants employees to deliver "WOW" through service.[16] That's why Zappos' founders knew they needed special methods for hiring, developing, and retaining employees, and that's just what they created. As their website says, "This ain't your mama's HR! Recruiting, benefits, and employee relations keep this cruise ship afloat with fun, inventive ways of getting employees motivated and educated about the Zappos Family of companies, their benefits, and the other fun stuff going on around here!"[17]

While they may not appeal to everyone, these "fun, inventive techniques" include interviewing job applicants in what looks like the set of a talk show, asking employees to submit their own designs for Steve Madden shoes, and (during Zappos' annual "Bald & Blue Day") having some employees volunteer to shave their heads or dye their hair blue.[18] And, by the way, if you're not happy working at Zappos, the company will pay you to leave—it wants no one there who doesn't truly want to be there.

Again, that may not be for everyone, but it works for Zappos. It knows that selling online successfully requires energized employees who really enjoy what they're doing. Management uses these special HR practices to cultivate the energized and fun environment that Zappos needs to execute its strategy, and judging from Zappos' success they seem to be working. ■

https://www.youtube.com/watch?v=VVq4drduglA

Joie de Vivre Hospitality – Key Points

Average pay, unusually low turnover: JDV pays roughly **industry-average wages**, yet employee turnover is only about **25%**, compared with approximately **65–100% in the hotel industry**.

Financial incentives are not everything: Founder **Chip Conley** argues that pay matters, but employee motivation also comes from **relationships, belonging, recognition and purpose.**

Maslow's Hierarchy of Needs: JDV applies Maslow to employees — starting with **security/survival needs** and moving toward belonging, esteem and self-actualisation.

Protecting employees during crisis: During the dot-com crash/post-9/11 downturn, Conley reportedly took **no salary for 3.5 years**.

Senior executives took a 10% pay cut rather than pushing the burden entirely onto frontline workers.

Salaried employees had a 2.5-year pay freeze, helping the company protect hourly/line employees' jobs, benefits and annual wage increases.

Employee benefits beyond salary: Employees were offered **free hotel stays twice per quarter** as part of the benefits package. Other benefits included **free hotel stays**, **50% discounts on spa treatments**, and for salaried employees, a **one-month paid sabbatical every three years**.

Job security → performance: Management believed that making employees feel safe during difficult periods helped improve **productivity and commitment**.

Strong relationships reduce turnover: Employees stay not simply because of money, but because of their **relationships with colleagues and the organisation**.

Discussion Question	Suggested Answer
1. How does Zappos use HR practices to support its business strategy?	Zappos recruits, develops and retains employees who fit its customer-service culture. HR practices help create energized employees who can deliver exceptional service.
2. Why can employees be a source of competitive advantage for Zappos?	Because competitors can copy products or prices more easily than they can copy a strong service culture and committed workforce.
3. Zappos became famous for offering new employees money to leave. Why might this improve performance?	It helps identify employees who genuinely want to stay and fit the culture, potentially increasing commitment and reducing poor person–organization fit.
4. Could Zappos' HR practices work in every company?	No. HR practices need to fit the company’s strategy, industry and workforce. A highly expressive culture may work well for a customer-service retailer but not necessarily for every organization.

How Sustainability or CSR could be achieved through Strategic Human Resource Management?

Group Work – 10 Minutes

Imagine you are the **HR management team of a company.**

1. Define Your Company

Briefly decide:

Company **size and main operations**

Competitive strategy: **Low Cost, Differentiation, or Focus**

2. Develop 5 HR Practices

Suggest **one HR practice** for each area:

Recruitment & Selection – Who would you hire and why?

Training – What training would employees need?

Performance Appraisal – How would you evaluate performance?

Compensation & Benefits – How would you reward employees?

Fair Treatment & Diversity – How would you promote fairness and inclusion?

Final Question

How do these HR practices support your company's **competitive strategy** and make it more **socially responsible**?

Be ready to briefly share your ideas with the class.

How Sustainability or CSR could be achieved through Strategic Human Resource Management?

1) Talent Acquisition and Recruitment: environmental sust. sorts of jobs the company will need to recruit for

Incorporate Sustainability in Job Descriptions

Actively seek individuals with expertise in sustainability, environmental management, or CSR

2) Employee engagement to CSR

--Develop training programs that educate employees about sustainability practices and the organization's CSR initiatives. (waste production, ethical business)

--Actively involve employees in sustainability projects or initiatives.

3) Performance appraisal systems: Incorporate Sustainability Metrics: Integrate sustainability and CSR metrics into performance evaluations

4) Compensation and Recognition: Reward Sustainable Practices

5) Diversity and Inclusion: Promote diversity and inclusion within the organization as part of the social responsibility agenda. Ensure HR practices are inclusive and unbiased.

6). Reporting and Compliance:

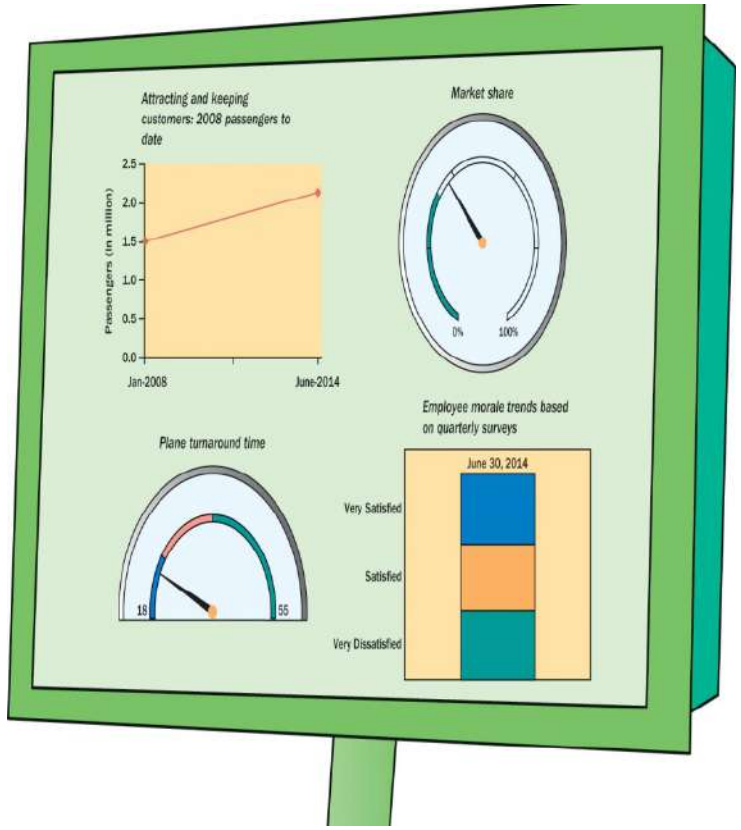

Sustainability Reporting: Work closely with sustainability teams to track, measure, and report on sustainability

examples

`Offering support and encouraging participation as well as paying team members for their volunteer hours…HR is in complete coexistence with the CSR team. ` (**Dubai branch, Hilton**)

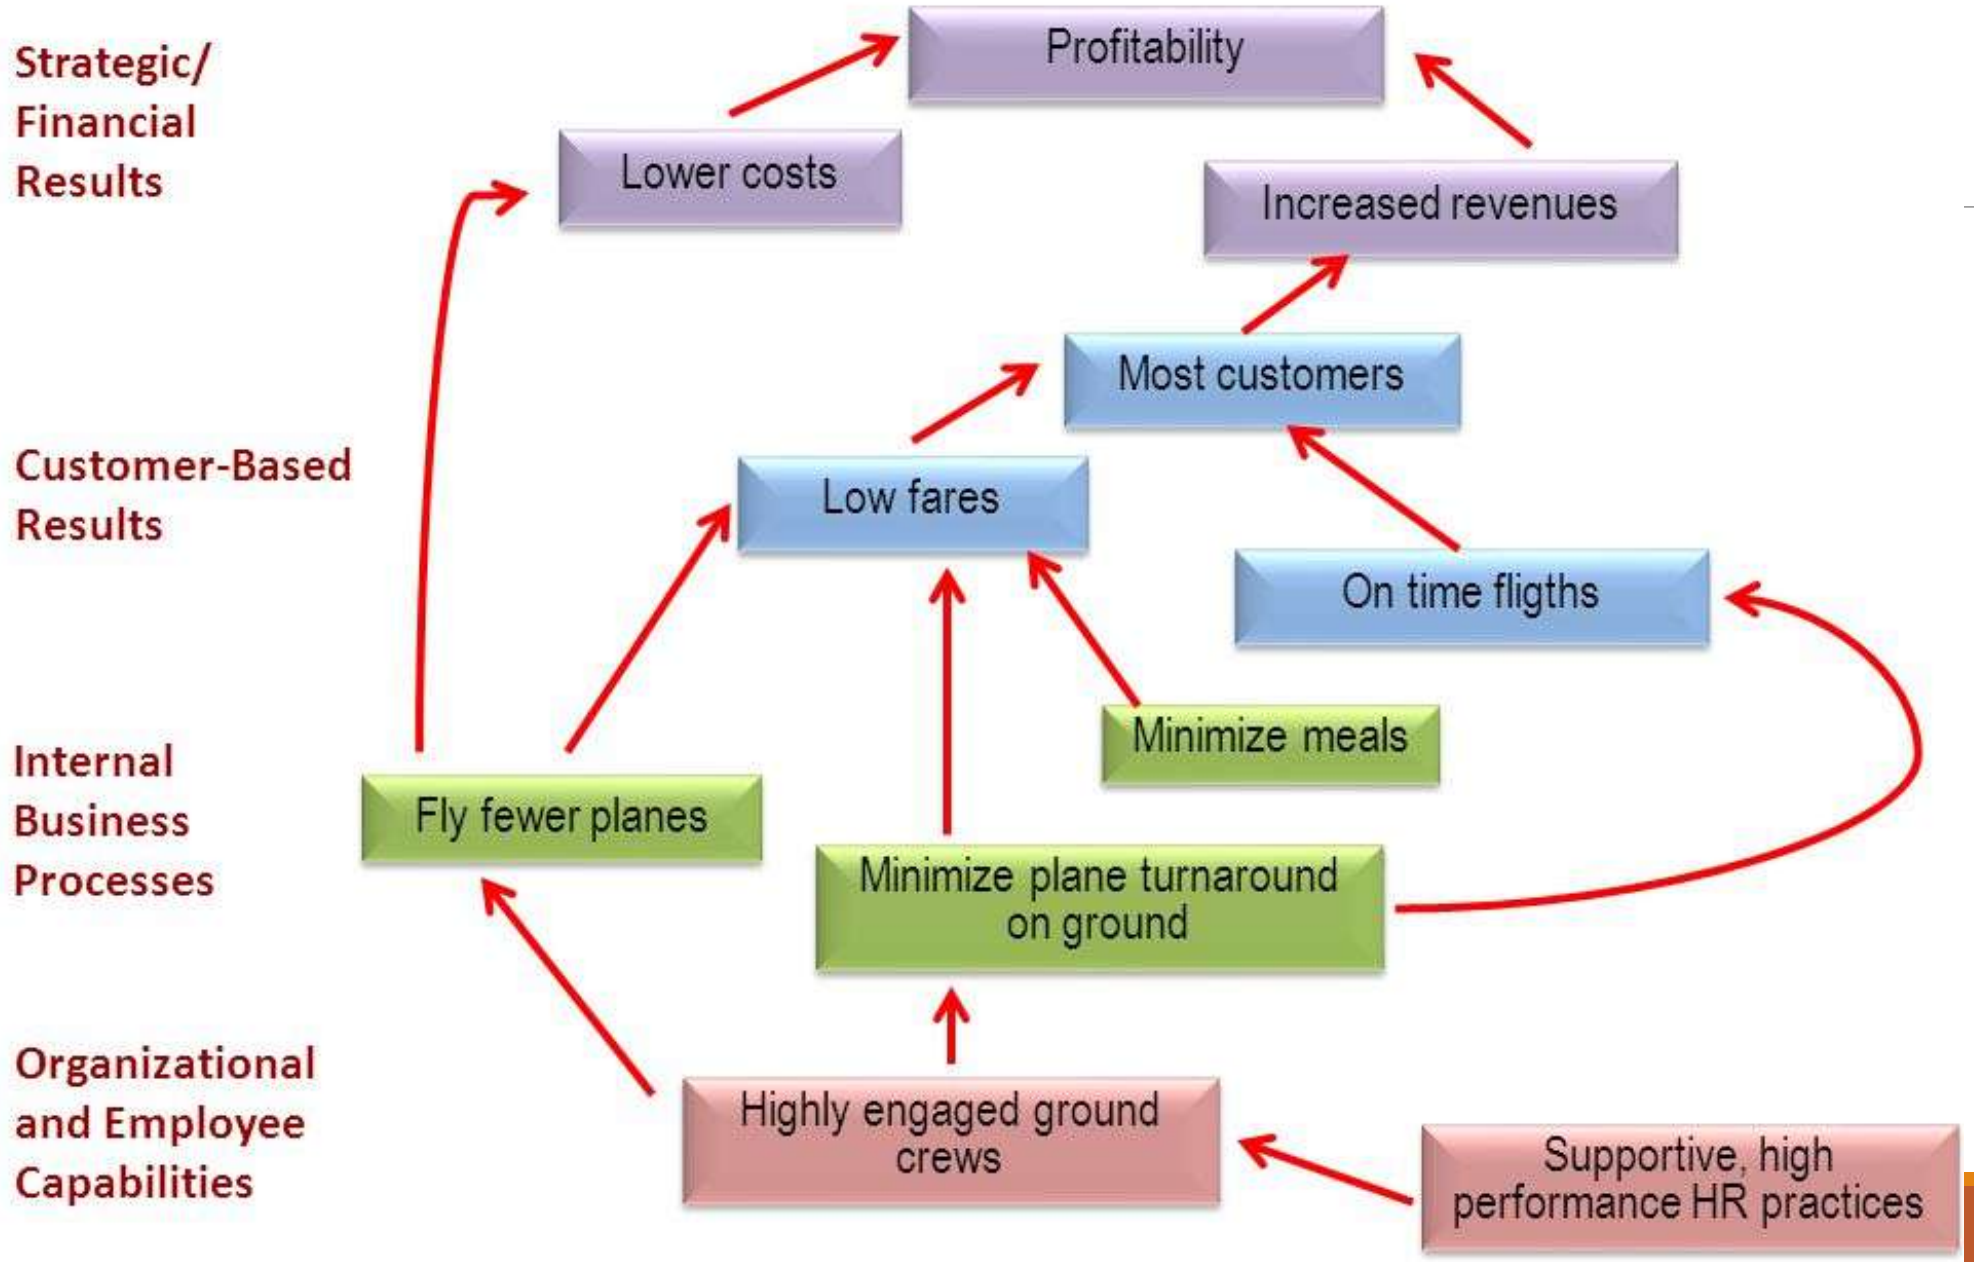

Within our people quadrant, there are two areas we focus on. One is diversity, and the second is developing talent. Within diversity, there are two key areas. One is really developing national talent and the graduate recruitment type of things, the second is woman and business. And you know, we have got a lower number of females within our organisation relative to our global basis, and in particular females in partnership, or at senior levels. So that's something that we are conscious of, and we are looking to work toward. (**Dubai branch, PWC)**

STRATEGIC HUMAN RESOURCE MANAGEMENT TOOLS

- **Classical but still valuable tools**
  - 1.Strategy map
  - 2.Balanced Scorecard
  - 3.The HR scorecard
  - 4. HR Audits
  - 5.Performance Management Systems
- **Recently used HR tools**
  - 6.Workforce analytics (People Analytics)
  - 7. Digital dashboards
  - 8. Talent Management Systems (TMS)
  - 9. Employee Engagement and AI Platforms

FIGURE 3–8 Strategic Map for Southwest Airlines

Siemens

- **How they use it**: Siemens uses HR strategy maps to align employee competencies with the **company’s digital transformation strategy**.
- Siemens' HR maps track skill development, employee engagement, and leadership pipelines to ensure the workforce can support the company's goals in areas like **automation and smart infrastructure.**

Siemens Strategy Map

Vision & Mission:

Support digital transformation through skilled, agile talent

Strategic HR Objectives

- Develop digital skills
- Foster innovation
- Enhance engagement
- Promote agile work pracctices

HR Goals

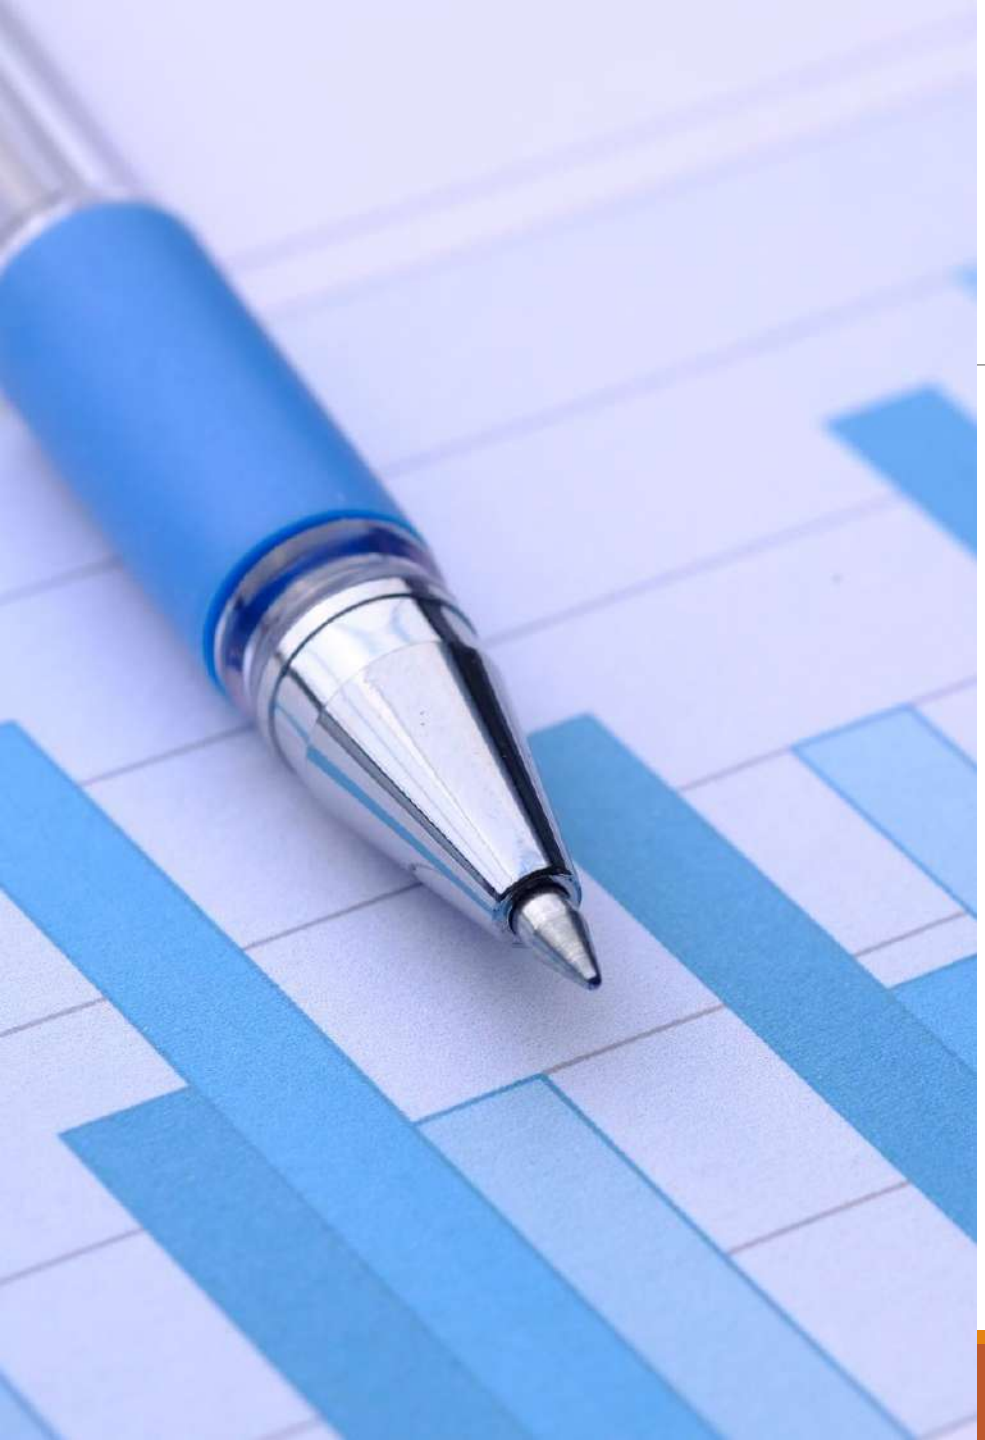

- Attract digital talent
- Upskill employees
- Build leadership work practices

HR Initiatives

- Digital training programs
- Leadership workshops
- Diverse culture

Performance Metrics

- Digital literacy

2.Balanced score cards

- **Purpose**: Aligns HR activities with business objectives by balancing financial and non-financial measures.

- **How it's used**: HR departments **track key performance indicators (KPIs)** in areas like employee development, satisfaction, and turnover, which are linked to broader corporate goals such as profitability or innovation.

- **Example**: Using KPIs like employee retention rate, training effectiveness, and employee engagement to evaluate HR's impact on the company's long-term growth.

Siemens

- **Application:** Uses the Balanced Scorecard to align HR development with digital transformation.
- **Metrics across perspectives:**
  - *Financial:* ROI on digital training.
  - *Customer:* Employee-driven innovation improving client satisfaction.
  - *Processes:* Speed of hiring for high-tech roles.
  - *Learning & Growth:* Digital literacy, leadership pipeline readiness.

Mini-case : Balance score card

Scenario: A retail company launches a new Balanced Scorecard.

- Financial: Increase profit by 10%.
- Customer: Improve satisfaction scores.
- Process: Reduce service time by 20%.
- Learning & Growth: Upskill all frontline staff in digital POS systems.

Question:
Which HR practices (recruitment, training, rewards) should be prioritized to support these goals?

Perspective	Strategic Goal	HR Practices to Support It
Financial	Increase profit by 10%	- **Performance-based rewards** (link pay to sales or service KPIs) - **Productivity-focused training** (e.g., time management, sales conversion) - **Recruit high-performing staff** for sales and management roles.
Customer	Improve customer satisfaction	- **Recruit employees** with strong communication and service orientation. - **Customer service training** to enhance empathy and problem-solving. - **Recognition programs** (e.g., "Customer Hero of the Month") to reinforce quality servi
Internal Process	Reduce service time by 20%	- **Process improvement workshops** (e.g., Lean retail operations). - **Cross-training** employees to handle multiple functions (checkout, returns, inventory). - **Digital skill development** to use POS and inventory systems efficiently.
Learning & Growth	Upskill all frontline staff in digital POS systems	- **Comprehensive digital training programs** (e-learning, simulations). - **Continuous learning culture** (microlearning modules, peer coaching). - **Track learning metrics**: completion rates, digital competency scores.

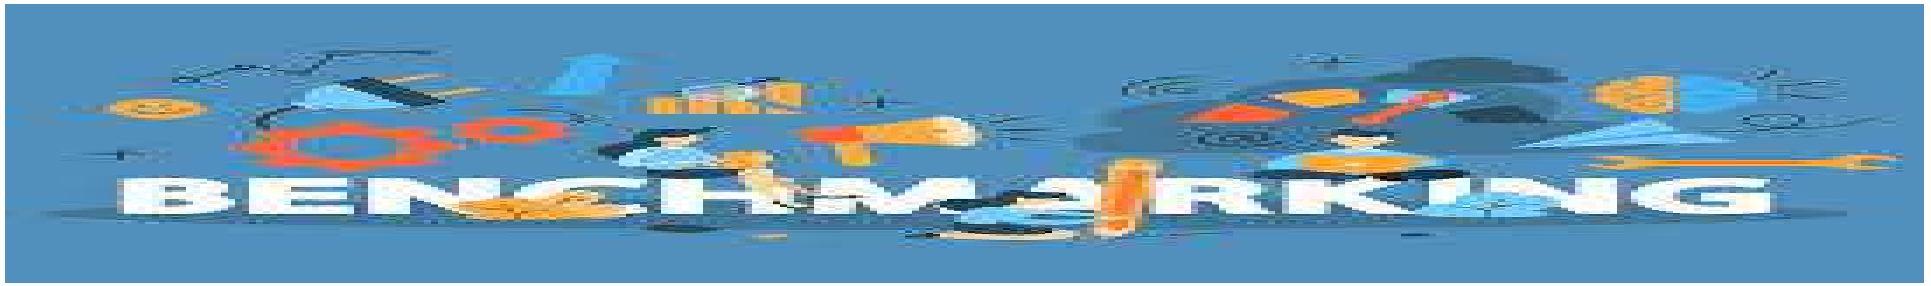

KPI	Current score	Target
• Position in the sector-wide innovation benchmark • Time to market of last 5 new products in days	5 121	Top 3 95
• Satisfaction score of manager after 1 year (*quality of hire*)	0.70	0.85
• Recruitment cost in Dollars	4 MM	3.5 MM
• Time to hire in days • Acceptance ratio in % • Top employer benchmark	38 70% Top 40%	25 90% Top 20%

3. The HR scorecard:

measure *HR's strategic contribution* to business success.

1. HR Deliverables
2. HR System Alignment
3. HR Competencies
4. HR Efficiency / Impact

Talent retention, leadership pipeline, skill development, employee engagement, HR ROI.

The Society for Human Resource Management's (SHRM's) benchmarking service – enables employers to compare their own HR metrics with those of other companies. The employer can request comparable (benchmark) figures not just by industry, but by employer size, company revenue, and geographic region. (See http://shrm.org/research/benchmarks/.)

4. What Are HR Audits? Who conducts HR audits?

(HR) audits are systematic and comprehensive reviews of an organization's HR policies, practices, and procedures **to ensure legal compliance**, effectiveness, and alignment with the organization's strategic goals

HR audits are typically conducted by HR professionals, legal experts, or external consultants.

Recruitment and Selection Audit:
Compliance Audit:
Performance Audit:
Benefit and Compensation Audit:
Training and Development Audit:
Employee Relations Audit:

HR auditing:
data collection example (survey)

HR AUDIT question/CHECKLIST	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
Human Resource Planning					
The organization have plans for ensuring its development					
I believe that HRM is a strategic tool for an organizations that helps for sustainable competitive advantage					
Restrict hiring, giving compensation, reducing working, early retirement are the strategy that this organization are going to be act in case of surpluses of employees exist					
The organization estimates the size and composition of future to ensure survival and growth for sustainable competition with others					
Job analysis provides information about jobs currently being done in organization					
Labor turnover, retirement, resignation, termination, death are the factors that decrease internal supply of organization, but in my company these all factors do not affect the human resource planning					
Recruitment and Selection					
There is a policy in place stating the organization philosophy on recruitment and selection					
The policy contain procedures to guide managers through the recruitment and selection process					
There is a formal process in place for identifying job vacancies					
Recruitment was done proactively from a planning mode as well as reactively to immediate replacement and new job openings					
Mobility of human resources and expansion of the company are the factors that necessitate for new vacancy(recruitment)					
HR department does perform all initial screening of candidates					
Exams and personality profiles are used in the selection process of the company					
Compensation and Benefit					
The compensation policy of the company contain procedures to guide managers on how to implement the compensation system					
Distribution of compensation among departments are reviewed by management for consistency and equity before awarding increases					
The organization have a policy clearly stating its position on employees compensation(salary)					
The organization compensation philosophy clearly communicated to all employees					
The organization have a clear policy regarding employee benefits					
Performance Management and Evaluation					
Performance appraisal do reflect an employee's positive behavior as well as results					

Example: Unilever – Best Practice and Sustainability HR Audit

- **Context:** Unilever integrates HR audits into its *Sustainable Living Plan*.

- **Focus areas:**
- Benchmark HR policies on **gender equity**, **leadership development**, and **sustainability practices**.

- Assess HR's role in achieving UN SDGs (especially SDG 5 – Gender Equality).
- **Outcome:**
Audit results revealed underrepresentation of women in senior leadership → Unilever launched

- **"The Gender Balance Accelerator"** program, increasing female leaders by 6% in one year.

→ *Illustrates how HR audits can support both social impact and performance.*

5. High-Performance Work Systems

is an integrated set of HR practices designed to **enhance employee skills, motivation, and involvement** — in order to improve **organizational performance and innovation**.

HPWS is **not one practice**, but a **system of complementary HR activities** that together create sustainable competitive advantage.
It shifts HR from a **support function** to a **strategic performance driver**.

High-Performance Work Systems

- Policies and Practices
- HR measures
- Aspire to encourage employee involvement and self management

🧩 Core Components of HPWS

Dimension	Key Practices	Goal
1. Selective Recruitment & Staffing	Hire for cultural fit, teamwork, and learning potential.	Build a workforce aligned with strategic goals.
2. Extensive Training & Development	Continuous learning, leadership, digital skills, mentoring.	Enhance capabilities and adaptability.
3. Performance-Based Compensation	Rewards linked to team and organizational results.	Reinforce accountability and motivation.
4. Employee Involvement & Empowerment	Participation in decision-making, problem-solving teams.	Encourage ownership and innovation.
5. Information Sharing	Transparent communication about goals and performance.	Build trust and strategic alignment.
6. Job Design & Work Flexibility	Enriched, autonomous roles; cross-functional teams.	Promote creativity, efficiency, and engagement.

TABLE 3-1 Examples Selected from Several Studies of How Recruitment, Selection, Training, Appraisal, and Other Practices Differ in High-Performance and Low-Performance Companies

	Lower-Performance Companies' HR Practice Averages (e.g., company performance in terms of sales/employee, innovation, and employee retention)*	Higher-Performance Compa HR Practice Averages (e.g., company performance in te sales/employee, innovation employee retention)*
Recruitment: Average number of qualified applicants per position	8	37
Selection: Average percentage of employees hired based on a validated *selection* test	4%	30%
Training: Average number of hours of *training* for new employees	35 hours	117 hours
Appraisal: Average percentage of employees receiving a regular *performance appraisal*	41%	95%
Pay Practices: Average percentage of the workforce eligible for *incentive pay*	28%	84%
Use of Teams: Average percentage of the workforce routinely working in all teams: semiautonomous, cross-functional, or project teams	11%	42%
Self-Directed Teams: Percent of companies with *semiautonomous or autonomous* work teams	9%	70%
Operational Information Sharing: Employees receive relevant operating performance information	62%	82%
Financial Information Sharing: Employees receive relevant financial performance information	43%	66%

Findings rounded.

sed on "Comparison of HR Practices in High-Performance and Low-Performance Companies," by B. E. Becker, et al
Scorecard: Linking People, Strategy and Performance (Boston: Harvard Business School Press, 2001); Barry Macy, G

6. Talent management systems (analysis)

Data creation and process management

Data analytics tools like these also enable employers (including Walmart) to analyze in new ways employee data both on obvious things (like employee demographics, training, and performance ratings), but also data from new sources (like company internal social media sites, GPS tracking, and e-mail activity).

Human Capital Facts. For example, **"What are the key indicators of my organization's overall health?"** JetBlue found that employee engagement correlated with financial performance.

Analytical HR. For example, **"Which units, departments, or individuals need attention?"** Lockheed Martin collects performance data in order to identify units needing improvement.

Human Capital Investment Analysis. For example, **"Which actions have the greatest impact on my business?"** By monitoring employee satisfaction levels, Cisco was able to improve its employee retention rate from 65% to 85%, saving the company nearly $50 million in recruitment, selection, and training costs.

HRIS (Human Resource Information System)	Employee records, job history, attendance, pay, promotions	Turnover, absenteeism, internal mobility
ATS (Applicant Tracking System)	Recruitment and selection data	Time-to-hire, cost-per-hire, source effectiveness
LMS (Learning Management System)	Training and development	Learning hours, training completion rates
Performance Management Systems	Performance appraisals, goals, feedback	Ratings, performance trends, potential indicators
Payroll Systems	Compensation, benefits, overtime	Pay equity, benefits utilization

🧩 5 External & Public Data

Sometimes HR combines internal data with external benchmarks or labor market insights.

Type	Source Examples	Use Case
Benchmark Data	LinkedIn Talent Insights, Mercer, Glassdoor	Compare pay, turnover, or engageme across the industry
Labor Market Data	OECD, ILO, national statistics	Workforce planning and policy desig
Employer Branding Data	Social media sentiment, review sites	Monitor reputation and candidate perceptions

7.Workforce analytics (People Analytics)

Data interpretation and insight generation

People Analytics refers to the systematic use of data, statistical analysis, and technology to understand, predict, and improve workforce performance and organizational outcomes.

It transforms HR from intuition-based decisions to evidence-based decision-making.(Bassi & McMurrer, 2016)

examples

IBM – Predictive Attrition Model

- **What they did:** Built AI models predicting **which employees were at risk of leaving.**
- **Accuracy:** 95% predictive accuracy.
- **Outcome:** Saved millions in turnover costs through targeted retention efforts.

Google – People Analytics Pioneer

- **Program:** *Project Oxygen*
- **Goal:** Identify **what makes managers effective.**
- **Finding:** Coaching, communication, and empowerment matter more than technical skills.
- **Action:** Google redesigned leadership training based on these findings.
  → Resulted in *higher engagement and retention* among teams with trained managers.

7. Digital Dashboard

Visual management tools used to track, analyze, and display key performance indicators (KPIs), metrics, and data points in real-time.

9. Employee Engagement and AI Platforms

- AI-driven engagement platforms transform HR from reactive to **proactive and personalize** — helping leaders **see, understand, and act** on workforce sentiment in real time.

- Humu – “Nudge Engine”
- Sends AI-generated micro-suggestions (“nudges”) to employees and managers based on behavioral data.

- Example: “Recognize a colleague’s effort today — it boosts engagement by 20%.”Combines behavioral science + machine learning.

- Result: Higher engagement and inclusion scores across remote teams.

- **Microsoft – Viva Insights**

- Uses Microsoft 365 data (emails, meetings, chats) to analyze employee workload, focus time, and collaboration.AI identifies early signs of burnout or low engagement

- Recommends balance actions (e.g., fewer meetings, focus hours).

- Result: Improved well-being and team productivity in hybrid environments.

Application Case

Siemens Builds a Strategy-Oriented HR System

Siemens is a 150-year-old German company, but it's not the company it was even a few years ago. Until recently, Siemens focused on producing electrical products. Today the firm has diversified into software, engineering, and services. It is also global, with more than 400,000 employees working in 190 countries. In other words, Siemens became a world leader by pursuing a corporate strategy that emphasized diversifying into high-tech products and services, and doing so on a global basis.

With a corporate strategy like that, human resource management plays a big role at Siemens. Sophisticated engineering and services require more focus on employee selection, training, and compensation than in the average firm, and globalization requires delivering these services globally. Siemens sums up the basic themes of its HR strategy in several points. These include:

1. **A living company is a learning company.** The high-tech nature of Siemens' business means that employees must be able to learn on a continuing basis. Siemens uses its system of combined classroom and hands-on apprenticeship training around the world to help facilitate this. It also offers employees extensive continuing education and management development.
2. **Global teamwork is the key to developing and using all the potential of the firm's human resources.** Because it is so important for employees throughout Siemens to feel free to work together and interact, employees have to understand the whole Siemens process not just bits and pieces. To support this, Siemens provides extensive training and development. It also ensures that all employees feel they're part of a strong, unifying corporate identity. For example, HR uses cross-border, cross-cultural experiences as prerequisites for career advances.
3. **A climate of mutual respect is the basis of all relationships—within the company and with society.** Siemens contends that the wealth of nationalities, cultures, languages, and outlooks represented by its employees is one of its most valuable assets. It therefore engages in numerous HR activities aimed at building openness, transparency, and fairness, and supporting diversity.

Questions

3-13. Based on the information in this case, provide examples for Siemens of at least four strategically required organizational outcomes, and four required workforce competencies and behaviors.

3-14. Identify at least four strategically relevant HR policies and activities that Siemens has instituted in order to help human resource management contribute to achieving Siemens' strategic goals.

3-15. Provide a brief illustrative outline of a strategy map for Siemens.

Continuing Case

Carter Cleaning Company

The High-Performance Work System

As a person who keeps up with the business press, Jennifer Carter is familiar with the benefits of programs such as total quality management and high-performance work systems.

Jack, her father, actually installed a total quality program of sorts at Carter, and it has been in place for about 5 years. This program takes the form of employee meetings. Jack holds employee meetings periodically, but particularly when there is a serious problem in a store—such as poor-quality work or machine breakdowns. When problems like these arise, instead of trying to diagnose them himself or with Jennifer, he contacts all the employees in that store and meets with them when the store closes. Hourly employees get extra pay for these meetings. The meetings have been useful in helping Jack to identify and rectify several problems. For example, in one store all the fine white blouses were coming out looking dingy. It turned out that the cleaner/spotter had been ignoring the company rule that required cleaning ("boiling down") the perchloroethylene cleaning fluid before washing items like these. As a result, these fine white blouses were being washed in cleaning fluid that had residue from other, earlier washes.

Jennifer now wonders whether these employee meetings should be expanded to give the employees an even bigger role in managing the Carter stores' quality. "We can't be everywhere watching everything all the time," she said to her father. "Yes, but these people only [illegible] $8 to $15 per hour. Will they really want to act like mini-managers?" he replied.

Questions

3-16. Would you recommend that the Carters expand their quali program? If so, specifically what form should it take?

3-17. Assume the Carters want to institute a high-performance work system as a test program in one of their stores. Write a one-page outline summarizing important HR practices y think they should focus on.

PWC – Strategic HRM

The other area is around developing talent. So that's really working within the HR policies and looking at what they do. So as part of that, we look at a number of training programmes, both from right at the start when they first join (Company name), set up the induction through the technical training, through to a lot of leadership and developing talent programmes…

We also have a coaching culture as well, where we look to give people career direction, and not really from HR, but from people within the teams, supporting others, just mentoring and coaching people through their careers. So it's a combination of HR policy, combination of technical training, plus of coaching, which really is around how we develop our talent

.

SIEMENS

Strategically required organizational outcomes would be the following:

1) An employee selection and compensation system that attracts and retains the human talent necessary to support global diversification into high-tech products and services;

2) A “learning company” in which employees are able to learn on a continuing basis;

3) A culture of global teamwork which will develop and use all the potential of the firm’s human resources;

4) A climate of mutual respect in a global organization.

SIEMENS

- Workforce competencies and behaviors could include:
- 1) openness to learning;
- 2) teamwork skills;
- 3) cross-cultural experience;
- 4) openness, respect, and appreciation for workforce diversity.
-

Strategically relevant HR practices

1) Training and development activities to support continuous learning through a system of combined classroom and hands-on apprenticeship training to support technical learning;

2) Continuing education and management development to develop skills necessary for global teamwork and appreciation for cultural diversity;

3) Enhanced internal selection process which includes pre-requisites of cross-border and cross-cultural experiences for career advancement;

4) Organizational development activities aimed at building openness, transparency, fairness, and diversity support.

Strategy map?

1) What overall goals does Siemens want to achieve?;

2) What must Siemens do operationally to achieve its goals?; and 3

) What employee attitudes and behaviors will produce these operational outcomes?

Carters_performance work systems

The types of HR practices they would implement to improve quality, productivity, financial performance; methods for job enrichment; strategies for implementing and leveraging a team-based organization; ways to implement and facilitate high commitment work practices; employee development and skill building activities to foster increased competency and capability in the workforce; a compensation program which provides incentives (for example, profit sharing, pay for performance) for achieving major goals and financial targets.

Hotel Paris

HR in Practice at the Hotel Paris. *Starting as a single hotel in a Paris suburb in 1990, the Hotel Paris now comprises a chain of nine hotels, with two in France, one each in London and Rome, and others in New York, Miami, Washington, Chicago, and Los Angeles. To see how managers use strategic*

human resource management to improve performance, see the Hotel Paris Case.

Hotel Parls could use to measure Its HR practIces

- Number of qualified applicants per position
- Percentage of jobs filled from within
- Number of hour s of training for each employee
- Percentage of the workforce eligible for incentive pay
- Percentage of the workforce routinely working in a self - managed, cross functional, or project team
- HR to Employee Ratio
- HR Expenses
- HR Expenses to Operating Expense Ratio
- HR Expense to FTE Rat io
- Annual Salary Increase
- Maximum Reimbursement Allowed for Tuition/Education Expense per year
- Percentage of Employees Participating in Tuition/Education Reimbursement Programs
- Time - to - fill
- Cost - Per - Hire
- Annual Overall Turnover Rate

IMPROVING PERFORMANCE

Through HRIS: Tracking Applicant Metrics for Improved Talent Management

Let's talk about it…

- 2026 Autumn/Fall

Course outline-Week 2

- **Historical perspective on human resource management**
- **Important trends influencing human resource management**

Human Resource Manager competences

The HR journey

Overlapping shifts in the scope and influence of people management

Late 1800s–early 1900s	**Welfare and employment**	Safety, welfare, hiring records
Early to mid 1900s	**Labour and personnel administration**	Pay, rules, collective relations
Mid 1900s–1970s	**Personnel management**	Recruitment, training, employee relations
1980s–1990s	**Human resource management**	Performance, development, workforce planning
2000s–today	**Strategic and digital HRM**	Business partnering, analytics, employee experience

1900s The Personnel Administration Movement

Employer discovery: WORKER SATISFACTION = GREATER WORKER PRODUCTIVITY

Imagine that?!

FREDERICK W. TAYLOR

The Father of Scientific Management

Taylor developed the concept of **WORK DESIGN**, **WORK MEASUREMENT**, & **PRODUCTION CONTROL**, which transformed industry.

THE NATIONAL CASH REGISTER CO. is believed to have the first personnel management department.

1940s Management Style Evolved

The 40's saw a **BIG SHIFT IN THE TREATMENT OF EMPLOYEES** as Mayo's work and real-world business experience launched a **GREATER UNDERSTANDING** of the dynamics of work groups and the **SOCIAL NEEDS OF EMPLOYEES**.

Production improved as managers acted **LESS LIKE** ····› taskmaster and ‹····· **MORE LIKE** **GOOD LEADERS**, **COUNSELORS** and **FACILITATORS**.

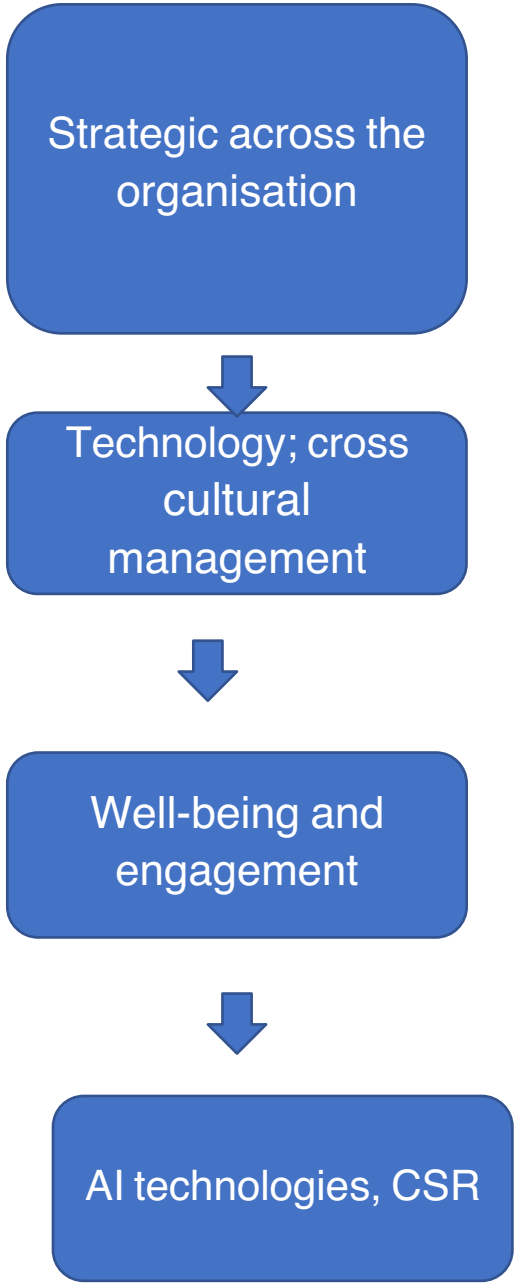

Dimensions	Personnel and IR	HRM
Beliefs and assumptions		
1. Contract	Careful delineation of written contracts	Aim to go beyond contract
2. Rules	Importance of devising clear rules/mutually	'Can-do' outlook; Impatience with 'rule'
3. Guide to management action	Procedures	Business-need'
4. Behaviour referent	Norms/custom and practice	Values/mission
5. Managerial task vis-a-vis labour	Monitoring	Nurturing
6. Nature of relations	Pluralist	Unitarist
7. Conflict	Institutionalized	De-emphasized
Strategic aspects		
8. Key relations	Labour management	Customer
9. Initiatives	Piecemeal	Integrated
10. Corporate plan	Marginal	Central
11. Speed of decision	Slow	Fast
Line management		
12. Management role	Transactional	Transformational leadership
13. Key managers	Personnel/ IR specialists	General/business/line

Dimension	Personel Management	Human Resource Management
14. Communication	Indirect	Direct
15. Standardization	High (e.g. 'parity' an issue)	Low (e.g. 'parity' not seen as relevant)
16. Prized management skills	Negotiation	Facilitation
Key levers		
17. Selection	Separate, marginal task	Integrated, key task
18. Pay	Job evaluation (fixed grades)	Performance-related
19. Conditions	Separately negotiated	Harmonization
20. Labour-management	Collective bargaining contracts	Towards individual contracts
21. Thrust of relations with stewards	Regularized through facilities and training	Marginalized (with exception of some bargaining for change models)
22. Job categories and grades	Many	Few
23. Communication	Restricted flow	Increased flow
24. Job design	Division of labour	Teamwork
25. Conflict handling	Reach temporary truces	Manage climate and culture
26. Training and development	Controlled access to courses	Learning companies
27. Foci of attention for interventions	Personnel procedures	Wide ranging cultural, structural and personnel strategies

Early Personnel Management (Late 19th Century - Early 20th Century):	
Taylor-Scientific Management (1890-1910)	Employee selection based on scientific critieria; administrative tasks such as payroll, employee records, and compliance with labor laws.
World war 1 (1910-1920)	As early vocational and employment-relating testing to assign military recruits
Human Relations Movement (1920s and 1930s)	
Hawtorne studies (1924-1932) Wagber Act. 1935	Linkage between HR , worker satisfaction and productivity *-unionized workers.*
Emergence of HR as a Profession (1940s-1950s)	
1945-1960 World war 2 (1945-1960)	Collective bargaining and tremendous increase in benefits Labor unions gained prominence, influencing labor practices and negotiation processes.
The 1960s and 1970s: Legal and Regulatory Changes	
The civil rights Act, 1964 **(Equal Employment Opportunity (EEO) Laws)**	Significant labor legislation, such as the Civil Rights Act and the Occupational Safety and Health Act, was enacted. HRM became increasingly involved in compliance and diversity initiatives. *-affirmative action*

Strategic HRM (1980s - 1990s)
HR as a strategic partner; aligning HR practices with the overall business strategy gained prominence.
HR professionals began to focus on talent management, succession planning, and workforce planning.
Technology and Globalization (Late 20th Century - Early 21st Century):
Advancements in technology transformed HR practices, including the automation of HR processes, the rise of HRIS (Human Resource Information Systems), and the emergence of e-recruitment. Globalization led to increased diversity and the need for cross-cultural competence in HR.
Employee Well-being and Engagement (2000s - Present):
employee well-being, work-life balance, and employee engagement became critical HR functions expanded to include employee development, training, and initiatives to improve the employee experience.
Future Trends (Ongoing):
trends like flexibility, the gig economy, and artificial intelligence, flexible scheduling, impacting HR practices.HR analytics and data-driven decision-making are becoming increasingly important. Focus on diversity, equity, and inclusion (DEI) initiatives has grown significantly.

What is changing HRM?

Global employer forecasts and a 2025 US HR survey

39%

of workers' current skill sets are expected to change or become outdated by 2030

85%

of surveyed employers expect to prioritise workforce upskilling

43%

of surveyed HR professionals report AI use in HR tasks in 2025

Class discussion: Which HR decisions need more human judgement as AI use grows?

Distributed HR: who does what?

People management spans HR teams, line managers and employees

Shared services / People Ops	Payroll, records, routine requests
Centres of expertise	Specialist policy and programmes
HR business partners	Advice linking business needs and people practices
Line managers	Hiring input, feedback, development and daily decisions
Employees and self-service	Update details, access services and learning

HR manager competencies today

HR expertise	Recruitment, learning, reward and employee relations
Business and strategy	Understand the organisation and its workforce needs
Data and digital	Interpret evidence and assess HR technology
Relationships and ethics	Advise managers; protect fairness and confidentiality
Change capability	Support adoption and build manager capability

Facts

Recent Facts & Statistics (2024–2025)

Talent Shortage & Recruiting Difficulty

- In 2024, **nearly 4 in 5 employers** globally reported difficulty finding the talent they need — a continuation of high demand for skilled candidates. (Manpower Survey)
- In SHRM's 2024 Talent Trends report, **47% of HR professionals** said their organizations experienced recruiting difficulties in the past year. (SHRM)
- iHire research shows that **63% of companies** expect a talent shortage or lack of qualified candidates to affect their ability to hire in the next year.
- In 2025, **89% of HR leaders** say it is challenging to find skilled talent. (Robert Half)

HR Trends & Strategic Shifts

- In the "2024 Talent Trends" insights, nearly **half of companies** said they had problems **retaining full-time employees** over the prior 12 months. (SHRM)
- According to Mercer's *Global Talent Trends 2024–2025*, **66% of organizations** are focusing on improving people managers' skills.
- **78% of organizations** already deploy AI in at least one HR function.
- **McKinsey (2025)** notes that **87% of firms** say they already face or soon will face a *skills gap*, especially in technology, data, and sustainability-related roles.

The Global Talent Shortage Since 2014

Evolving HRM role: **forecasting future skill needs, leading upskilling programs, and rethinking job architectures.**
Organizations that invest in **learning & development, inclusive recruitment, and digital HR systems** are better positioned to close the skills gap.

Talent Shortages Around The World

Employers report difficulty filling open roles, with the biggest impacts being felt in:

Future of HRM

Gig economy (transient)

- **short-term, project-based, or on-demand jobs** performed by **independent workers** instead of full-time employees.
- 57.3 million people freelance in the U.S. It's estimated that by 2027 there will be 86.5 million freelancers. (Upwork)
- 36% of U.S. workers participate in the gig economy through either their primary or secondary jobs. (Gallup)
- For 44% of gig workers, their work in the gig economy is their primary source of income. (Edison Research)
- About 40% of the American workforce now makes at least 40% of their income via gig work. (PYMNTS)

Gig economy

‘transient’

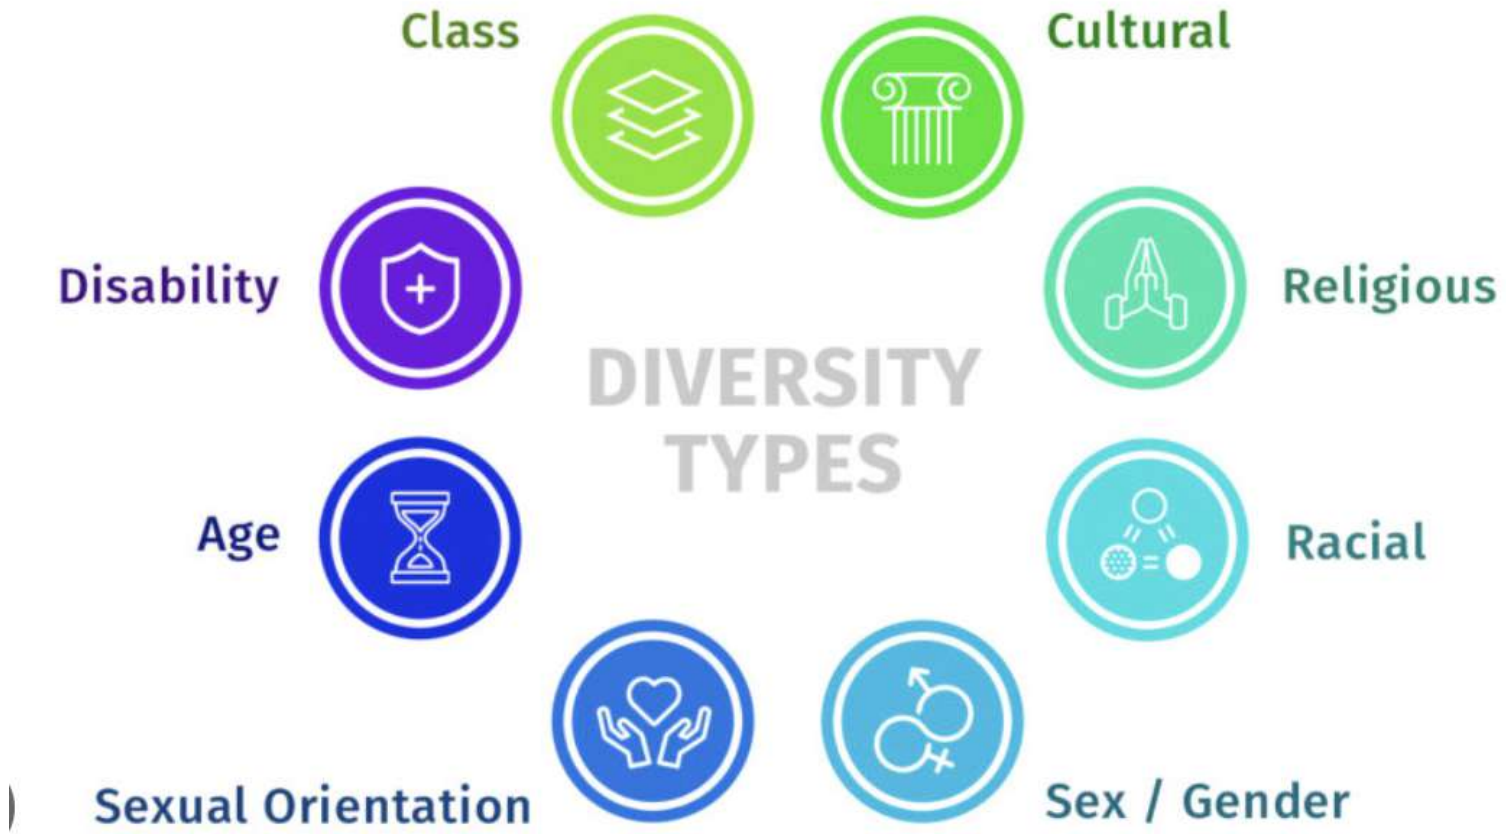

- **Freelancers & Independent Professionals**
- Example: Graphic designers, copywriters, and programmers working on Upwork, Fiverr, or Toptal.
- **Striking fact: By 2025, freelancers are projected to make up 50% of the U.S. workforce (Forbes, 2024).**
- Case: **A UX designer in Istanbul collaborates remotely with startups in Berlin and Dubai — paid per project, not per job title.**
- **Consultants & Contractors**
- Example: Management consultants or IT specialists hired by firms for 6-month transformation projects.
- Case: **During COVID-19, companies like Accenture and Deloitte expanded their use of independent consultants for digital adaptation tasks.**
- **Temporary Workers (Temps)**
- Example: Seasonal retail staff hired by Amazon during holiday peaks or by IKEA during new store openings.
- **Striking fact: In 2024, Amazon employed over 250,000 seasonal temporary workers worldwide to handle Black Friday and Christmas surges.**

Trends in Human Resource Management

- **Workforce Demographics and Diversity Trends**
- **Trends in How People Work**
- **Improving Performance At Work:** *HR as a Profit Center*
- **Globalization Trends**
- **Economic Trends**
- **Technology Trends**

What are examples of diversity in the workplace?

Workforce Demographics and Diversity Trends

Some statistics and evidence-based estimations!

- **Race discrimination**
- **On average, white and Asian employees earn more than Hispanics and Blacks.**
- (weekly salary sat at $951 for Hispanics, $986 for Blacks, $1,231 for Whites, and $1,566 for Asians)
- **Gender discrimination**
- Women accounted for approximately **47% of the U.S. civilian labour force in 2025**.
- Women led **55 Fortune 500 companies in 2025**, representing **11%** of the total.
- **Age discrimination**
- labour force consists of 23.4% of employees aged 55 and older.
- Companies with greater gender diversity perform **15 to 21%** better than companies with little or no gender diversity among staff members.
- **Migration and Workforce Diversity**
- Foreign-born people accounted for 19.1% of the U.S. civilian labour force in 2025.
- This measure includes foreign-born workers, rather than their U.S.-born children
- **Diversity and Business Performance**
- McKinsey's **2023** study found that companies in the top quartile for executive-team gender diversity were **39% more likely to outperform financially** than those in the bottom quartile.

- USA Labour Statistics, 2021

Facts

- **83% of surveyed employers** reported having diversity, equity and inclusion initiatives in place, compared with **67% in 2023**. *(World Economic Forum, 2025; global employer survey)* www.weforum.org
- **52% of U.S. workers** viewed efforts to increase workplace DEI as mainly positive in 2024, down from **56% in 2023**. *(Pew Research Center, 2024)* Pew Research Center
- **Women held 11% of Fortune 500 CEO positions in 2025**, illustrating continued underrepresentation in senior leadership. *(Fortune, 2025)*
- **51% of surveyed employers globally** planned to provide diversity, equity and inclusion training for managers and staff during **2025–2030**. This measures planned provision, not completed training. *(World Economic Forum, 2025)*

HR responsibilities in a diverse workforce

Inclusive hiring	Broaden talent pools and reduce bias in selection.
Age and generational inclusion	Support learning across career stages without stereotypes.
Gender equity and equal pay	Review pay gaps and access to promotion and leadership.
LGBTQ+ inclusion	Build respectful policies and address harassment and exclusion.
Disability and neurodiversity	Improve accessibility and adapt work to individual needs.
Inclusive workplace culture	Develop managers, encourage employee voice and support carers.
Measurement and accountability	Track representation, pay, progression and retention with privacy.

Which HR process would you change first to make a workplace more inclusive, and how would you assess progress?

Globalization trends

- **Multinational companies seek for cheaper labour in new market**

-73% of multinational companies (MNCs) expanding into **emerging markets** primarily for *lower labor costs and local market access*) (Mercer Global Mobility Trends, 2024).)

- However, **60%** of these companies face **compliance and cultural challenges** due to differing labor laws and workplace norms (Deloitte Global Human Capital Trends, 2024).
- Around **40% of international assignments fail** due to **poor cultural adaptation** or **family adjustment issues** (Harvard Business Review, 2024).
- **Example: Unilever and Shell provide structured "cultural agility" programs for expatriates before overseas postings.**

Developing foreign culture and work practice training programs

Adjusting compensation plans for overseas work

- e.g. recruitment policy, discriminatory acts, promotion policy, localization of leadership
- **Example: Coca-Cola's Africa and Asia divisions promote local executives to build trust and cultural alignment with communities.**
- Note: exposure of human resources (employees) in emerging markets are another side of the coin

Globalisation and the workforce

International expansion brings access to customers and skills, cost efficiencies and opportunities for knowledge transfer.

34%

of surveyed employers expect geopolitical tensions and geoeconomic fragmentation to transform their businesses by 2030.

World Economic Forum, Future of Jobs Report 2025

67%

of surveyed organisations rate reviewing mobility policies as a high or medium priority.

Mercer, 2025 Talent Mobility Outlook

These surveys measure expectations and priorities, rather than completed organisational changes.

HR responsibilities across borders

Cross-cultural preparation	Provide cultural and language training, family support and return planning.
International compensation	Adapt pay and benefits to living costs, relocation needs and local markets.
Local responsiveness	Adapt employment practices while maintaining consistent ethical standards.
Local talent development	Build leadership pipelines and support knowledge exchange across countries.
Responsible employment	Address low pay, unsafe conditions and exploitation risks in supply chains.

Example: Unilever aims for suppliers representing 50% of procurement spend to sign its Living Wage Promise by 2026. Signing is a commitment, not proof of wage outcomes.

More on HR Technology Trends

- **There are 5 main types of digital technologies driving HR professionals to automation:**

- *1.Artificial Intelligence AI and Automation*
- *2. Data Analytics & Predictive HR*
- *3. Cloud-Based HR Platforms*
- *4. Mobile HR & Self-Service Apps*
- *5. Social Media & Employer Branding*
- *6. Virtual Reality (VR) & Gamification*

- Which HR tasks should be automated, and which should remain under human judgement?

How HR teams are using AI

HR area	Applications
Recruitment and talent acquisition	Candidate sourcing, CV screening, job matching and interview support
HR administration	Employee enquiries, document processing, candidate communication and scheduling
Employee development	Personalised learning recommendations, skills assessment and internal career matching
Workforce planning and retention	Identifying skills gaps, forecasting staffing needs and estimating turnover risks

--Unilever – uses AI video interviews to assess tone and language, reducing bias and speeding up hiring

- **--IBM** – applies predictive analytics to identify turnover risks and guide retention auses AI chatbots for candidate queries and scheduling, cutting hiring time by 75%.ctions.

AI can improve speed and consistency, but HR must assess accuracy, fairness and privacy and retain accountability for decisions.

AI and HR : Statistics

- 81% of HR leaders are exploring or using AI to improve efficiency in their organisations
- The top barrier (37%) for HR leaders to adopt AI is the lack of integration into existing systems
- 93% of HR managers that use AI tools believe it helps save costs
- Screening and assessment is the capability that HR leaders most want AI to improve in the hiring process

- (Jobylon, 2024, Future AI: Navigating 2024's Recruitment Trends)

Concerns with using AI in HR

- **Role transformation:** According to a study from IBM, executives estimate that 40% of their workforce will need to reskill as a result of implementing AI and automation over the next three years.
- **Employee privacy**
- **Replacing human expertise:** It's imperative to understand that artificial intelligence is not a substitute for human expertise. Instead, it should be viewed as a tool. HR-professionals' experience and knowledge remain important assets for ensuring high-quality HR operations.
- **Ethics and legality:** EU AI Act. As new laws are sure to emerge, it is essential that companies stay informed and follow developments to **ensure their use of AI is ethical, legal, and compliant.**

What TA and HR teams should do?

- **Map out your use of AI:** Identify where you're already using AI and how you plan to use it in the future.
- **Raise awareness**: Educate your team on the regulations and their impact on recruitment.
- **Assess your role:** Determine your company's role for each use case to understand your obligations.
- **Evaluate risk**: For each use of an AI-system, assess its risk level according to the Act to clarify your responsibilities.
- **Address privacy and bias:** Be aware of privacy and discrimination risks when using AI for automated decisions.
- **Plan for oversight:** Read up on the requirements for human oversight and establish a governance plan.
- **Ensure transparency**: Decide how you will meet the transparency requirements for your use of AI.

Usage of social media in HRM

- 1) Social media trends in recruitments (as a hiring tool, talent attraction, reputation management)
- 2) Employees` usage of social media and companies social media policy

Social Media & Employer Branding

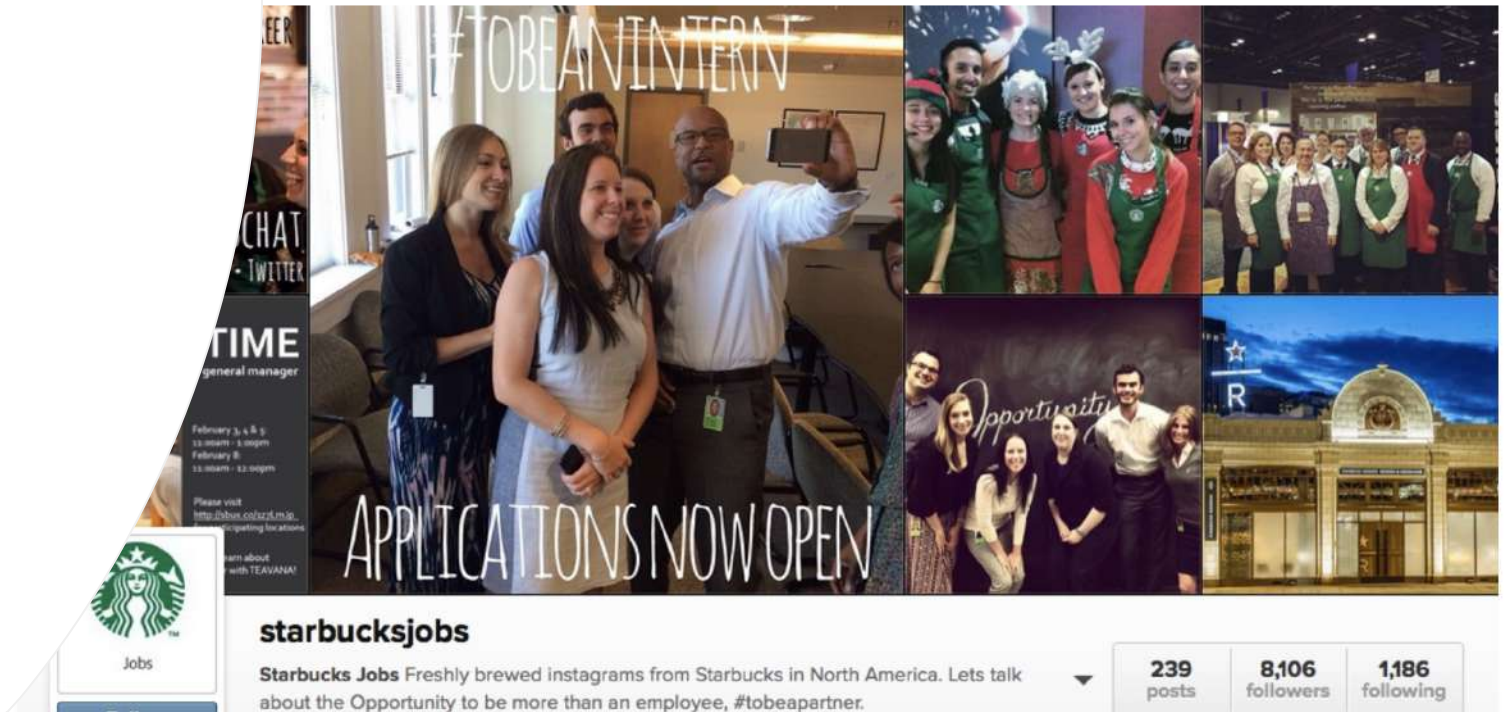

- **LinkedIn** – remains the top platform for professional recruitment; companies like **Microsoft** and **Google** use targeted storytelling and employee-voice posts to attract global talent.
- **TikTok** – brands such as **Ryanair and Duolingo** use humour and viral trends to humanise their image and reach Gen Z candidates.
- **L'Oréal** – leverages **Instagram and YouTube** for behind-the-scenes content, showing real employees and daily life at the company to strengthen authenticity.
- Deloitte – runs global "**#LifeAtDeloitte**" campaigns across platforms, encouraging employees to share their own experiences and fostering trust.
- **Heineken –** created the interactive campaign "Go Places", combining social media and gamified storytelling to attract creative, globally minded applicants.
- **What would make a company's social media content convince you that it is a good place to work?**

Social media trends in recruitments

- Nearly 95% of recruiters use social media to post, promote job openings, brand management

- 59% of employees say they chose their current workplace in part because of the company's social media presence.

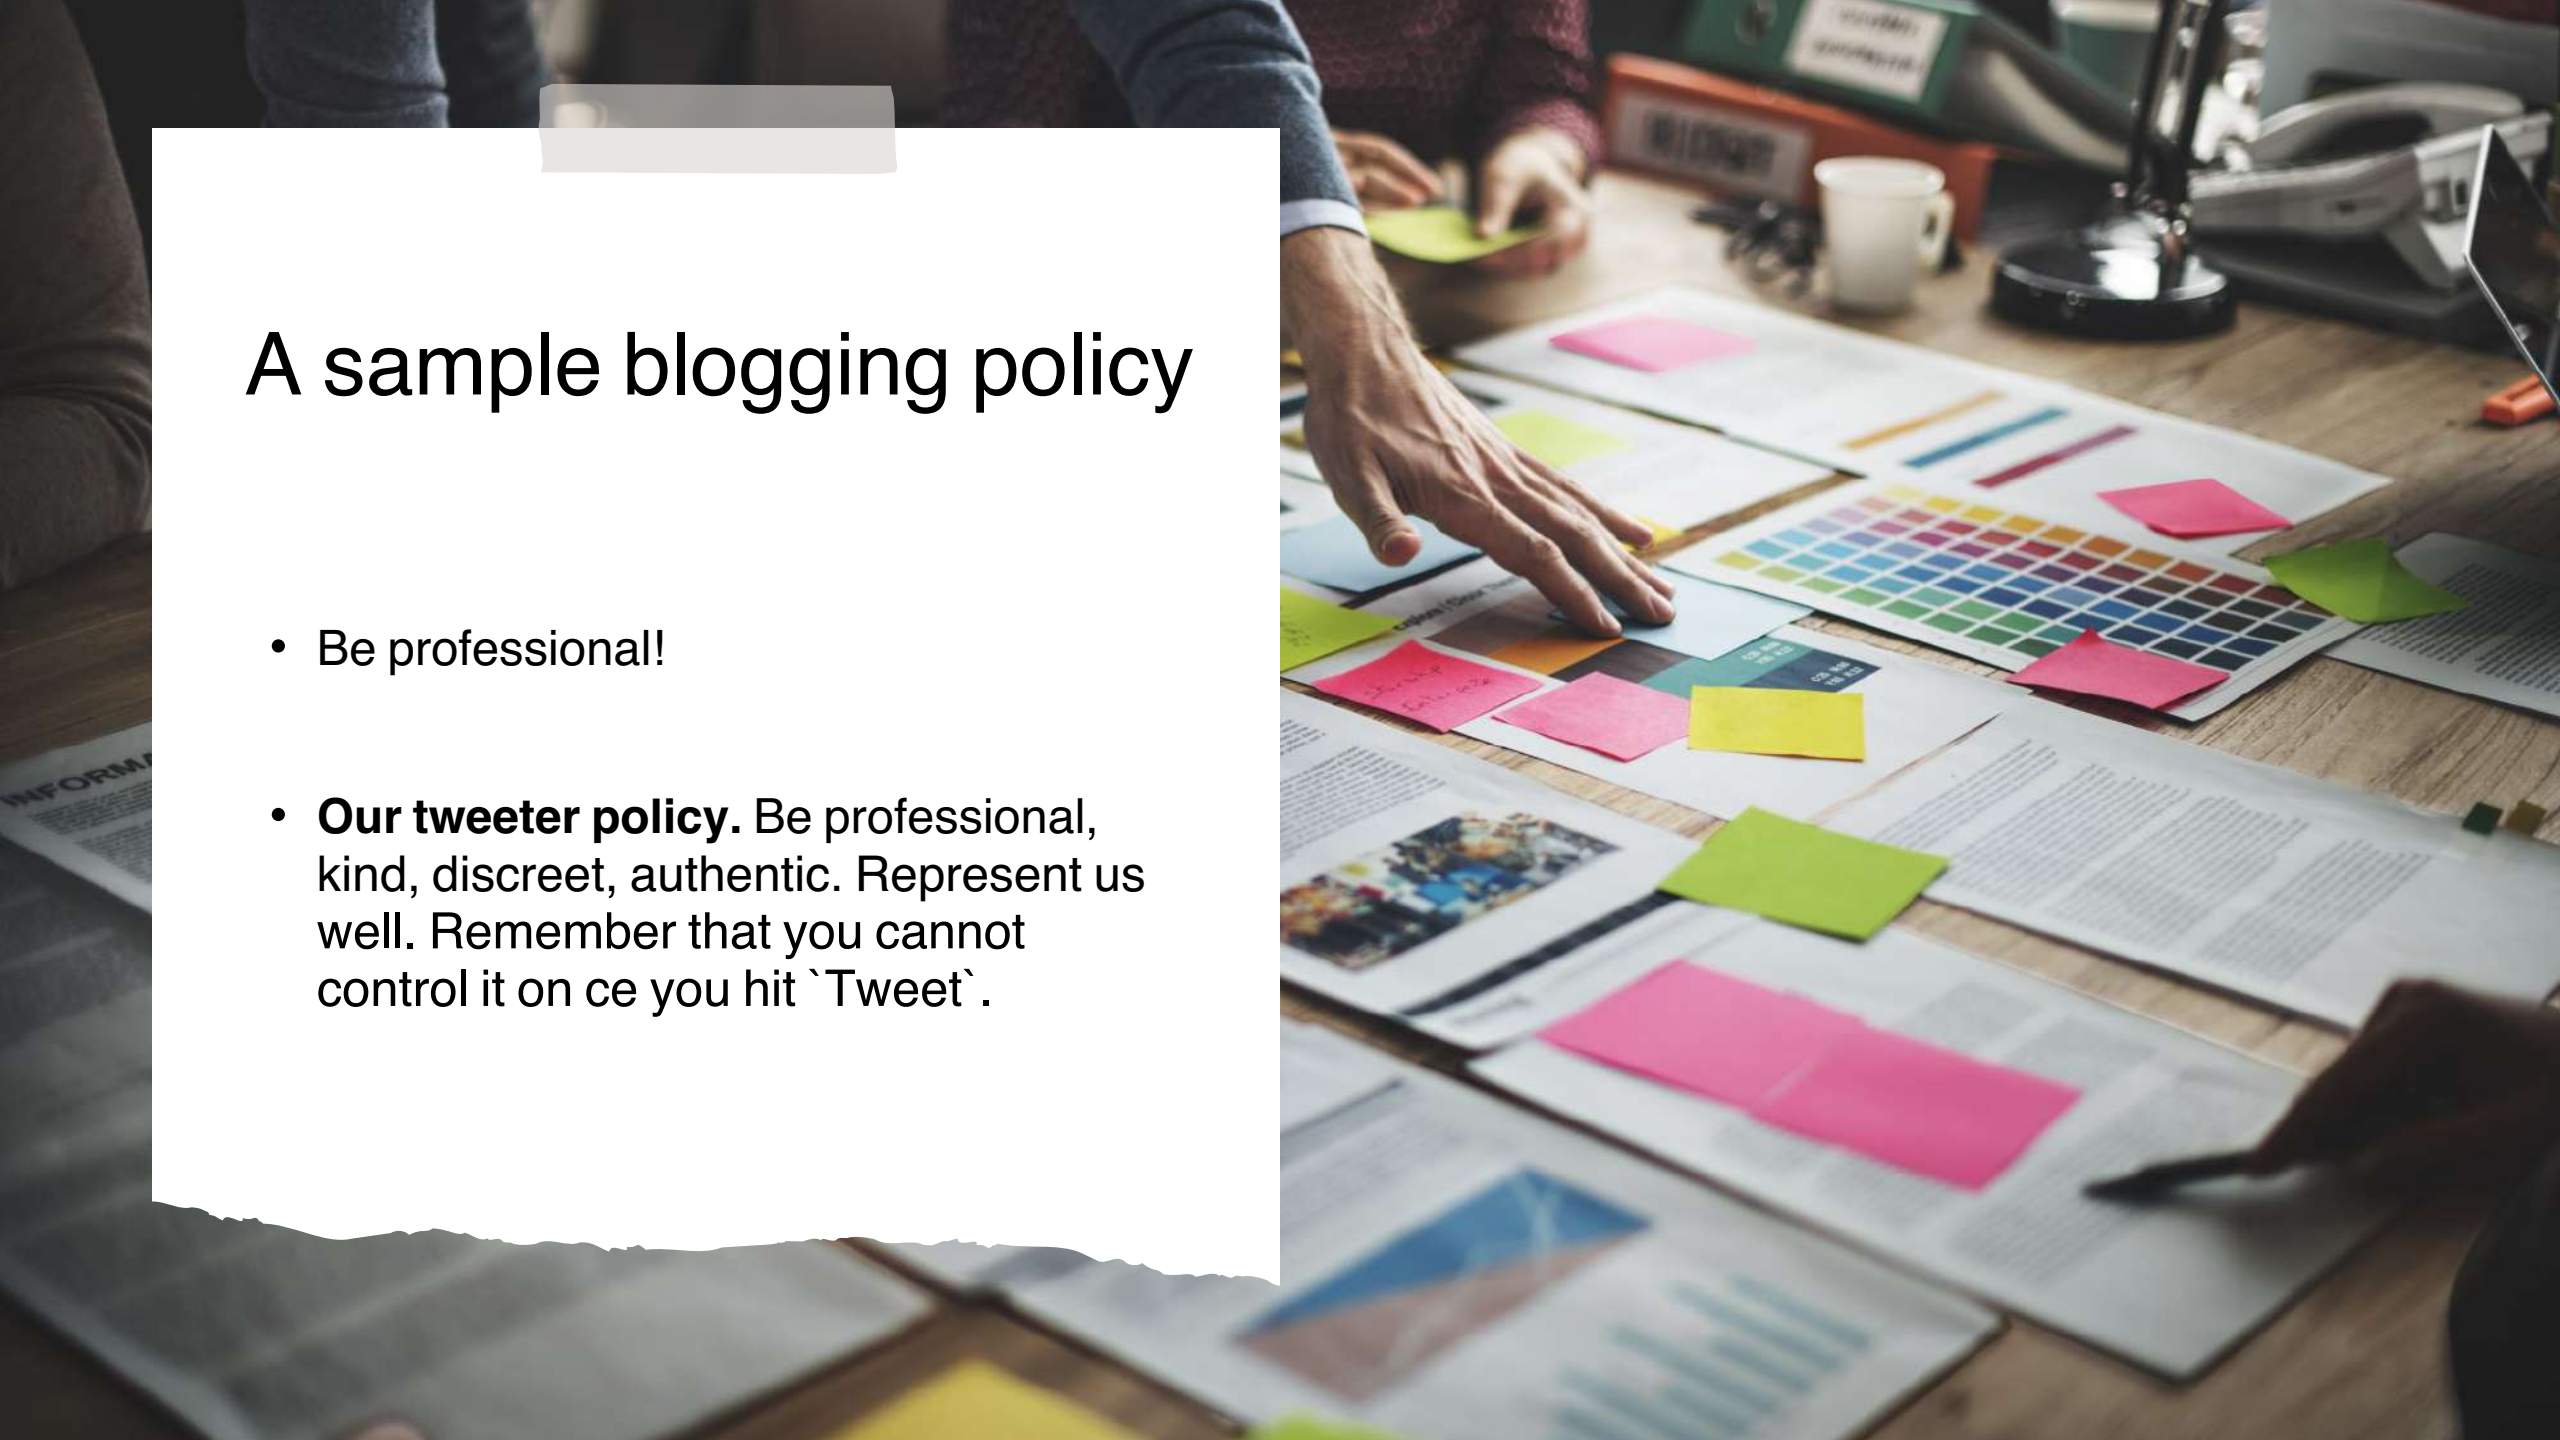

What is Social media policy for human resources

- A social media policy is a code of conduct that provides guidelines for employees who post content online either as part of their job description or personal brand.

- The goal of a social media policy is two-fold:
- It sets expectations for appropriate behaviour online with regard to the company.
- It protects employers from legal issues or potential social media crises.

Cisco Blog > The Platform

Cisco's Internet Postings Policy

Cisco | March 24, 2008 at 12:00 pm PST

(9 Comments)

With the rise of new media and next generation communications tools, the way in which Cisco employees can communicate internally and externally continues to evolve. While this creates new opportunities for communication and collaboration, it also creates new responsibilities for Cisco employees. This Internet Postings Policy applies to employees who use the following:

- Multi-media and social networking websites such as MySpace, Facebook, Yahoo! Groups and YouTube
- Blogs (Both Cisco Blogs and Blogs external to Cisco)
- Wikis such as Wikipedia and any other site where text can be posted

All of these activities are referred to as "Internet postings" in this Policy Please be aware that violation of this policy may result in disciplinary action up to and including termination. Common sense is the best guide if you decide to post information in any way relating to Cisco. If you are unsure about any particular posting, please contact the Cisco "internet postings" email alias for guidance. For instance, if you are writing about Cisco business where you have responsibility, you may wish to make sure your manager is comfortable with your taking that action.

3-Cloud computing in HR

- **Cloud Computing in HR** means using **internet-based (cloud) platforms** to manage HR processes—rather than relying on local servers or paper systems. It allows HR teams to access data, automate processes, and collaborate from anywhere in real time.

- **BambooHR**: BambooHR offers cloud-based HR software designed for small and medium-sized businesses. It includes features for applicant tracking, employee self-service, and performance management.

- **TriNet** – Provides cloud-based HR, payroll, benefits, time tracking, and compliance solutions, particularly for small and medium-sized businesses.
- **Workday** – Global leader providing cloud solutions for HR, payroll, and financial management used by major corporations.

USED BY: ***MICROSOFT, DELOITTE, AND SIEMENS***

Monster for employers

Gamification in HR

Using game elements to attract, assess, train and engage people

Definition
Gamification means using game elements — challenges, levels, points, simulations and feedback — in HR activities to increase engagement and learning.

Common HR uses

- Recruitment & candidate engagement
- Selection / assessment simulations
- Onboarding & realistic job previews
- Training, learning & motivation

PwC Hungary

Multipoly game
Candidates solve real business problems in a simulated PwC environment.

Unilever

Game-based assessment
Online games used to assess capabilities in early-stage recruitment.

Deloitte

Learning gamification
Game elements used in leadership learning and development.

Marriott

My Marriott Hotel
Virtual hotel-management game supports employer branding and job preview.

Classic case: PwC Multipoly

190%

reported growth in job candidates

78%

of users wanted to learn more about PwC

Key message Gamification turns HR processes from passive tasks into interactive experiences — helping organizations attract, assess, train and engage people.

Sources: PwC Multipoly case reported in Forbes/Robert Walters; examples from public company case discussions.

Gamification examples

- **İşbank** — developed a strategy game called ***İşVille*** to train employees on retail banking products and services in a simulated environment.
- **Marriott** — “My Marriott Hotel” simulation game for recruitment
- **Cisco** — Social media training with badges and team challenges
- **Deloitte** — Gamified onboarding and leadership learning modules

•Crowdsourcing in HR refers to leveraging a wider network (employees, online communities, external contributors) to generate ideas, solve HR problems, or help with talent acquisition.

•Instead of relying solely on internal HR or recruiting teams, organisations tap into a broader “crowd”

(e.g. alumni, referral networks, freelance platforms) to source candidates or insights.

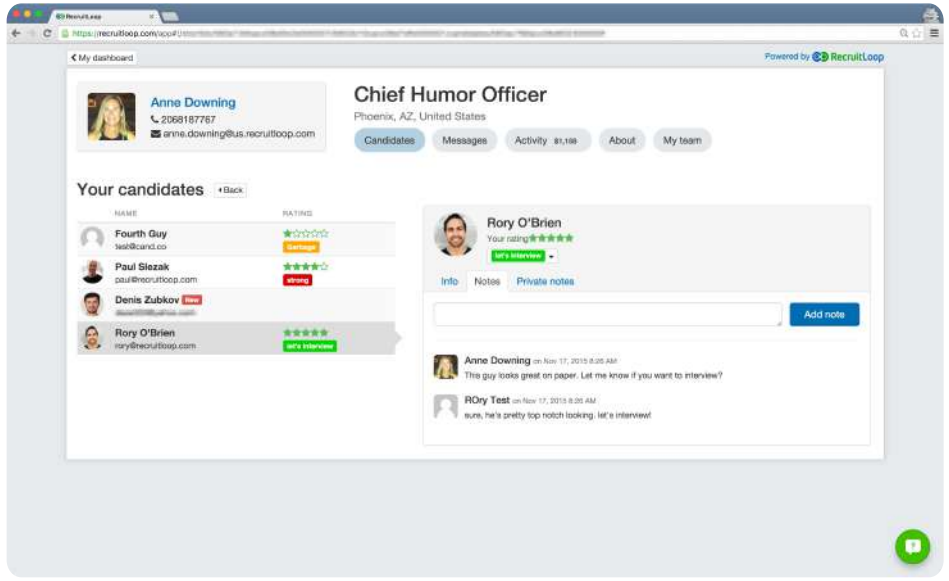

•The process often begins with a recruiter defining desired skills, experience, and attributes; then a crowdsourcing entity provides qualified leads or solutions.

Why and how to crowdsource?

- **Idea Generation and Innovation**: Deloitte and IBM use internal crowdsourcing to gather employee insights for innovation and engagement initiatives.
- **Recruitment and Candidate Sourcing**: **Unilever, PwC, and EY** partner with crowdsourcing platforms (e.g., Toptal, Upwork, Freelancer) to identify specialized talent faster.
- **Problem Solving**
- **Feedback and Surveys**:
- **Employee Recognition and Rewards**:
- **Skill and Knowledge Sharing**:
- **Policy and Procedure Development**
- **Wellness and Engagement Programs**
- **Training and Development Feedback**
- **Performance Feedback and Appraisals**
- **Knowledge Base and FAQ**:

- Crowdsourcing in HR can be facilitated through various means, including online platforms, surveys, focus groups, suggestion boxes, or dedicated programs.

Top companies that offer crowdsourcing

- TalentCrowd. - https://www.youtube.com/watch?v=3S7AYGi2LWs
- Visage
- Recruitfi
- RecruitLoop
- Reflik
- IndeedCrowd

Crowdfunding platforms – wish list application

HR and Performance and Sustainability

- **It is about measuring companies in terms of maximizing profits but also on their environmental and social performance as well.**
- A **SHRM survey** found that **75% of HR executives believe ESG strategies positively impact employee morale and engagement.** SHRM

HR and Performance and Sustainability

Flexible / remote work → reduces commuting emissions. Many organizations continue hybrid models as a “green HR” practice.

Paperless / digital HR processes → less printing, digital documentation, electronic signatures.

Green office operations – LED lighting, energy efficiency, recycling programs, waste reduction policies.,

Sustainability in recruitment – embedding sustainability goals or values in job ads, screening for candidate alignment, interviewing about ESG mindset.

Training & awareness – educating employees about sustainability, climate impact, responsible practices.

Volunteer / community programs – paid time off for environmental volunteering, cleanup days, social causes.

Sustainability metrics in performance & reward systems – tying ESG goals to employee appraisals and bonuses.

Global HR / mobility – reducing carbon footprint in expatriate assignments via remote work, shorter durations, or virtual relocation.

Application Case: NovaBank's People Problem

Introductory HRM activity • 3–4 students per group

CASE BACKGROUND

NovaBank is a rapidly growing bank with a head office in Istanbul and 14 branches across Türkiye. Over the past two years, the bank has expanded its retail and digital banking operations and hired more than 150 new employees. Senior management is pleased with the growth, but people-related problems have started to appear.

"I'm not completely sure why we do some of these things. When I started, one of my colleagues sat next to me for a few days and showed me which steps to follow. My manager was very busy, so I mostly learned by watching other people."

— Ece, Customer Service Representative

During a routine branch visit, the HR Director meets Ece, a customer service representative who joined two months earlier. Ece serves customers efficiently, uses the customer-management system confidently, and has already received positive customer feedback.

Ece looks capable — but her learning has been mostly informal.

BRANCH MANAGER VIEW

The branch manager describes Ece as promising but admits there is no consistent onboarding process. New employees are expected to start serving customers quickly. Experienced employees usually help newcomers learn the job while managers focus on sales targets, customer complaints, scheduling, and daily operations.

At another branch, turnover has become serious: five employees resigned in eight months, and three left within their first six months.

Read the case, then diagnose the HR system — not just individual performance.

NovaBank Case: What the HR Director Discovers

Use the evidence below to answer the discussion questions

EVIDENCE FROM BRANCHES

- Similar job titles involve different responsibilities across branches
- Recruitment varies: LinkedIn, referrals, job platforms, or informal conversations
- Some managers use AI tools for CV screening and interview questions without a common policy
- Onboarding, training access, feedback, and annual appraisals differ by branch
- Exit interviews mention unclear expectations, workload, limited feedback, and few development opportunities

NovaBank already has a cloud-based HR system containing recruitment, training, absence, performance, and turnover data. However, HR mainly uses it for administration; no one has systematically analysed turnover by branch, manager, role, or recruitment channel.

DIFFERENT VIEWPOINTS

Branch manager:

"HR creates policies, forms, and training programs, but they do not always understand what happens in the branch."

HR team member:

"We provide managers with tools and guidelines, but some branches simply do things their own way."

CEO:

"We have technology, experienced managers, and talented employees. What exactly is going wrong?"

Group discussion questions

1. What are the main HR problems at NovaBank?
2. Which HR functions are involved, and what belongs to HR vs. line managers?
3. If you were the HR Director, what three actions would you recommend first — and why?

NovaBank Case — Suggested Answers

Instructor notes • Questions 1 & 2

1. Main HR Problems

Inconsistent HR practices across branches — recruitment, onboarding, training and appraisal differ.

Weak job clarity and onboarding — employees know how to complete tasks but not always why or what is expected.

High turnover and weak employee experience — workload, limited feedback and few development opportunities.

HR data is collected but not used diagnostically to identify patterns or causes.

AI is being used in recruitment without common standards, raising consistency, fairness and governance concerns.

2. HR Unit vs. Line Managers

HR Unit: design job descriptions and workforce standards; coordinate recruitment systems; create onboarding/training frameworks; design performance-management processes; analyse HR data; set policies for digital/AI tools.

Line Managers: participate in selection; clarify day-to-day expectations; coach and onboard employees; provide regular feedback; evaluate performance; identify development needs; communicate with and motivate teams.

Shared responsibility: recruitment decisions, onboarding quality, employee development and retention.

Key principle: HR creates the framework; line managers bring it to life.

NovaBank Case — What Should HR Do First?

Instructor notes • Question 3 and debrief

1 Diagnose with Data

Analyse turnover by branch, manager, role, tenure and recruitment channel.

Combine HR-system data with exit interviews and employee feedback.

Identify where the problems are concentrated before designing solutions.

2 Standardize Core HR

Clarify core job descriptions and expectations.

Introduce minimum standards for recruitment, interviews and onboarding.

Establish common performance-management and AI-use guidelines.

Keep reasonable flexibility for local branch needs.

3 Strengthen Managers

Train line managers in onboarding, coaching and feedback.

Make managers accountable for people outcomes, not only sales targets.

Give managers practical HR tools and support rather than only forms and policies.

Key takeaway: NovaBank is not facing one isolated “employee problem” — it has an HR system and implementation problem.

Application Case

Jack Nelson's Problem

As a new member of the board of directors for a local bank, Jack Nelson was being introduced to all the employees in the home office. When he was introduced to Ruth Johnson, he was curious about her work and asked her what the machine she was using did. Johnson replied that she really did not know what the machine was called or what it did. She explained that she had only been working there for 2 months. However, she did know precisely how to operate the machine. According to her supervisor, she was an excellent employee.

At one of the branch offices, the supervisor in charge spoke to Nelson confidentially, telling him that "something was wrong," but she didn't know what. For one thing, she explained, employee turnover was too high, and no sooner had one employee been put on the job than another one resigned. With customers to see and loans to be made, she continued, she had little time to work with the new employees as they came and went.

All branch supervisors hired their own employees without communication with the home office or other branches. When an opening developed, the supervisor tried to find a suitable employee to replace the worker who had quit.

After touring the 22 branches and finding similar problems in many of them, Nelson wondered what the home office should do or what action he should take. The banking firm generally was regarded as being a well-run institution that had grown from 27 to 191 employees during the past 8 years. The more he thought about the matter, the more puzzled Nelson became. He couldn't quite put his finger on the problem, and he didn't know whether to report his findings to the president.

Questions

1-16. What do you think is causing some of the problems in the bank's home office and branches?

1-17. Do you think setting up an HR unit in the main office would help?

1-18. What specific functions should an HR unit carry out? What HR functions would then be carried out by supervisors and other line managers? What role should the Internet play in the new HR organization?

HR Unit

- Conduct job analyses & plan labor needs
- Recruit and select the right talent
- Manage onboarding and employee orientation
- Oversee wages, incentives, and benefits
- Conduct performance appraisals
- Facilitate organization-wide communication
- Provide training & development programs

Supervisors & Line Managers

Interview and select candidates

Train and mentor new employees

Appraise performance and motivate growth

Maintain clear communication in departments

Promote continuous learning and teamwork

3 Internet & HR – The Digital Shift

- Move HR tasks to **online portals**
- Use **digital tools** for recruitment and payroll
- Enable **24/7 employee access** to HR services
- Create a **connected, data-driven HR ecosystem**

Carter Cleaning Centers

Jennifer Carter graduated from State University in June 2008 and, after considering several job offers, decided to do what she always planned to do—go into business with her father, Jack Carter.

Jack Carter opened his first laundromat in 1998 and his second in 2001. The main attraction of these coin laundry businesses for him was that they were capital- rather than labor-intensive. Thus, once the investment in machinery was made, the stores could be run with just one unskilled attendant and none of the labor problems one normally expects from being in the retail service business.

The attractiveness of operating with virtually no skilled labor notwithstanding, Jack had decided by 2004 to expand the services in each

existing coin laundry activities. He added these for several
wanted to better utilize the unused space in the rather large stores he currently had under lease. Furthermore, he was, as he put it, "tired of sending out the dry cleaning and pressing work that came in from our coin laundry clients to a dry cleaner 5 miles away, who then took most of what should have been our profits." To reflect the new, expanded line of services, he renamed each of his two stores Carter Cleaning Centers and was sufficiently satisfied with their performance to open four more of the same type of stores over the next 5 years. Each store had its own on-site manager and, on average, about seven employees and annual revenues of about $500,000. It was this six-store chain that Jennifer joined after graduating.

Her understanding with her father was that she would serve as a troubleshooter/consultant to the elder Carter with the aim of

Human Resource Management

2026-2027, Fall

ÇAĞLA ÖZGÖREN, PHD
ASSISTANT PROFESSOR OF MANAGEMENT
BAHÇEŞEHIR UNIVERSITY

Introduction to course

- Syllabus
- Orientation

- **Introduction to HRM**
- 1)What is HRM and how it relates to the management process
- 2)Crucial global and competitive trends
- Distributed HRM and other aspects
- How managers use technology and modern HR measurement systems to create high performance work systems?

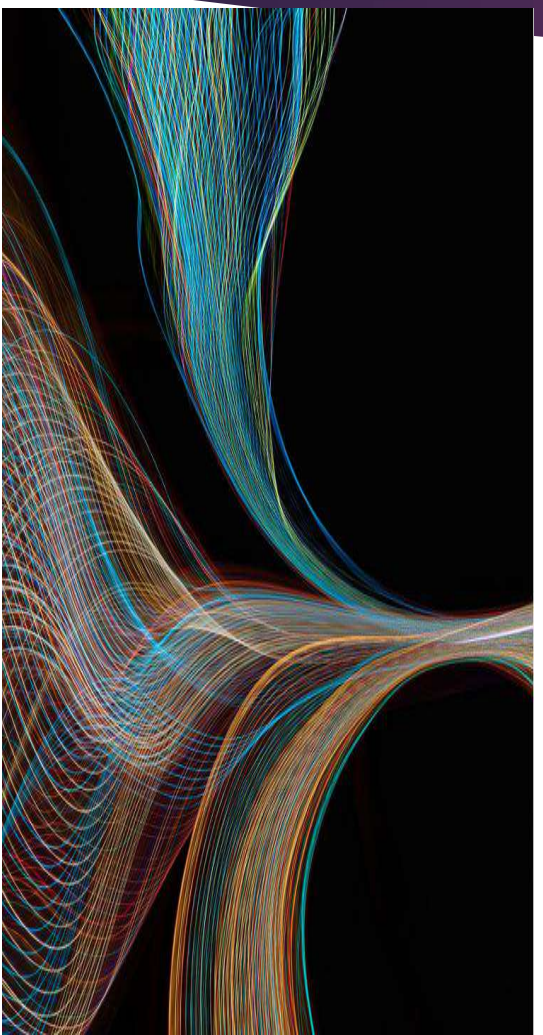

What comes to mind when you hear “Human Resource Management”?

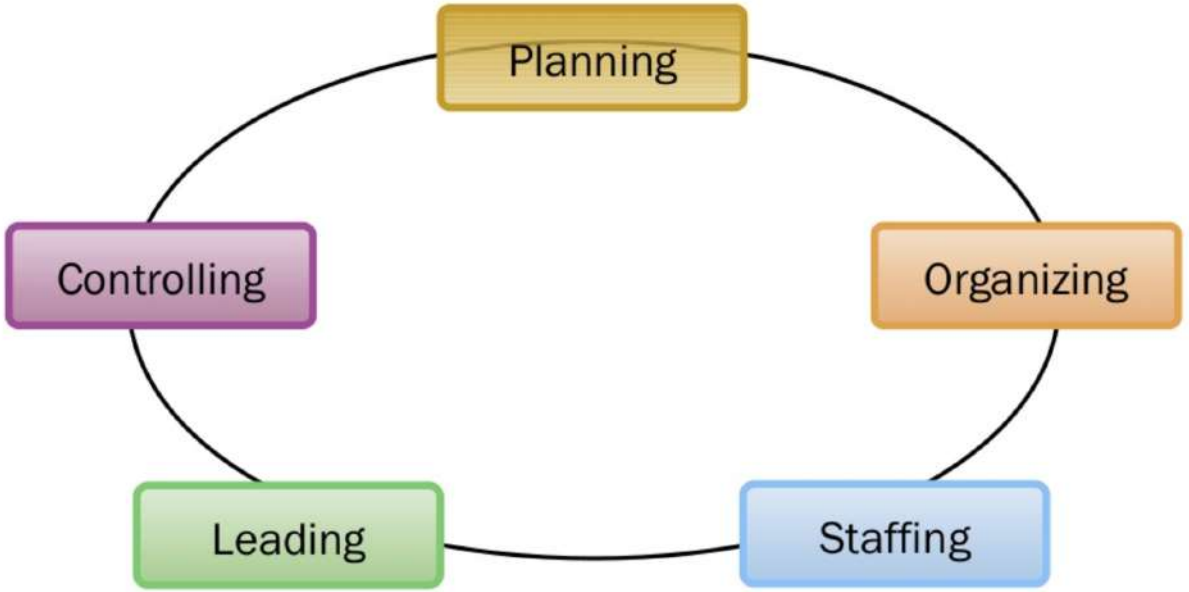

Is HRM only the responsibility of the HR department?

- What HR-related decisions do managers make in their daily work?

Management process

Human Resource Management

HRM is closely connected with all five. Although *staffing* is the most obvious people-related function, managers make HR-related decisions when they plan workforce needs, organize work, lead and motivate employees, evaluate performance and respond to changing organizational requirements.

Management	People dimension
Planning	What people and skills do we need?
Organizing	How should jobs and teams be designed?
Staffing	Who should we recruit and select?
Leading	How do we motivate and develop people?
Controlling	How do we evaluate and improve performance?

People Are Central to Management

What is Human Resource Management (HRM)?

- **Meaning**: in simple words stands for managing the employees of an organisation.
- It is the process of putting right people to the right task thereby making maximum use of the employees talent and abilities to achieve the desired goals and objectives.

Key Areas of Human Resource Management

Cross-cutting themes

- Diversity, Equity & Inclusion
- Ethics & Fairness
- HR Analytics, Digital HR & AI

Main Responsibilities of HR Managers

Core HR responsibilities

- Conducting job analysis and designing jobs
- Planning workforce needs
- Recruiting and selecting employees
- Onboarding new employees
- Training and developing employees and managers
- Managing performance
- Managing compensation, incentives and benefits
- Managing employee relations and engagement
- Supporting employee health, safety and wellbeing
- Ensuring fair and legally compliant HR practices

Core HR work remains important, but the way it is performed is changing.

Contemporary HR responsibilities

- People analytics and data-driven HR
- AI and automation in HR
- Hybrid and flexible work
- Employee wellbeing
- Skills planning and internal mobility
- Diversity, equity and inclusion
- Sustainability and Green HRM

Why Human Resource Management Matters

1 Avoid costly people-management problems

- Hiring the wrong person
- High employee turnover
- Poor performance or inadequate training
- Discrimination, unfair treatment or unsafe work practices

2 Improve employee and organizational outcomes

- Build employee skills, motivation and engagement
- Improve productivity, service quality, innovation and retention

Contemporary HR Priorities

- AI-enabled recruitment and selection
- Skills-based hiring
- People analytics and data-driven decisions
- Reskilling and internal mobility
- Hybrid and flexible work
- Diversity, equity and inclusion
- Employee wellbeing and psychological safety
- Sustainability and responsible HRM

HRM can create measurable value

Ball Corporation example: supervisors were trained to set daily goals, teams used scorecards, and employees received skills training.

84M
more cans produced

50%
fewer customer complaints

$3.09M
ROI increase in 12 months

HRM matters because organizations achieve results through people.

Sources: Adapted from Dessler (2024); Armstrong & Taylor (2026); CIPD Profession Map.

Google: People Analytics in Practice

Benefits and ethical questions for HRM

What people analytics can support

- **Evidence-based HR decisions** rather than relying only on intuition
- **Manager effectiveness** and team effectiveness insights
- **Pay equity analysis** to identify potential disparities
- **Workplace design** questions such as hybrid work, flexibility and wellbeing

Ethical questions

- **Privacy:** What employee data should be collected?
- **Bias:** Could algorithms reproduce past inequalities?
- **Transparency:** Do employees understand how data are used?
- **Fairness:** Are pay, promotion and ratings consistent?
- **Autonomy:** When does analytics become surveillance?

Discussion question **Just because we can collect and analyse employee data, does it mean that we should?**

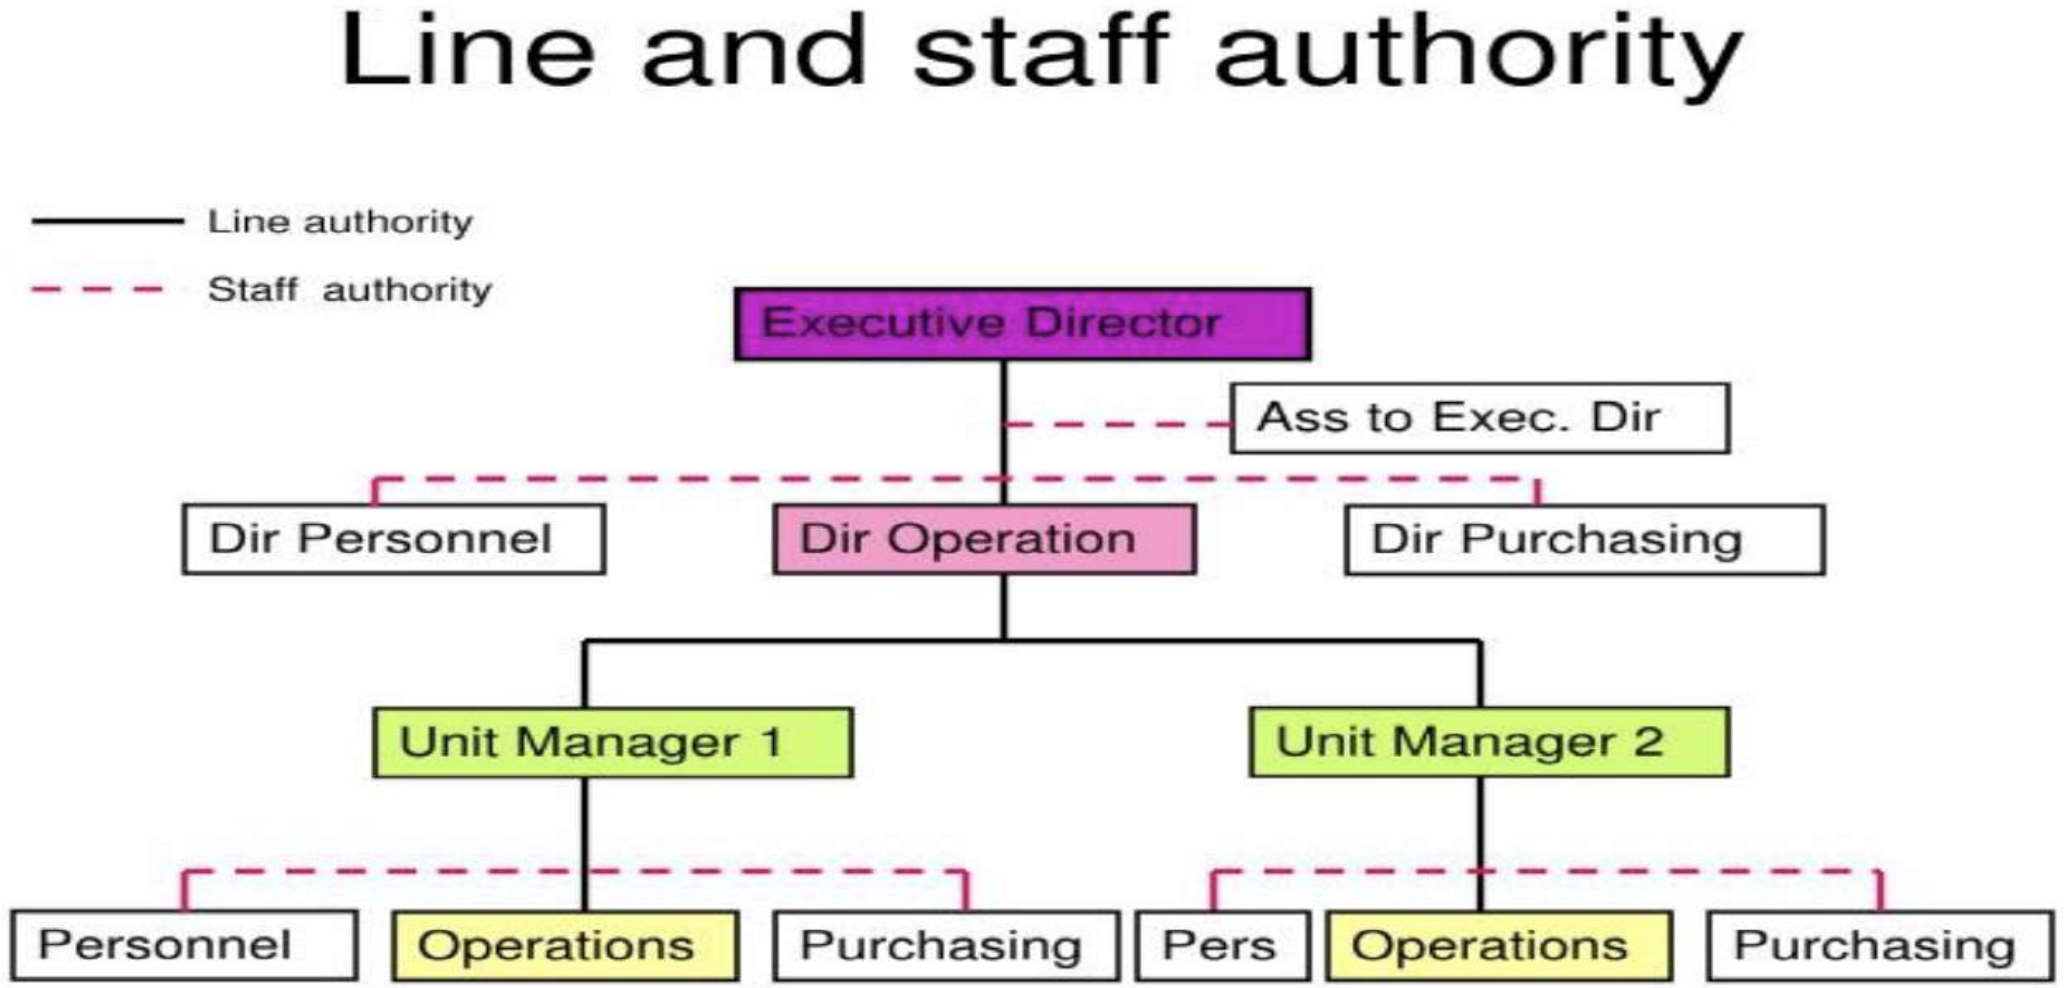

Sources: Google re:Work; Google Diversity Annual Report 2024; U.S. Department of Labor (2021); Reuters (2025).

Human Resource Management: Who Is Responsible?

- All managers are human resource managers because they get involved in activities like recruiting, interviewing and training

- **Line Manager has line (formal) authority to direct the work of subordinates**
- E.g Sales manager, Production manager
- **Staff Manager has staff (advisory) authority to coordinate personnel activities**
- **E.g. HR Manager**
- **Staff managers assists and advise line managers**

Line vs. staff authority

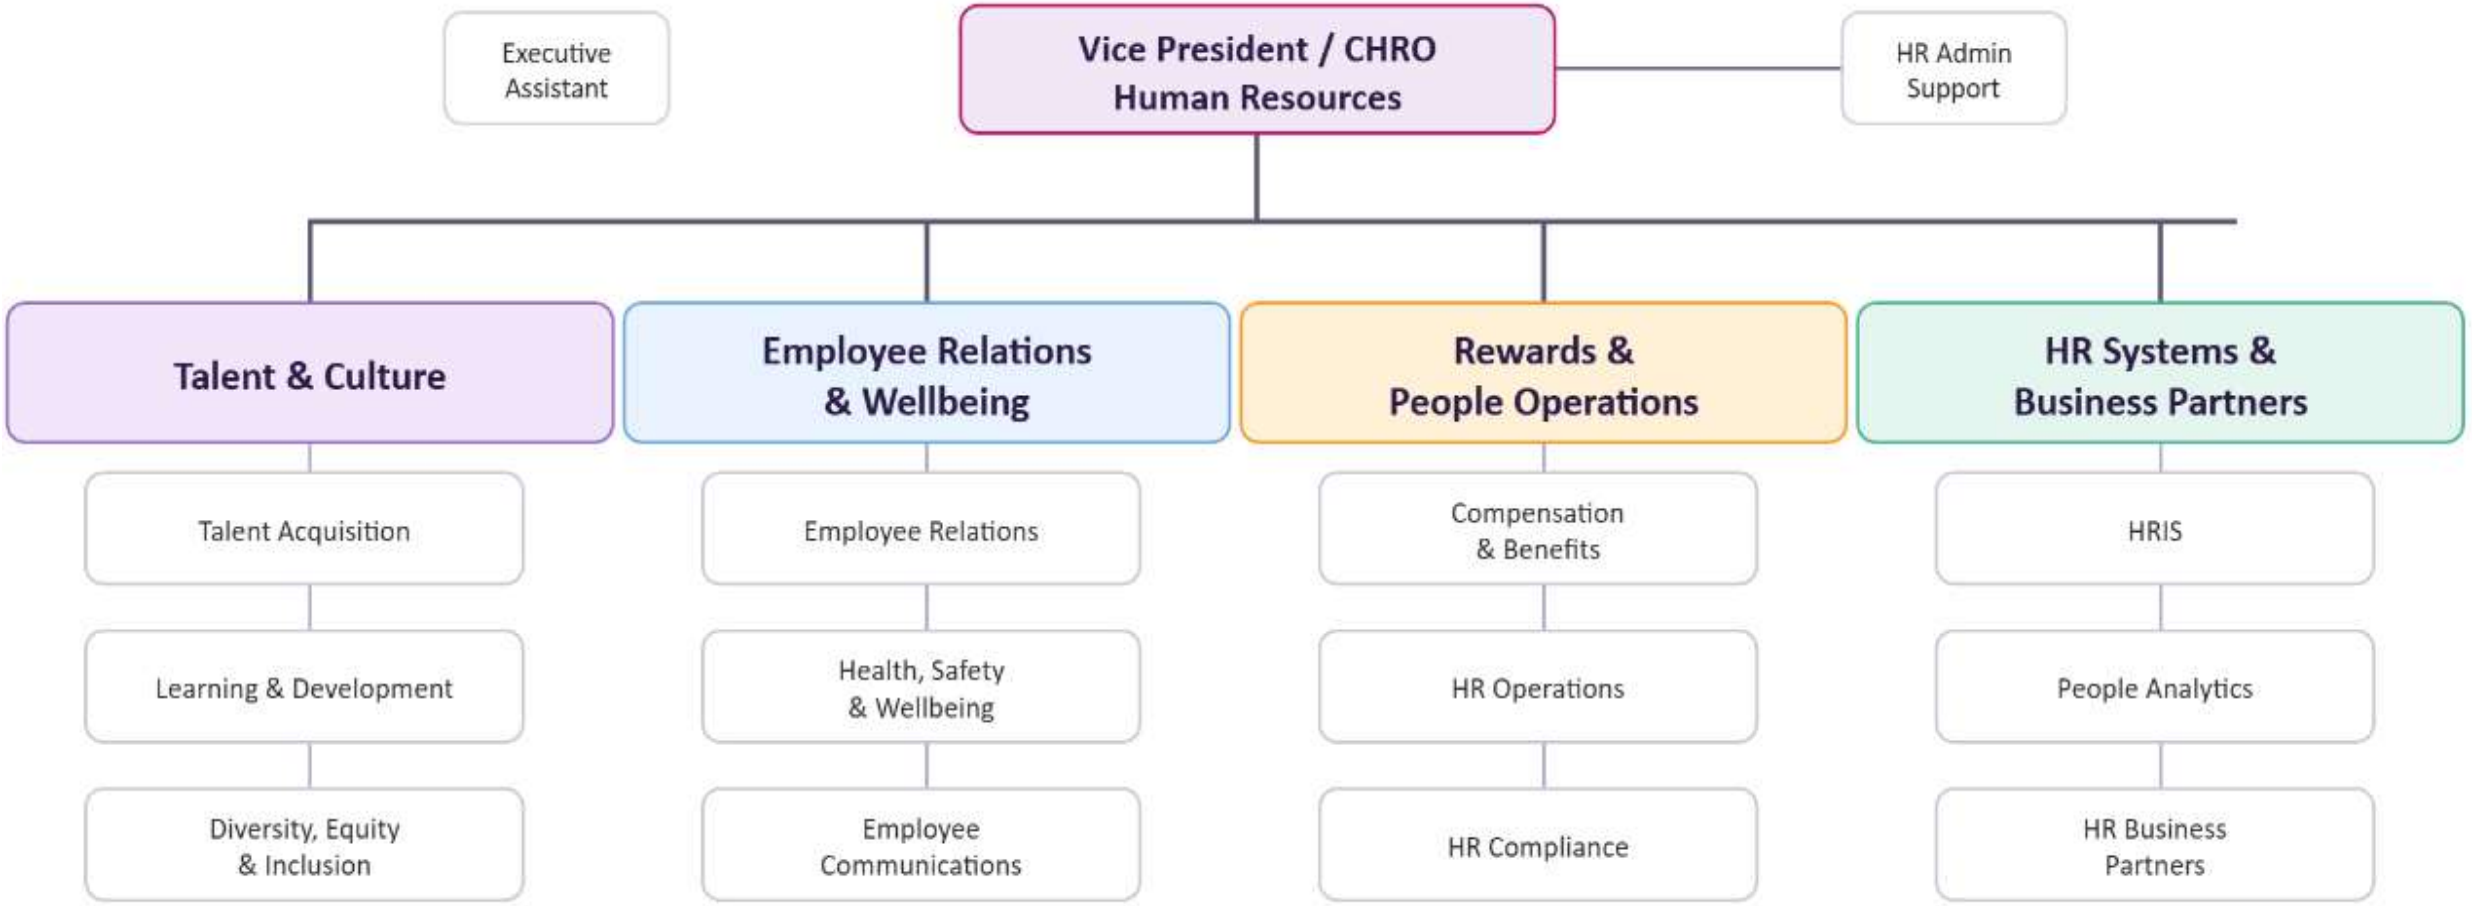

HR Responsibilities of Line Managers

- Selecting the right person for the job
- Onboarding and integrating new employees
- Setting clear goals and performance expectations
- Providing regular feedback and coaching
- Identifying training and development needs
- Motivating, engaging and supporting employees
- Managing day-to-day employee issues
- Supporting wellbeing, fairness and inclusion

HR may design the policies and systems, but line managers shape how employees experience them in everyday work.

Human resources organization chart

Key idea: HR departments often combine specialist expertise with support for line managers.

Example scale
144 HR staff supporting ~11,450 employees

BAU

Traditional HR vs. the New HR Operating Model

What is new is not the HR activities, but how HR work is organized.

Traditional HR Structure

- One HR team does a bit of everything
- Payroll, recruitment, training and employee issues handled together
- More duplication across units or countries
- Less specialization
- More time spent on administration

Typical model: one HR generalist supports one unit

New HR Operating Model

MORE ORGANISED.
MORE SPECIALISED.
GREATER IMPACT.

Shared Services / People Operations

Transactional HR

Routine, high-volume processes such as payroll, leave, records and HR queries

HR Business Partners

Business-facing HR

Work with managers on people and business issues

Centres of Excellence

Specialist expertise

Expert knowledge in talent, L&D, reward and people analytics

Digital HR, People Analytics & AI

Cross-cutting enabler

Technology, self-service, analytics and AI support all parts of the model

THE FUTURE OF HR >

Key idea: The new approach does not create new HR activities. It reorganizes traditional HR work into transactional services, business partnering, specialist expertise, and digital support.

Modern HR Operating Model: Examples from Large Companies

How shared services, HR business partnering and specialist expertise appear in practice

Same HR activities — different organization: routine operations + business partnering + specialist expertise + digital support

Shared Services / People Operations 1

Transactional HR

Unilever: People Experience

process + technology across employee lifecycle

- Centralized, standardized routine HR work
- Example: Istanbul, Ankara and Izmir offices use the same HR service team or platform
- Handles leave records, payroll questions, employee records, contracts and HR system queries

HR Business Partners 2

Business-facing HR

Amazon/AWS: HRBP with Data & AI leaders

talent strategy, organization design, leadership development, workforce planning

- Work closely with managers and business units
- Example problem: "My engineering team has high turnover."
- Ask: pay? workload? leadership? career paths? skills mismatch?

Centres of Excellence 3

Specialist expertise

Unilever: Expertise / CoEs

Talent, Reward, Learning, OD, People Analytics, EDI, Wellbeing

- Specialist HR teams support the wider organization
- Examples: Talent Acquisition, L&D, Reward / Compensation, Talent Management, People Analytics, Diversity & Inclusion, Health & Wellbeing
- HRBPs draw on these experts when a people problem needs a specialist solution

Digital HR • People Analytics • AI cross-cutting support across all parts of the HR model

Example: Microsoft lists People Analytics among HR disciplines

Sources: Unilever Careers; Amazon Jobs (AWS HRBP); Microsoft Careers HR2P.

Major Trends Shaping HRM Today

How work, technology and employee expectations are changing people management

HRM today is shaped by interconnected shifts in technology, skills, work design and employee experience.

AI & Automation

Human–AI collaboration, automation and AI-enabled HR tools are reshaping work and HR decisions.

Skills & Reskilling

Organizations focus more on skills, capability building, internal mobility and continuous learning.

Hybrid & Flexible Work

Hybrid work remains important, while many employers manage return-to-office expectations.

Wellbeing & Sustainable Performance

HR must balance productivity with workload, wellbeing, engagement and employee experience.

People Analytics

People data helps HR understand turnover, skills, performance and workforce planning.

Demographic Change & Inclusion

Ageing workforces, diversity and inclusion reshape talent management and workforce planning.

Changing Role of Managers

Managers are expected to coach, develop talent and lead hybrid, diverse and AI-enabled teams.

Discussion: Which trend will most affect employees and managers in the next five years?

Sources: Deloitte Human Capital Trends 2025; CIPD Flexible & Hybrid Working Report 2025; CIPD People Analytics Factsheet.

Globalization and the Global Workforce

From “cheaper labour” to managing people across borders, cultures and legal systems

Old framing to avoid

- Multinationals only seek cheaper labour
- HR is mainly expatriate management
- Overseas work is mostly

Still relevant, but too narrow for today’s HRM.

Current HR challenges in global organizations

Global talent & mobility

International assignments, short-term mobility, global talent pipelines and cross-border careers.

Legal & cultural adaptation

⚖

Employment laws, pay expectations and cultural norms differ across countries.

Global compensation & mobility

International pay, relocation, taxation, benefits, cost of living and immigration support.

Cross-border remote work

Employees may work for one country while living in another, creating compliance questions.

Global skills competition

Firms increasingly compete globally for scarce skills and capabilities, not only locally.

Key HR challenge: maintain global consistency while adapting HR practices to local laws, cultures and workforce needs.

Sources: Mercer; Deloitte; SHRM (global workforce and mobility insights).
